

IP Access Control

Docker Grafana module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#) | [n8n](#)

In the client area, the client can configure access to their resource by entering allowed IP addresses in the appropriate section on the **Restrict by IP** page.

If no IP addresses are specified, access is open to all IP addresses.

The screenshot displays the WHMCS client interface. At the top left is the PUQcloud logo. A navigation menu includes Home, Services, Domains, Billing, Support, and Open Ticket. A search bar and a user profile dropdown (Hello, ruslan!) are on the right. The breadcrumb trail reads: Portal Home / Client Area / My Products & Services / Product Details. A sidebar on the left contains: Overview, Information, Restrict by IP (highlighted with a red box), and Reinstall. The main content area is titled 'IP Access Control' with the subtitle 'If IP is not specified, access is not limited'. Below this, the URL 'https://1-5342.d01-test.uuq.pl' is shown. A 'WEB:' label is next to a text input field with the placeholder 'Enter allowed IPs, one per line'. A 'Save' button is at the bottom, and the footer text reads 'Powered by WHMCompleteSolution'.
