## Business-VPN module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

### Basic information on client panel page

**VPN server:** The VPN server address that is entered when creating a VPN connection for the end user

**Dedicated IP:** The public IP address that is reserved for the service and through which all users of the VPN service will be represented on the Internet.

**Private internal network:** Private subnet whose IP addresses are available to the client to create VPN accounts. When adding a new VPN account, it will be assigned an IP address from this internal pool of addresses.

**VPN Protocols:** VPN protocols that are available (*by default you can easily enable two protocols in Mikrotik router: PPtP i L2TP* )

**L2TP IPsec PSK key:** In the case of L2TP, this is the encryption key

**Number of VPN accounts:** Number of used and available VPN client accounts from the pool available based on the defined package.

**Bandwidth download/upload:** The bandwidth rate that will be available on each VPN client account

### Function buttons for service management.

- **Add VPN account:** To create a new VPN account
- **Port Forwarding:** To configure port forwarding from a public IP address to a private one
- **Statistics:** To access connection statistics of VPN

List of VPN accounts with technical/dynamic data and also buttons **Edit** and **Reset connections**
