

# IP Access Control

## Docker Immich module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#) | [n8n](#)

In the client area, the client can configure access to their resource by entering allowed IP addresses in the appropriate section on the **Restrict by IP** page.

If no IP addresses are specified, access is open to all IP addresses.

The screenshot displays the PUQcloud client interface. At the top, the PUQcloud logo is on the left, and a search bar and user profile (Hello, ruslan!) are on the right. Below the navigation bar, a breadcrumb trail reads: Portal Home / Client Area / My Products & Services / Product Details. On the left sidebar, the 'Restrict by IP' option is highlighted with a red box. The main content area is titled 'IP Access Control' with the subtitle 'If IP is not specified, access is not limited'. It shows a URL 'https://1-5342.d01-test.uuq.pl' and a text input field labeled 'Enter allowed IPs, one per line'. A 'Save' button is at the bottom right of the input field. The footer of the interface states 'Powered by WHMCompleteSolution'.
