Snippets

Code Snippets addon **WHMCS**

Order now | Download | FAQ

The Snippets section is available at: **Addons** > **PUQ Code Snippets** > **Snippets**

This is where you manage all your code snippets — view, filter, create, edit, toggle, duplicate, and delete.

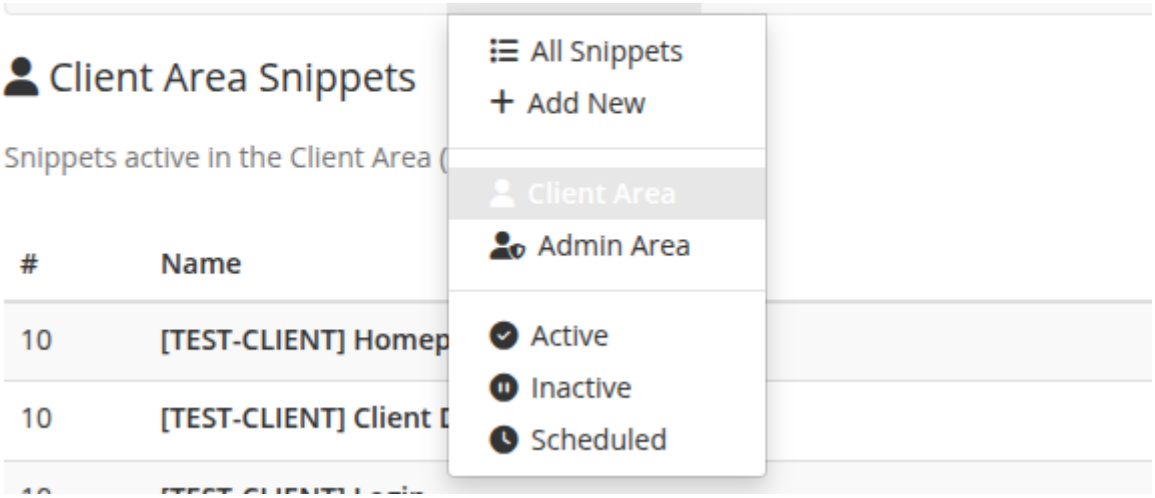
Navigation Menu

The Snippets dropdown menu provides quick access to filtered views:



06-snippets-menu.png

Menu Item	Description
All Snippets	Show all snippets regardless of area or status
Add New	Create a new snippet
Client Area	Show only snippets targeting the Client Area
Admin Area	Show only snippets targeting the Admin Area
Active	Show only enabled snippets
Inactive	Show only disabled snippets
Scheduled	Show only snippets with scheduling configured

Snippets List

The main table displays all snippets with sortable columns:

Column	Description
#	Priority number (lower = rendered first)
Status icon	Color indicator — enabled or disabled
Name	Snippet name and description
Position	Injection position: Head, After, Before
Area	Target area badge: CLIENT (blue), ADMIN (green), BOTH (purple)
User Targeting	Who sees the snippet: All, Logged-in, Guests, Client Group

Column	Description
Schedule	Date range or "Always" if no schedule is set
Status	ENABLED (green) or DISABLED (grey) badge
Actions	Action buttons (see below)

Actions

Each snippet has three action buttons:

Button	Description
Edit (pencil icon)	Open the snippet editor
Toggle (power icon)	Enable/disable the snippet with one click
Delete (trash icon)	Delete the snippet (with confirmation dialog)

Search

Use the search field in the top-right corner to filter snippets by name or description. The search works client-side and filters the table in real time.

Add New Snippet

Click the **+ Add New** button to open the snippet editor and create a new snippet. See Snippet Editor for details on all available settings.
