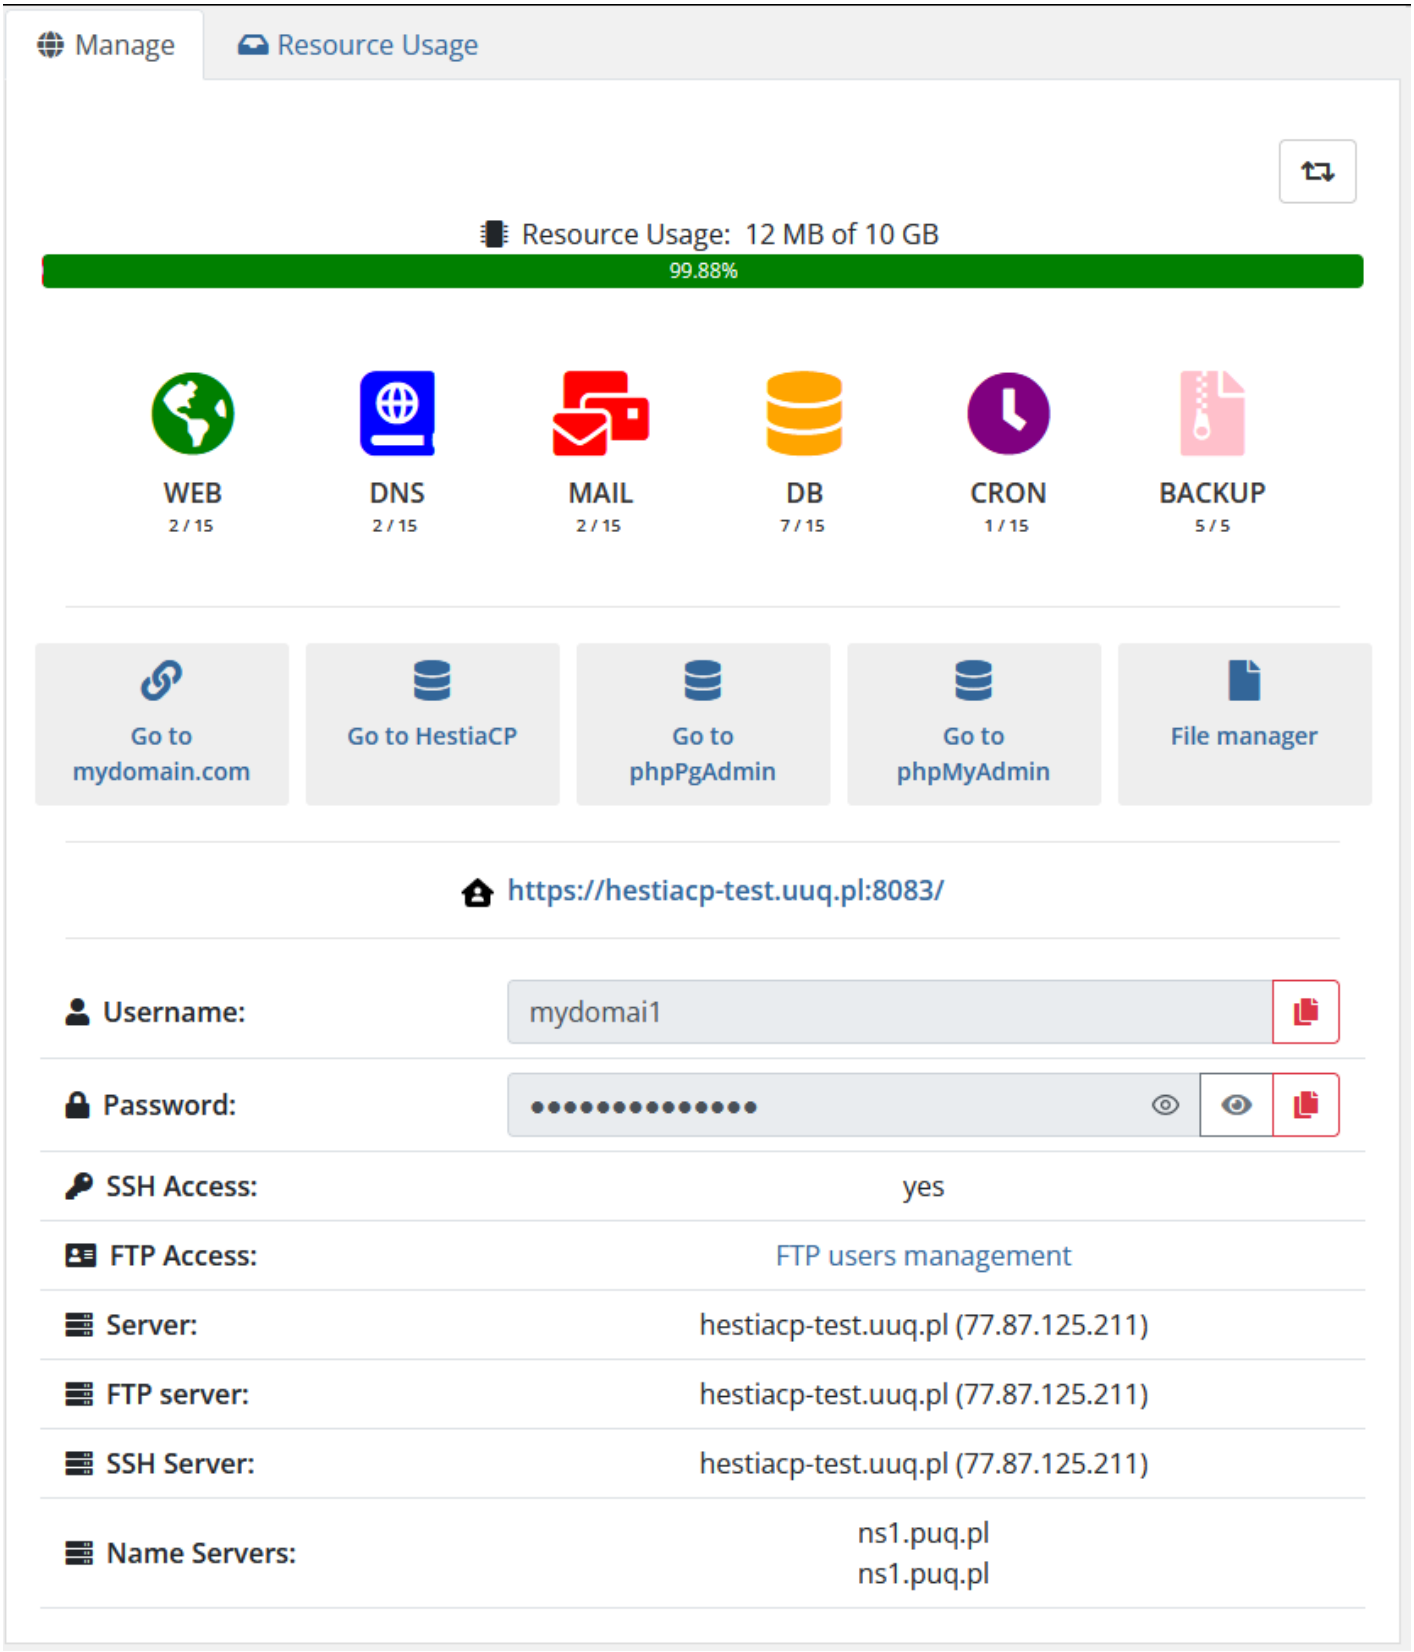
The end customer, after logging in to his own customer panel, has access to the following information and options:

