

IP Access Control

Docker Grafana module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#) | [n8n](#)

In the client area, the client can configure access to their resource by entering allowed IP addresses in the appropriate section on the **Restrict by IP** page.

If no IP addresses are specified, access is open to all IP addresses.

The screenshot displays the PUQcloud client interface. At the top, the PUQcloud logo is on the left, and a search bar and user profile (Hello, ruslan!) are on the right. Below the header is a navigation menu with links: Home, Services, Domains, Billing, Support, and Open Ticket. A breadcrumb trail reads: Portal Home / Client Area / My Products & Services / Product Details. On the left side, a sidebar menu contains: Overview (with a star icon and an upward arrow), Information, Restrict by IP (highlighted with a red box), and Reinstall (with a circular arrow icon). The main content area is titled 'IP Access Control' and includes the text 'If IP is not specified, access is not limited'. Below this, the URL 'https://1-5342.d01-test.uuq.pl' is shown. A section labeled 'WEB:' with a person icon is followed by a text input field with the placeholder 'Enter allowed IPs, one per line'. At the bottom of this section is a blue 'Save' button. The footer of the interface states 'Powered by WHMCompleteSolution'.
