Service/Product configuration

Digital Product module **WISECP**

Order now | Download | FAQ

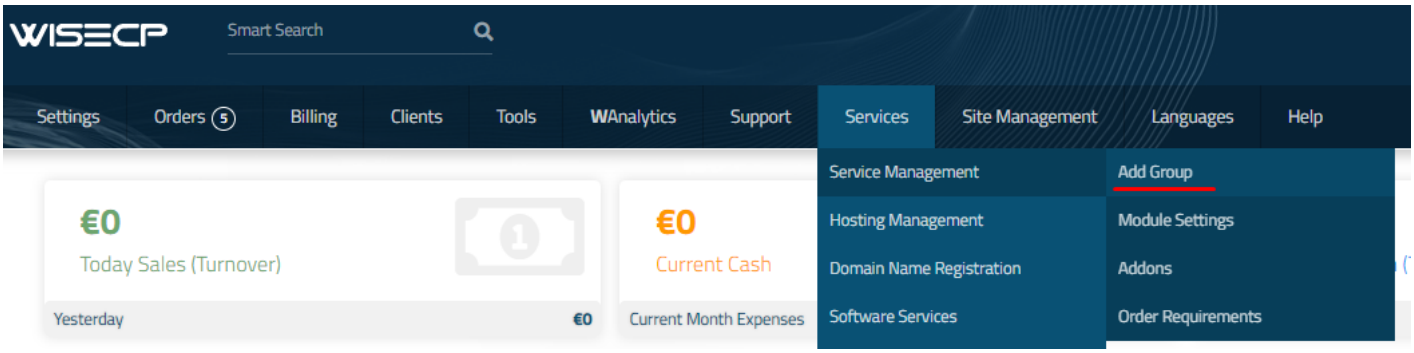

If you do not have a **Service Group** where you want to place the new service, you need to create a new **Service Group**