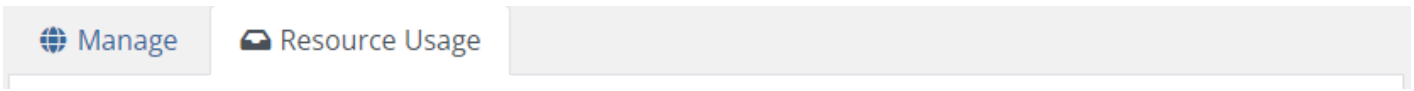
1. The Manage tab

- A strip with information about free space as well as a button for updating information about free space at the request of the user (if this functionality is enabled in the settings)
- Navigation bar and status information on each card.
- Button to go to the site specified during the registration of the service (if it was specified)
- Button to go to HestiaCP (if button setting is active)
- Button to go to phpPgAdmin (if button setting is active)
- Button to go to phpMyAdmin (if button setting is active)
- Button to go to File manager (if button setting is active)
- Basic hosting service data



2. The Resource Usage tab

- Displays service usage statistics



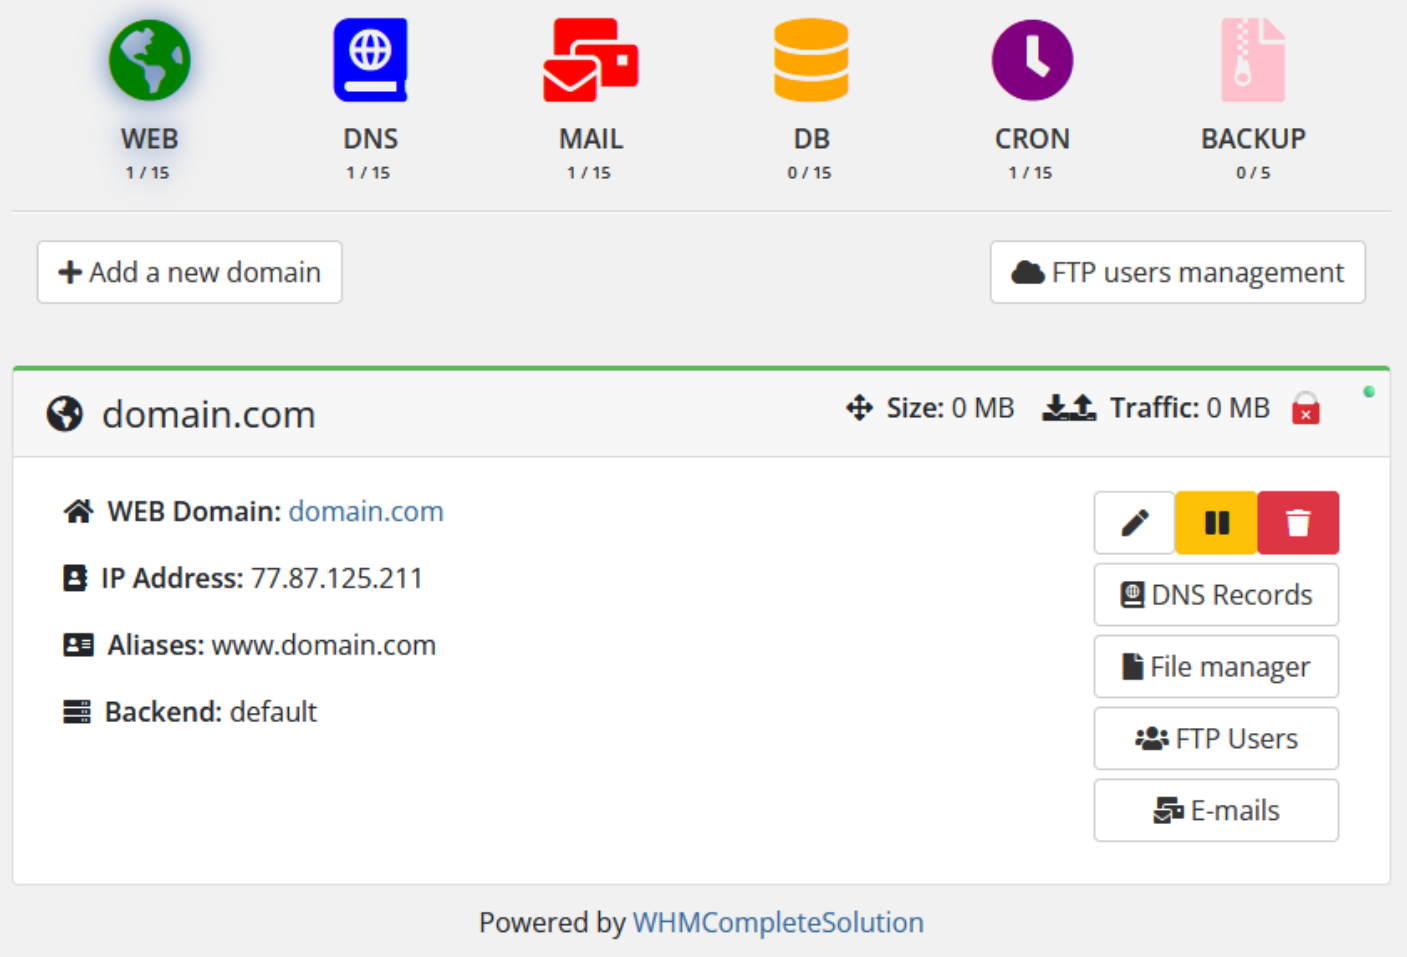
WEB section

HestiaCP module **WHMCS**

Order now | Download | FAQ

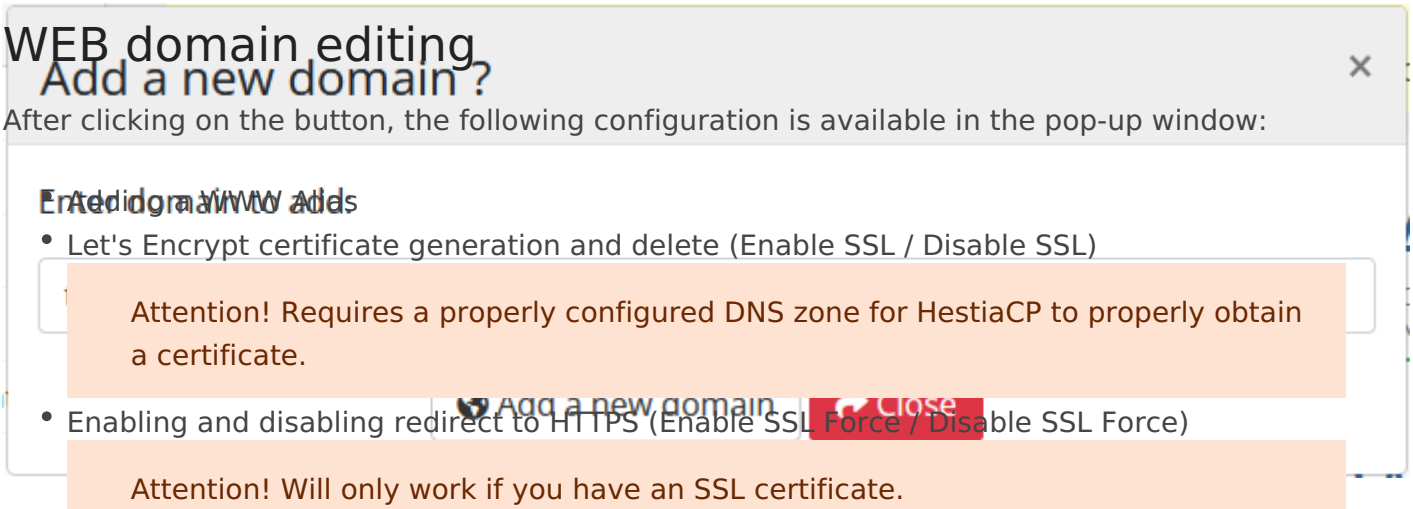
The end client, having entered the WEB section of the client panel, has access to the following information and parameters:

- Navigation bar and status information on each card.
- Button to go to add a new domain
- Button to go to FTP user management
- Cards with information about the client's WEB domains
