# Product Information

## Docker MinIO module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#) | [n8n](#)

## Admin Panel — Container Management Overview

The **admin panel** is structured into two main sections with additional control buttons for container management.

### Module Commands

- **Create** — Provision a new MinIO container
- **Suspend** — Suspend the service
- **Unsuspend** — Reactivate the service
- **Terminate** — Remove the service
- **Change Package** — Update the service package
- **Container Start** — Start the Docker container
- **Container Stop** — Stop the Docker container
- **Mount Disk** — Attach the container's disk to the host system (modifies fstab)
- **Unmount Disk** — Detach the container's disk from the host system

### API Connection Status

Displays the current connection status to the n8n workflow API endpoint.

## Container Status & Resource Monitoring

Field	Description
<b>Status</b>	Current state of the container (Running / Stopped)

Field	Description
<b>Name</b>	Unique identifier and domain of the container
<b>CPU Usage</b>	Current CPU load with progress bar
<b>Memory Usage</b>	RAM consumption in real-time with progress bar
<b>Disk IO</b>	Disk input/output operations
<b>Disk Mounted</b>	Mounted disk usage with progress bar
<b>Disk File</b>	Actual disk image size
<b>Network IO</b>	Network traffic statistics

Additional controls:

- **Refresh** button — Reload container status data
- **Log** button — Load and display the container logs for debugging and monitoring

## Application Information

Field	Description
<b>Version</b>	Installed MinIO version
<b>Users</b>	List of assigned users with access to the application

## Metric Statistics

Metric	Description
<b>Traffic IN (GB)</b>	Incoming network traffic
<b>Traffic OUT (GB)</b>	Outgoing network traffic
