

Metric Billing

Docker Grafana module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#) | [n8n](#)

To bill certain metrics separately, you can use the standard WHMCS Metric Billing mechanism.

To configure it, you need to enable the required metrics and set the desired prices. Metrics work based on the standard WHMCS mechanism, the description of which can be found here:

Details Pricing Module Settings Custom Fields Configurable Options Upgrades Free Domain Cross-sells Other Links

The screenshot shows the WHMCS 'Edit Product' configuration page. At the top, there are tabs for 'Details', 'Pricing', 'Module Settings', 'Custom Fields', 'Configurable Options', 'Upgrades', 'Free Domain', 'Cross-sells', 'Other', and 'Links'. The 'Module Settings' tab is active. Below the tabs, there are several sections for configuring product options. At the bottom of the page, a red box highlights the 'Metric Billing' section. This section contains two toggle switches: 'Traffic IN (GB)' and 'Traffic OUT (GB)'. Both switches are currently set to 'ON'. Below each toggle switch is a link that says 'Configure Pricing'. In the bottom right corner of the configuration area, there is a link that says 'Switch to Advanced Mode'.