  - Domain name
  - SSL certificate status 
  - Domain name status in the system HestiaCP is suspended or not suspended (Active) 
  - IP Address
  - Aliases
  - Backend
  - Disk Space (Size)
  - Bandwidth (Traffic)
  - Button to go to domain DNS zone settings
  - Button to go to the root of the site (if you have enabled and configured the file manager)
  - Button to go to the mail domain management section
  - Buttons for managing WEB domain
    - Edit
    - Suspend / Unsuspend
    - Delete



Adding a new WEB domain

After clicking on the button in the pop-up window, you must enter the name of the domain that you want to add. DNS Zones and Mail Domain will also be created



WEB domain editing

After clicking on the button, the following configuration is available in the pop-up window:

- Let's Encrypt certificate generation and delete (Enable SSL / Disable SSL)

> Attention! Requires a properly configured DNS zone for HestiaCP to properly obtain a certificate.

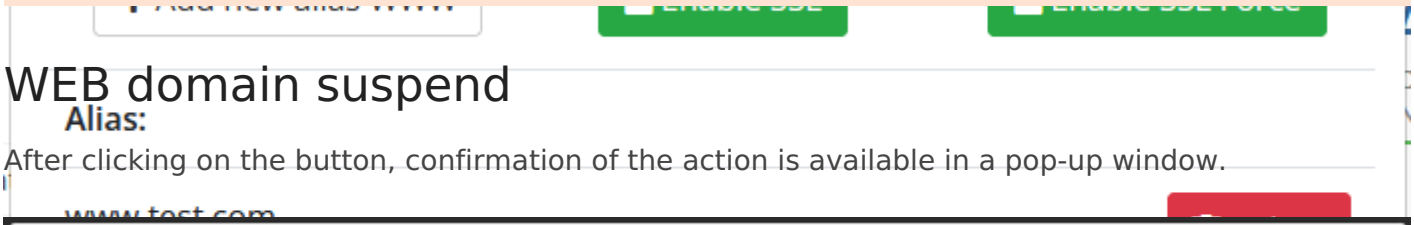
- Enabling and disabling redirect to HTTPS (Enable SSL Force / Disable SSL Force)

> Attention! Will only work if you have an SSL certificate.