1. Log in to the administrative area of your **WISECP**.

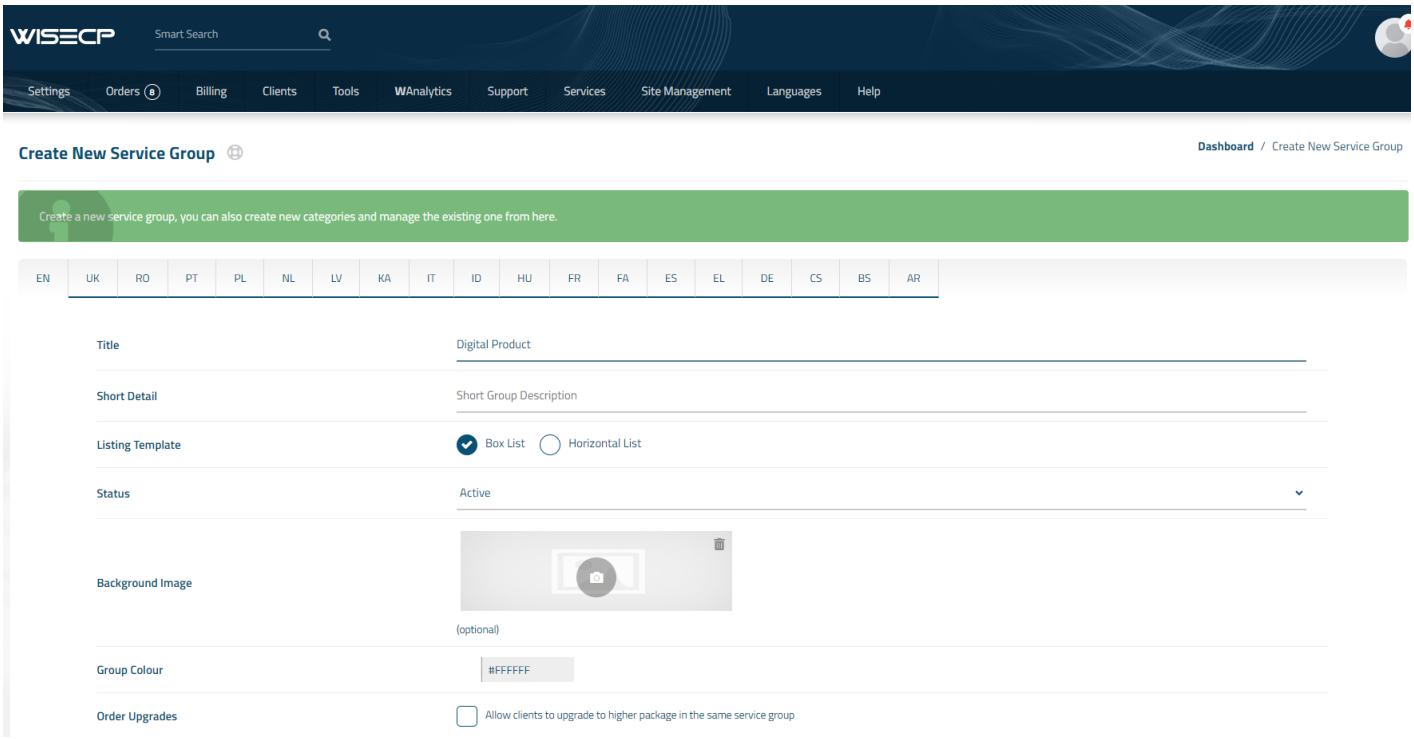

2. Create New Service Group

Go to

```
Services -> Service Management -> Add Group
```

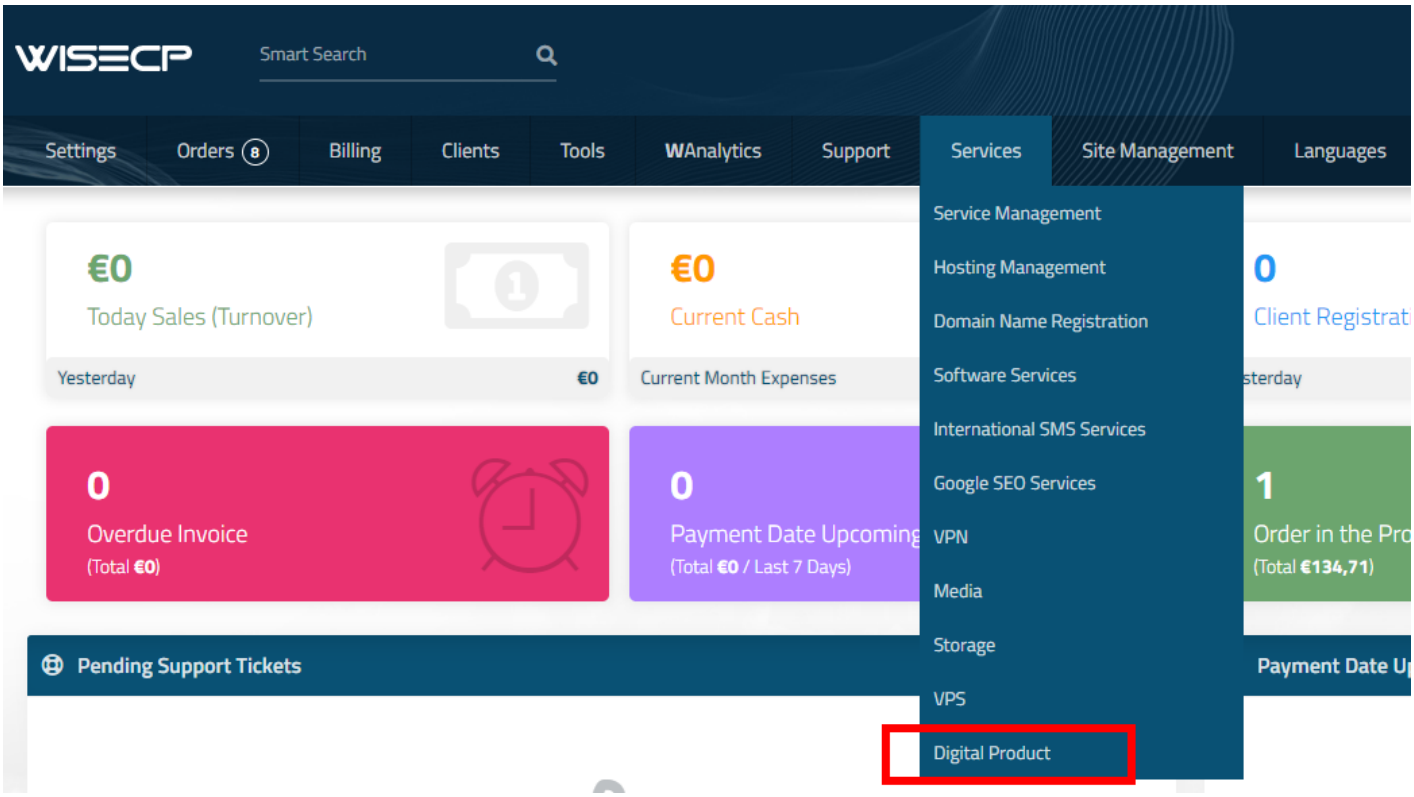

