Product Configuration

Docker InfluxDB module **WHMCS**

Order now | Download | FAQ | n8n

Add new product to WHMCS

```
System Settings->Products/Services->Create a New Product
```

In the **Module settings** section, select the **"PUQ Docker InfluxDB"** module

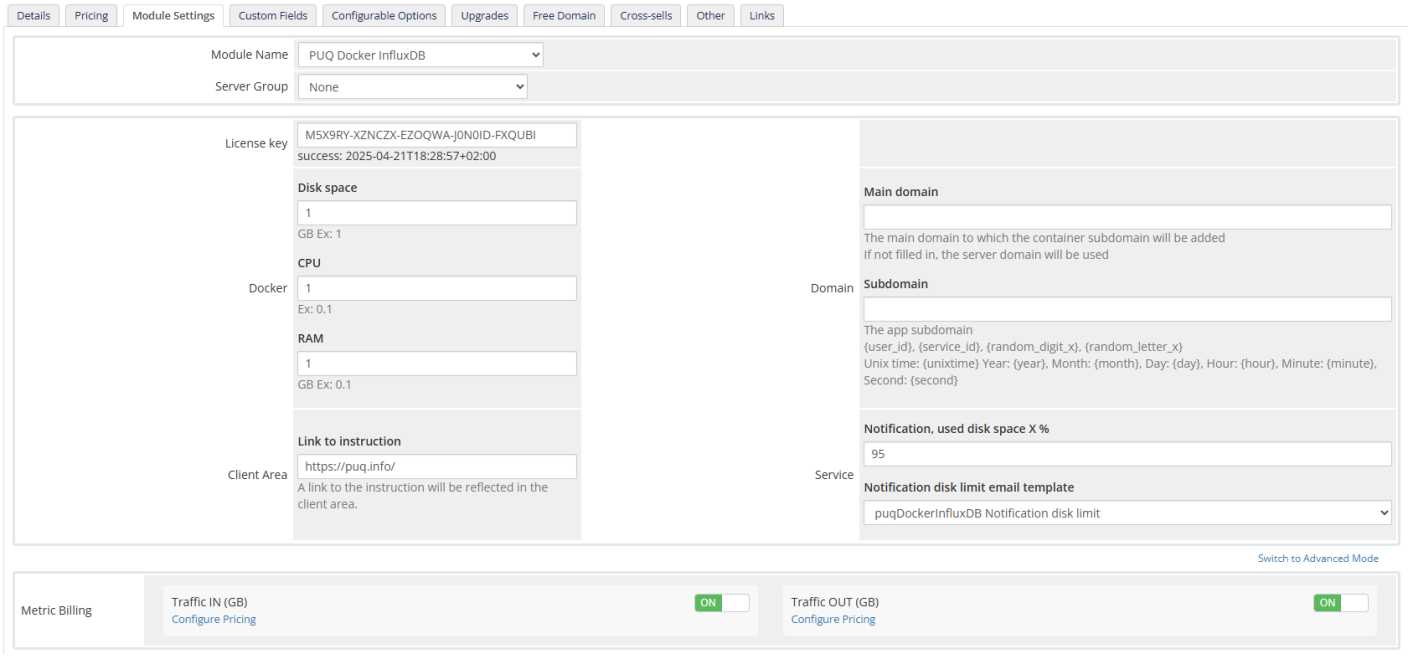

- **License key –** A pre-purchased license key for the **"PUQ Docker InfluxDB"** module. For the module to work correctly, the key must be active
- **Disk space** – defines the allocated disk size for the Docker container.
- **CPU** – sets the CPU usage limit for the Docker container.
- **RAM** – specifies the amount of RAM allocated to the Docker container.
- **Link to instruction** – URL to a guide that will be displayed in the client panel if provided.
- **Main domain** – defines the primary domain for the web interface of the application. If not set, the main domain will be taken from the **hostname** parameter in the server settings.
- **Subdomain** – a personal subdomain assigned to each service. If left empty or if the subdomain is already taken, it will be automatically generated in the format **{user_id}-{service_id}**.
-

Supported Macros for **App Subdomain**:

  - **{user_id}** – Client ID
  - **{service_id}** – Service ID
  - **{random_digit_x}** – Random number (x defines the length)
  - **{random_letter_x}** – Random letter (x defines the length)
  - **{unixtime}** – Unix timestamp
  - **{year}, {month}, {day}, {hour}, {minute}, {second}** – Date and time values
- **Notification, used disk space X %** – The percentage value that sets the threshold for

the container's disk space usage will trigger a notification message to the client once the threshold is reached.

- **Notification disk limit email template** – The email template for the notification that will be sent when the threshold is reached.
