Business-VPN module **WHMCS**

Order now | Download | FAQ

Basic information on client panel page

VPN server: The VPN server address that is entered when creating a VPN connection for the end user

Dedicated IP: The public IP address that is reserved for the service and through which all users of the VPN service will be represented on the Internet.

Private internal network: Private subnet whose IP addresses are available to the client to create VPN accounts. When adding a new VPN account, it will be assigned an IP address from this internal pool of addresses.

VPN Protocols: VPN protocols that are available *(by default you can easly enable two protocols in Mikrotik router: PPPtP i L2TP*)

L2TP IPSec PSK key: In the case of L2TP, this is the encryption key

Number of VPN accounts: Number of used and available VPN client accounts from the pool available based on the defined package.

Bandwidtht download/upload: The bandwidth rate that will be available on each VPN client account

Function buttons for service management.

- **Add VPN account:** To create a new VPN account
- **Port Forwarding:** To configure port forwarding from a public IP address to a private one
- **Statistics:** To access connection statistics of VPN

List of VPN accounts with technical/dynamic data and also buttons **Edit** and **Reset connections**

Add VPN account

Business-VPN module **WHMCS**

Order now | Download | FAQ

This is how the page for adding a new VPN account looks like.

> Each VPN account has a unique client ID, the ID is generated according to the scheme <user_id>-<service_id>-Manually entered value. <user_id>-<service_id> are generated automatically by module. You can modify manually the last part.

To create a new account, the client must enter the following.