Enter all the necessary data and click the '**Create Group**' button.

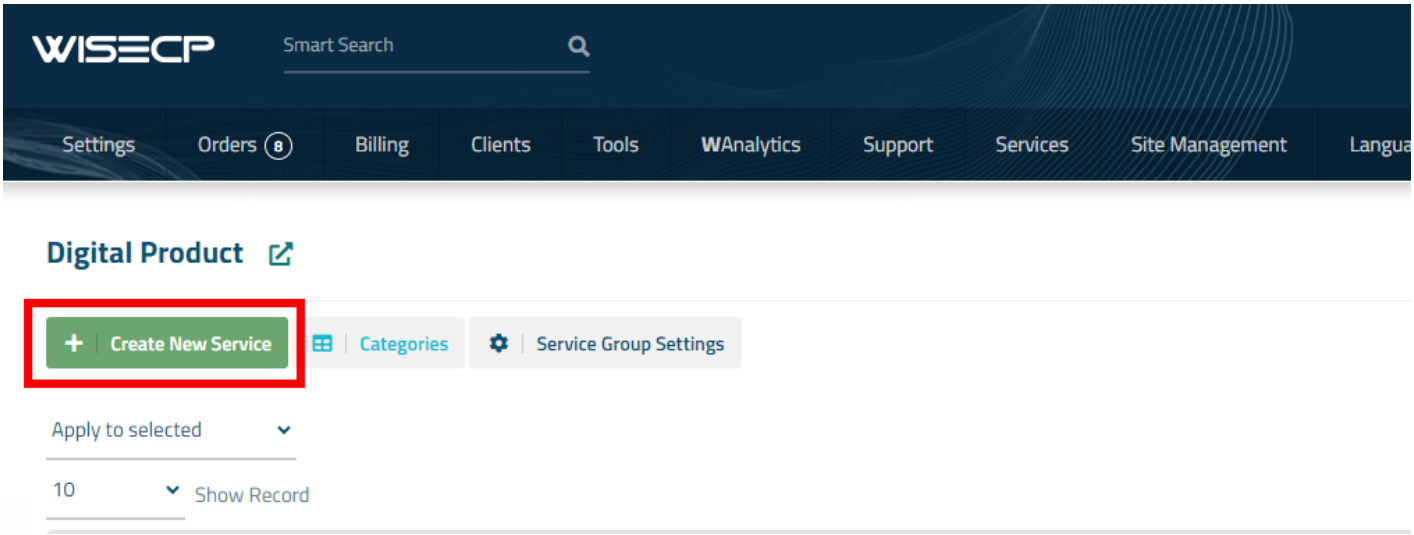

3. Adding a New Service

Go to

```
Services -> our service group where you need to add the new service.
```

