Reindex agreements dates

In the system, the parameters of the contract, such as **Commitment Date**, **Expiry Date**, **Notice Period**, **Indefinite Period**, can be changed with another document, e.g. an annex to the contract.

The entire process is automated and takes place automatically during each daily WHMCS crontab job.

For the compulsory indexing of contract dates.

Go to the **"Tools"** menu item and click "Reindex agreements dates".

As a result, a table appears with all the annexes that changed the parameters of the contract and the new parameters.