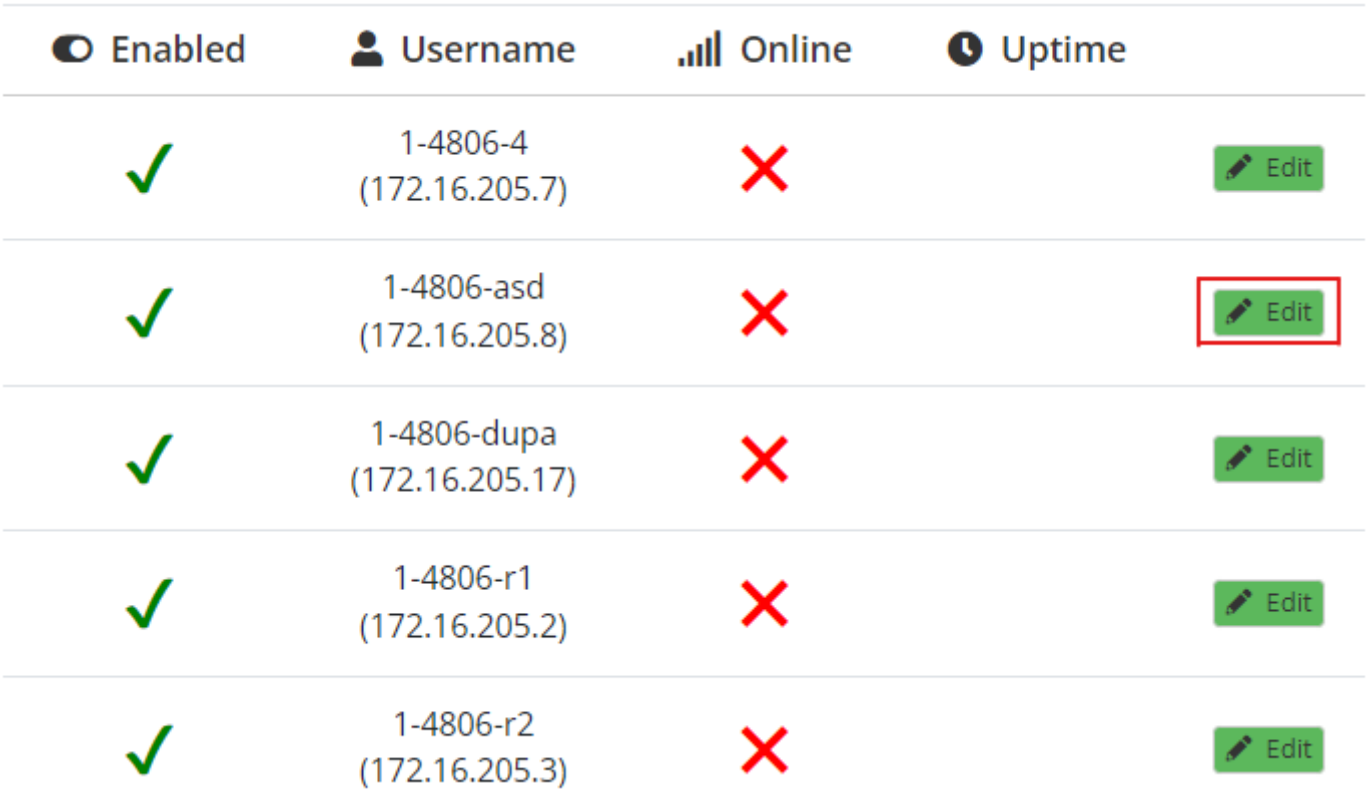

Username, Password, Select an available IP address from the dropdown list. Then click the **Add VPN account** button.

Edit VPN account

Business-VPN module **WHMCS**

Order now | Download | FAQ

In order to edit a VPN account, you must click on the **Edit** button on the selected account.

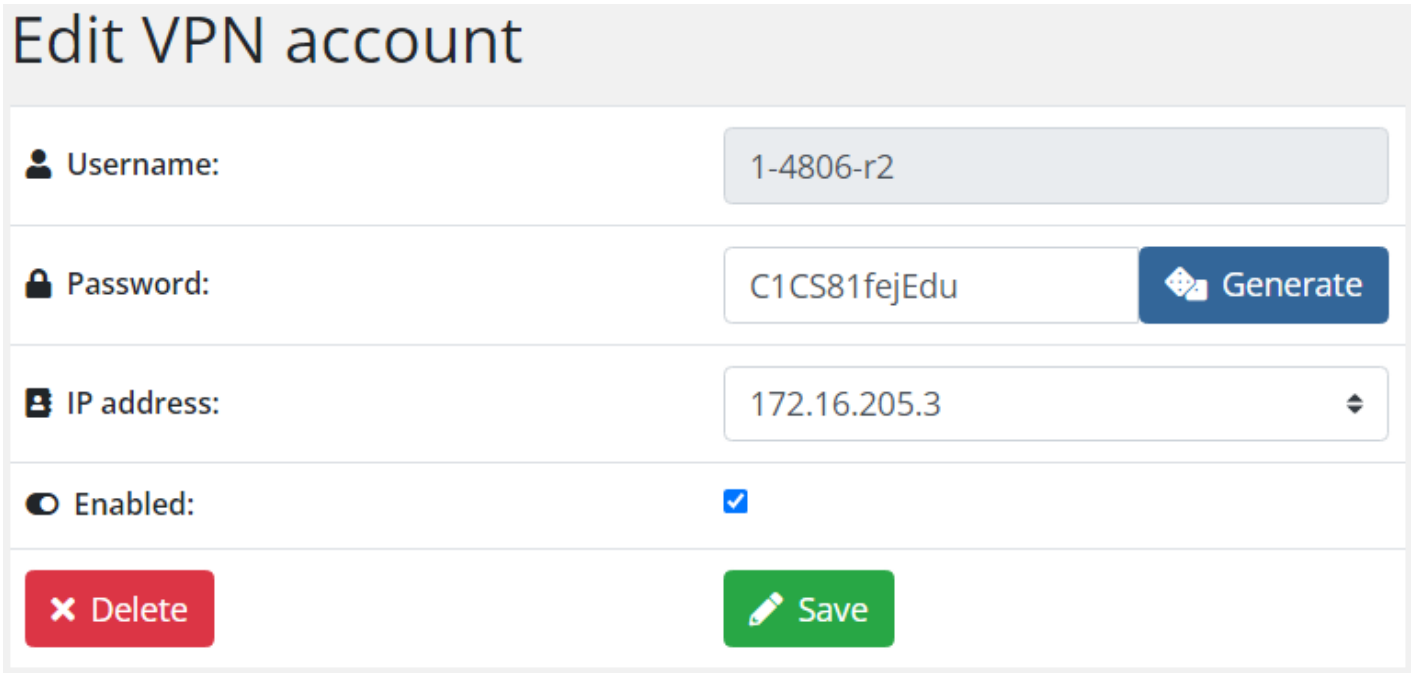

You can edit the following parameters:

- Password
- IP address
- Enable/Disable VPN account

Also on the editing page there is an opportunity to delete a VPN

account.
By pressing the DELETE button

Statistics

Business-VPN module **WHMCS**