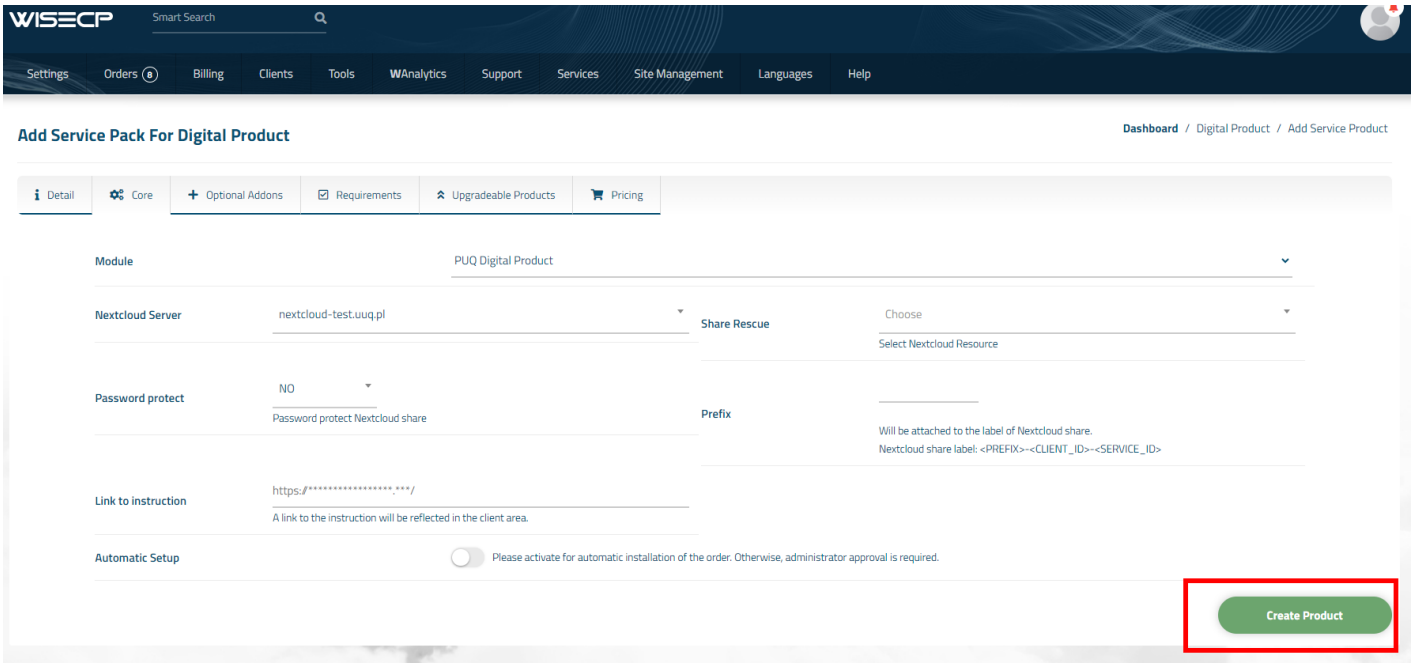

In the opened window, click the '**Create New Service**' button.

On the opened page, enter all the necessary details for your new service and navigate to the '**Core** ' tab.

Select the '**PUQ Digital Product**' module from the drop-down list of modules.

4. Fill in the configuration options according to your preferences.

- **Nextcloud Server** Select from the drop-down list the server on which you have the Digital Product
- **Share Rescue: ATTENTION**: here the data is updated after saving, you must save the product before making a choice here, select a folder on the server and save the changes.
- **Password protect:** If you need to protect the shared resource with a password, select YES
- **Prefix:** The prefix is required to identify the client's shared link. An entry with the structure <PREFIX>-<CLIENT_ID>-<SERVICE_ID> will be added to the description of the shared link on the nextcloud server to facilitate searching if necessary
- **Link to instruction:** Link to the instruction, if filled out, it will be reflected in the client area
- **Automatic Setup:** Please activate for automatic installation of the order. Otherwise, administrator approval is required.