- List of aliases with the ability to delete each
- Dropdown list of available backend templates on the server

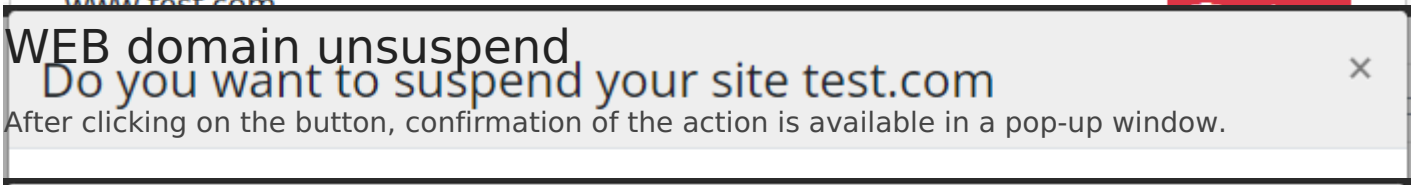
Attention! Web domains are the main setting. When creating a new web domain, a DNS zone will be created as well as a Mail domain. Also, if you delete the Web domain, the DNS zone of this domain will be deleted as well as the Mail domain. It also works when Suspend / Unsuspend.

WEB domain suspend



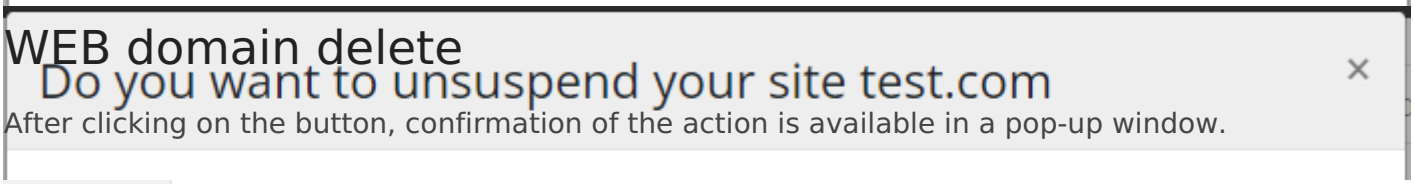
After clicking on the button, confirmation of the action is available in a pop-up window.

WEB domain unsuspend

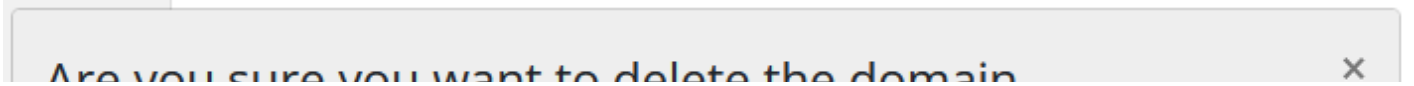


After clicking on the button, confirmation of the action is available in a pop-up window.

WEB domain delete



After clicking on the button, confirmation of the action is available in a pop-up window.



