## Client Area Overview - Logical Structure

The **main screen** of the client area is divided into **three logical sections**:

1. **Navigation Block**
  - **"Go to InfluxDB"**: Direct link to access the application.
  - **"User Manual"**: Opens the official documentation or user guide.
2. **Resource Usage Block**
  - Displays real-time statistics on container resource usage:
    - **CPU Usage**: Number of allocated CPUs and current load.
    - **Memory Usage**: RAM consumption, helping clients understand available capacity.
    - **Disk Usage**: Storage consumption within the container.
  - This section is crucial for users to **monitor performance** and determine whether they need to **upgrade their package**.
3. **Application Information & Controls**
  - **Application Version**: Displays the installed software version.
  - **Owner Information**: Indicates the primary administrator of the application.
  - **User List**: Shows active users associated with the instance.
  - **Reset Password Button**: Allows the client to reset the administrator password for the application.

This **clear structure** ensures that users have **quick access** to their application, **real-time monitoring** of resource usage, and **essential management functions** in one place.

# IP Access Control

## Docker InfluxDB module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#) | [n8n](#)

In the client area, the client can configure access to their resource by entering allowed IP addresses in the appropriate section on the **Restrict by IP** page.

If no IP addresses are specified, access is open to all IP addresses.

The screenshot displays the PUKcloud client interface. At the top, the PUKcloud logo is on the left, and a search bar and user profile (Hello, ruslan!) are on the right. A navigation menu includes Home, Services, Domains, Billing, Support, and Open Ticket. Below this, a breadcrumb trail reads: Portal Home / Client Area / My Products & Services / Product Details.

On the left side, a sidebar menu contains: Overview (with a star icon), Information, Restrict by IP (highlighted with a red box), and Reinstall (with a refresh icon).

The main content area is titled "IP Access Control" and includes the text: "If IP is not specified, access is not limited". Below this, the URL "https://1-5342.d01-test.uuq.pl" is displayed. A section labeled "WEB:" with a user icon is followed by a large text input field with the placeholder "Enter allowed IPs, one per line". A blue "Save" button is positioned below the input field.

At the bottom of the main content area, it says "Powered by WHMCompleteSolution".

# Reinstall

## Docker InfluxDB module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#) | [n8n](#)

The client has the option to **fully reinstall the application**, which will result in **complete data loss**.

This action can be performed on the **Reinstall** page, which also includes **protection against accidental reinstallation**.
