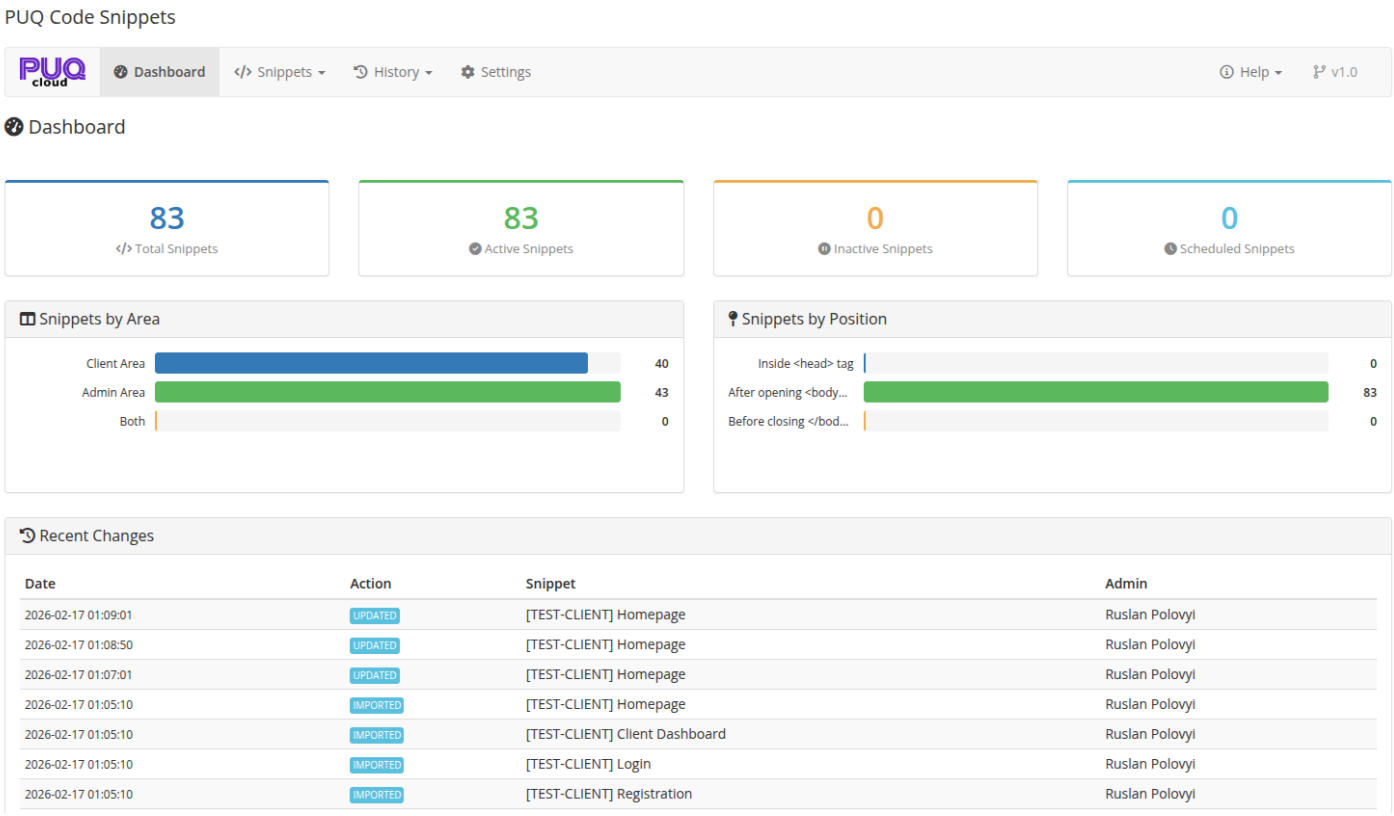
# Dashboard

## Code Snippets addon **WHMCS**

Order now | Download | FAQ

The Dashboard is the home page of the module, available at: **Addons** > **PUQ Code Snippets** > **Dashboard**

It provides a complete overview of all your code snippets — key metrics, distribution charts, and a log of recent changes.



*02-dashboard.png*

---

# Key Metrics

The top section displays four summary cards:

| Metric | Description |
|---|---|
| **Total Snippets** | Total number of snippets in the system |
| **Active Snippets** | Snippets that are currently enabled and will be injected |
| **Inactive Snippets** | Snippets that are disabled |
| **Scheduled Snippets** | Snippets with a future start date or an active date range |

---

# Snippets by Area

A horizontal bar chart showing the distribution of snippets across target areas:

- **Client Area** — snippets targeting only the client-facing pages
- **Admin Area** — snippets targeting only the admin panel
- **Both** — snippets targeting both areas

---

# Snippets by Position

A horizontal bar chart showing the distribution by injection position:

- **Inside <head> tag** — CSS, meta tags, analytics scripts
- **After opening <body>** — top banners, GTM noscript blocks
- **Before closing </body>** — chat widgets, tracking pixels, JavaScript

---

# Recent Changes

A table showing the latest snippet modifications:

| Column | Description |
|---|---|
| **Date** | Timestamp of the change |
| **Action** | Type of change: Created, Updated, Deleted, Toggled, Restored, Imported |
| **Snippet** | Name of the affected snippet |

| Column | Description |
| --- | --- |
| **Admin** | Administrator who made the change |

This section helps you quickly see what's been modified recently without navigating to the full History page.

---

# Kill Switch Warning

If the kill switch is active (via database setting or flag file), a prominent red alert banner appears at the top of the dashboard warning that all snippets are currently disabled. See Settings for details on the kill switch.
