

IP Access Control

Docker Grafana module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#) | [n8n](#)

In the client area, the client can configure access to their resource by entering allowed IP addresses in the appropriate section on the **Restrict by IP** page.

If no IP addresses are specified, access is open to all IP addresses.

The screenshot displays the PUQcloud client interface. At the top, the PUQcloud logo is on the left, and a search bar and user profile (Hello, ruslan!) are on the right. Below the header is a navigation menu with links: Home, Services, Domains, Billing, Support, and Open Ticket. A breadcrumb trail reads: Portal Home / Client Area / My Products & Services / Product Details. On the left side, a sidebar menu contains: Overview (with a star icon), Information, Restrict by IP (highlighted with a red box), and Reinstall. The main content area is titled 'IP Access Control' and includes the text 'If IP is not specified, access is not limited'. Below this, the URL 'https://1-5342.d01-test.uuq.pl' is shown. A section labeled 'WEB:' features a text input field with the placeholder 'Enter allowed IPs, one per line'. At the bottom of this section is a 'Save' button. The footer of the interface states 'Powered by WHMCompleteSolution'.