FTP user management section

HestiaCP module **WHMCS**

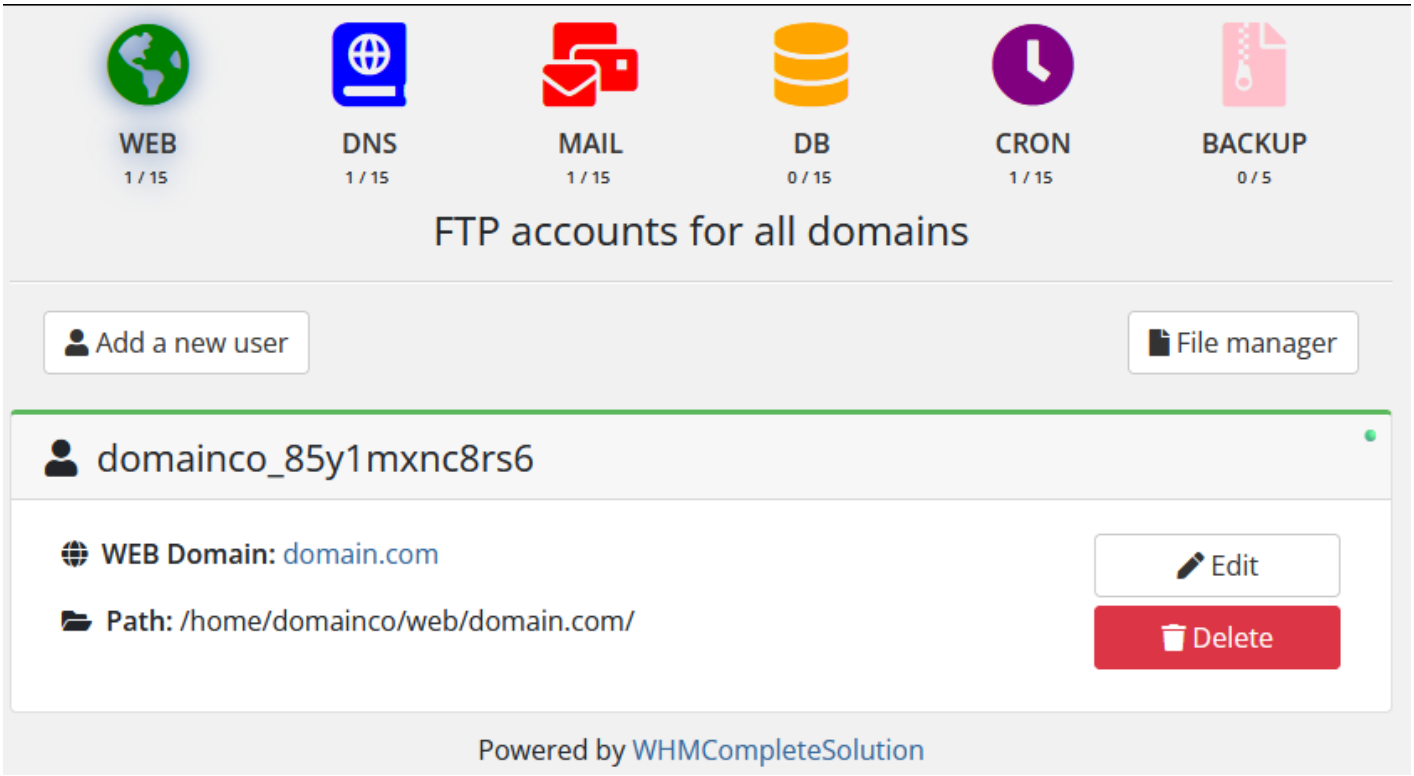
Order now | Download | FAQ

1. Simple configuration of FTP users

The end client, having entered the FTP user management section of the client panel, has access to the following information and parameters:

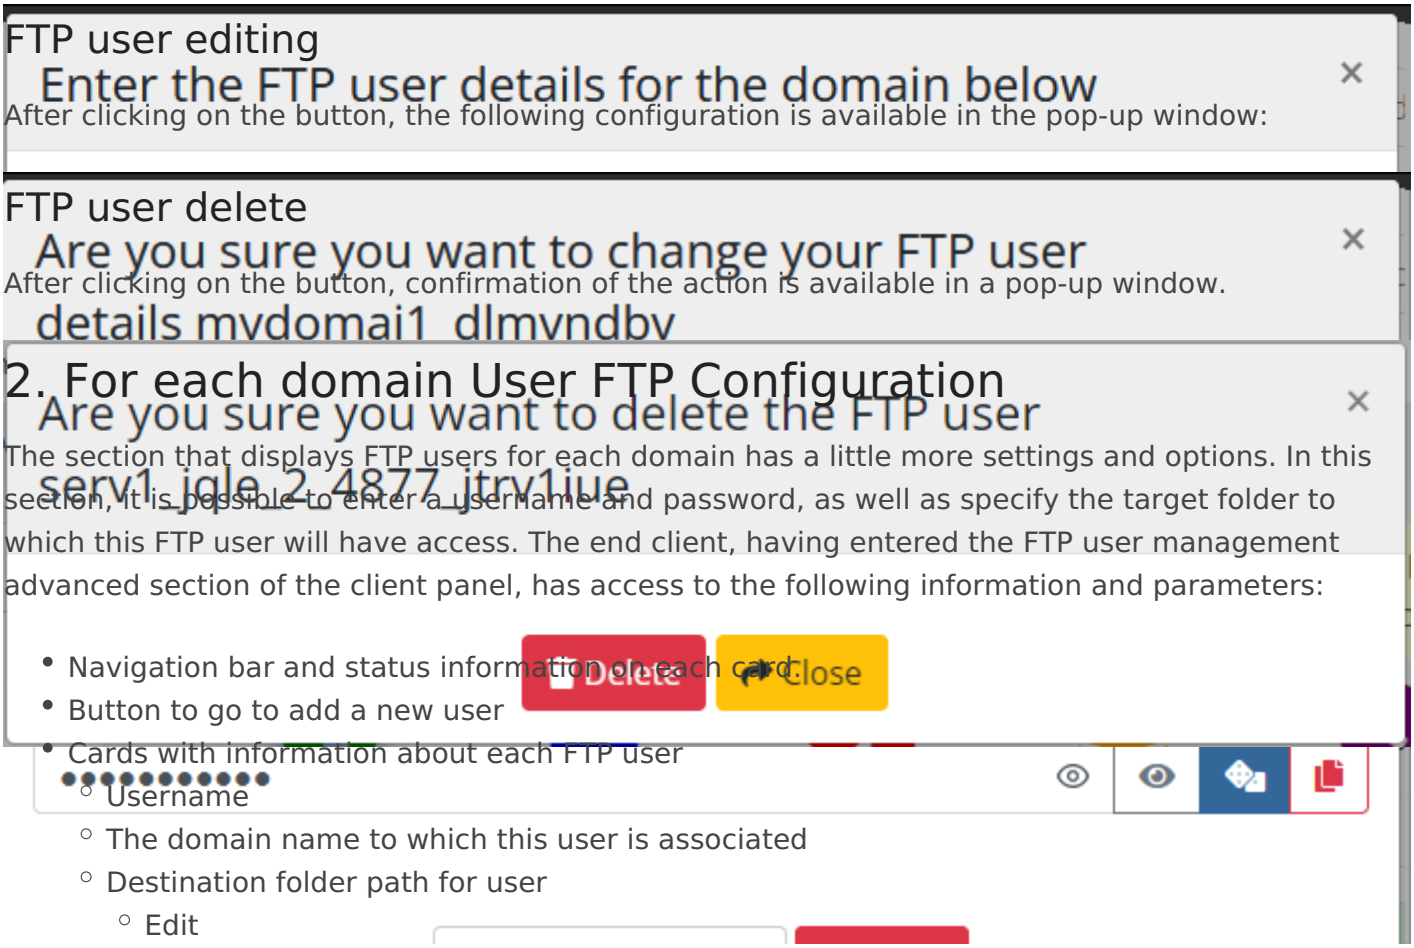
- Navigation bar and status information on each card.
- Button to go to add a new user
- Button to go to File manager
- Cards with information about each FTP user
  - Username
  - Domain name status to which this user is associated in the system HestiaCP is suspended or not suspended (Active)
  - The domain name to which this user is associated
  - Link to go to the site
  - Link to access users settings for a specific domain
  - IP Address
  - Buttons for managing FTP user
    - Edit
    - Delete

