

IP Access Control

Docker InfluxDB module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#) | [n8n](#)

In the client area, the client can configure access to their resource by entering allowed IP addresses in the appropriate section on the **Restrict by IP** page.

If no IP addresses are specified, access is open to all IP addresses.

The screenshot shows the WHMCS client area interface. At the top left is the PUQcloud logo. To the right is a search bar and a shopping cart icon. Below the logo is a navigation menu with links for Home, Services, Domains, Billing, Support, and Open Ticket. The user is logged in as 'ruslan!'. The breadcrumb trail is: Portal Home / Client Area / My Products & Services / Product Details. On the left sidebar, there is a menu with 'Overview', 'Information', 'Restrict by IP' (highlighted with a red box), and 'Reinstall'. The main content area is titled 'IP Access Control' and contains the text 'If IP is not specified, access is not limited'. Below this is the URL 'https://1-5342.d01-test.uuq.pl'. There is a 'WEB:' label next to a text input field with the placeholder 'Enter allowed IPs, one per line'. At the bottom of the form is a 'Save' button. The footer of the page says 'Powered by WHMCompleteSolution'.