Attention! If the WEB domain is suspended, users of the domain name will also be suspended.

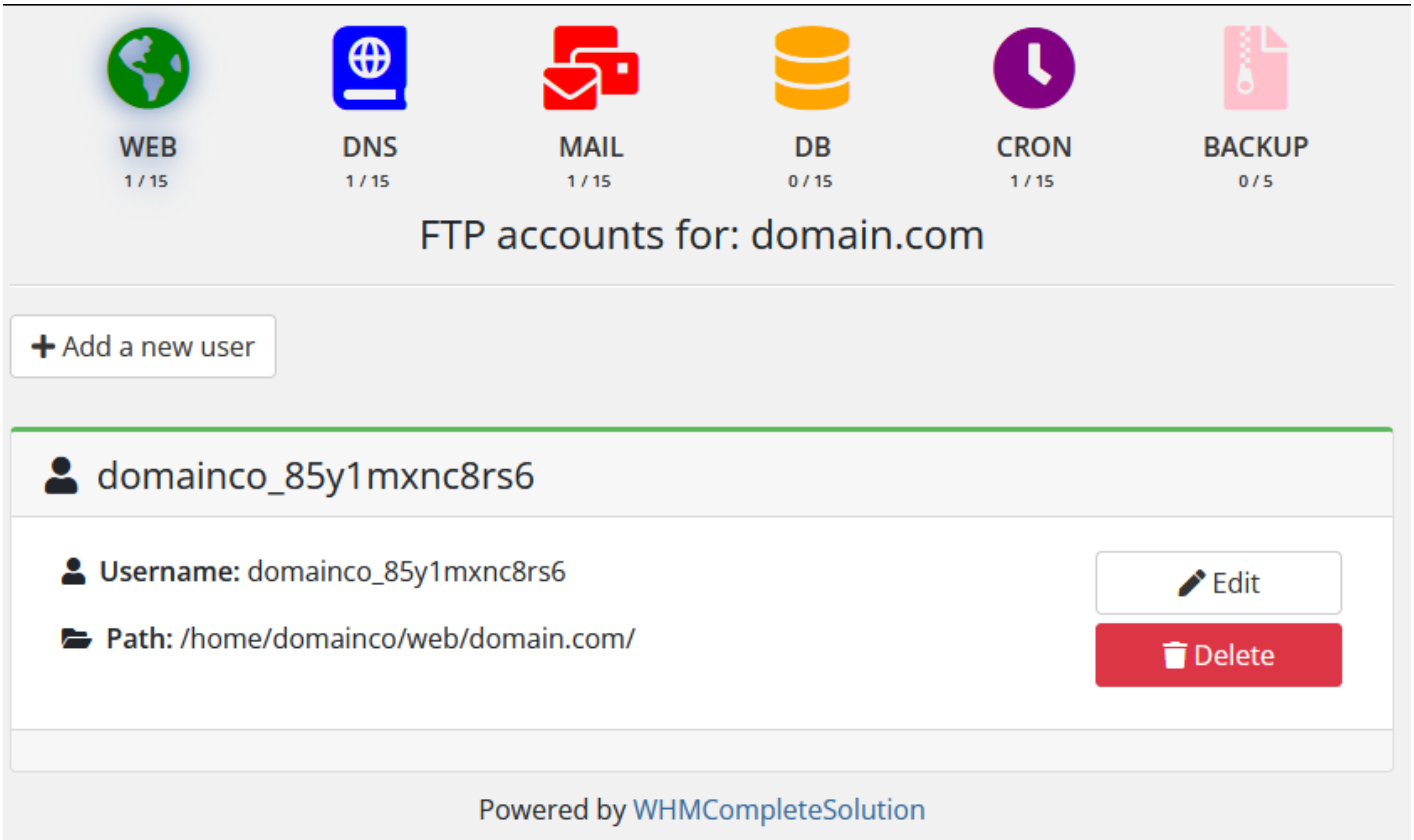


Adding a new FTP user

After clicking on the button in the pop-up window, you must select the domain name to which you want to add a new FTP user. The username and password will be randomly generated.



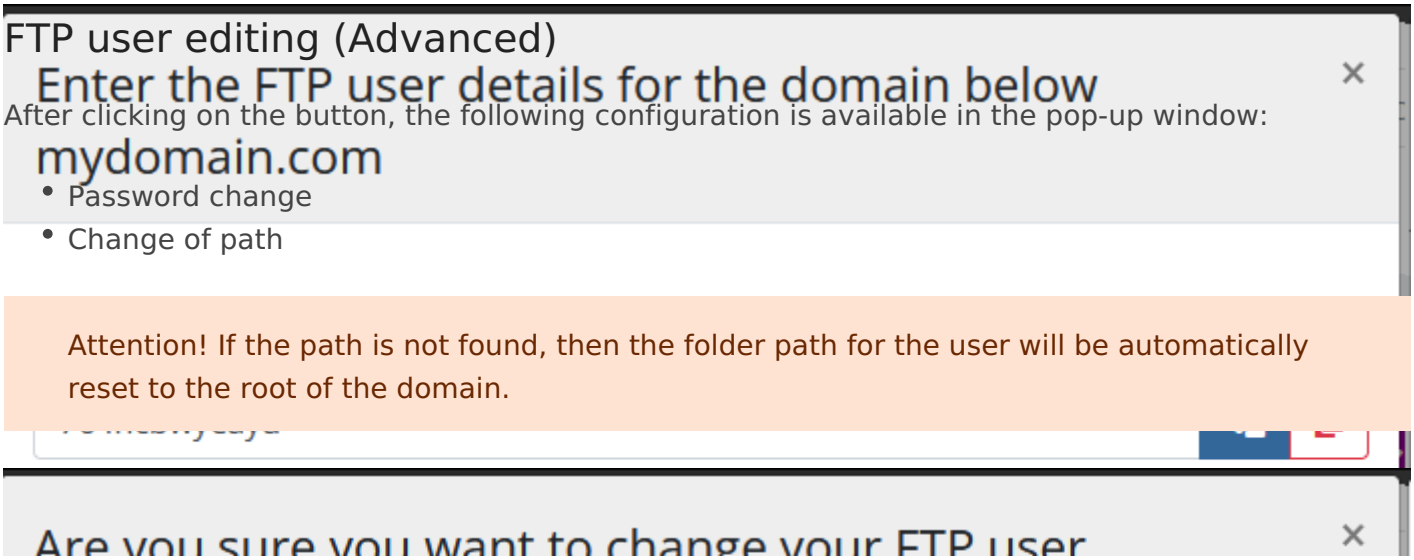
- Delete



Adding a new FTP user (Advanced)

After clicking on the button in the pop-up window, you must enter the username and password, as well as specify the final path (optional).

> Attention! If the folder does not exist, the user will not be able to connect to the system, so the entered path is checked for compliance, and if the path is not found, the user will be deleted immediately after the creation attempt.



FTP user editing (Advanced)

After clicking on the button, the following configuration is available in the pop-up window:

- Password change
- Change of path

> Attention! If the path is not found, then the folder path for the user will be automatically reset to the root of the domain.

FTP user delete (Advanced)

After clicking on the button, confirmation of the action is available in a pop-up window.
