Client Area Overview — Logical Structure

The **main screen** of the client area is divided into **three logical sections**:

1. **Navigation Block**
   - **"User Manual"**: Opens the official documentation or user guide (link configured by administrator).
2. **Connection Details Block**
   - **Web Console**: Direct link to access the MinIO web console with copy button.
   - **REST API**: Link to the MinIO REST API endpoint with copy button.
   - **Username**: MinIO account username with copy button.
   - **Password**: MinIO account password with show/hide toggle and copy button.
   - **Change Administrator Password**: Button to reset the administrator password.
3. **Resource Usage Block**
   - Displays real-time statistics on container resource usage:
     - **Status**: Current container state (Running / Stopped / Paused).
     - **CPU Usage**: Number of allocated CPUs and current load.
     - **Memory Usage**: RAM consumption with progress bar.
     - **Disk Usage**: Storage consumption within the container with progress bar.
   - This section includes a **Refresh** button for real-time data updates.
4. **Application Information**
   - **Version**: Displays the installed MinIO version.
   - **Administrator**: Indicates the primary administrator of the application.
   - **Users**: Shows active users associated with the instance.

This **clear structure** ensures that users have **quick access** to their application, **real-time monitoring** of resource usage, and **essential management functions** in one place.

Sidebar Navigation

The client area sidebar provides quick access to:

- **Information** — Main service page with connection details and resource monitoring
- **Restrict by IP** — IP access control page
- **Reinstall** — Service reinstallation page

IP Access Control

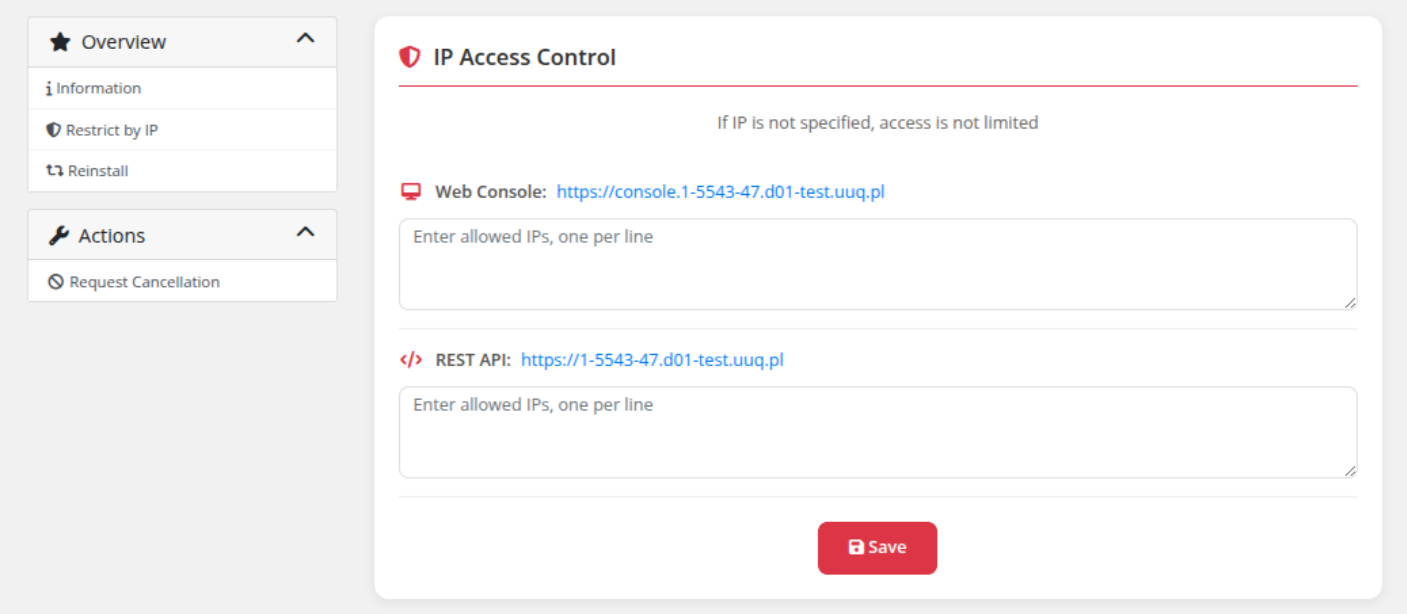

Docker MinIO module **WHMCS**

Order now | Download | FAQ | n8n

In the client area, the client can configure access to their resource by entering allowed IP addresses in the appropriate section on the **Restrict by IP** page.

If no IP addresses are specified, access is open to all IP addresses.

The page displays the service URLs (**Web Console** and **REST API**) and provides separate text areas for entering allowed IPs for each endpoint — one IP address per line.

Reinstall

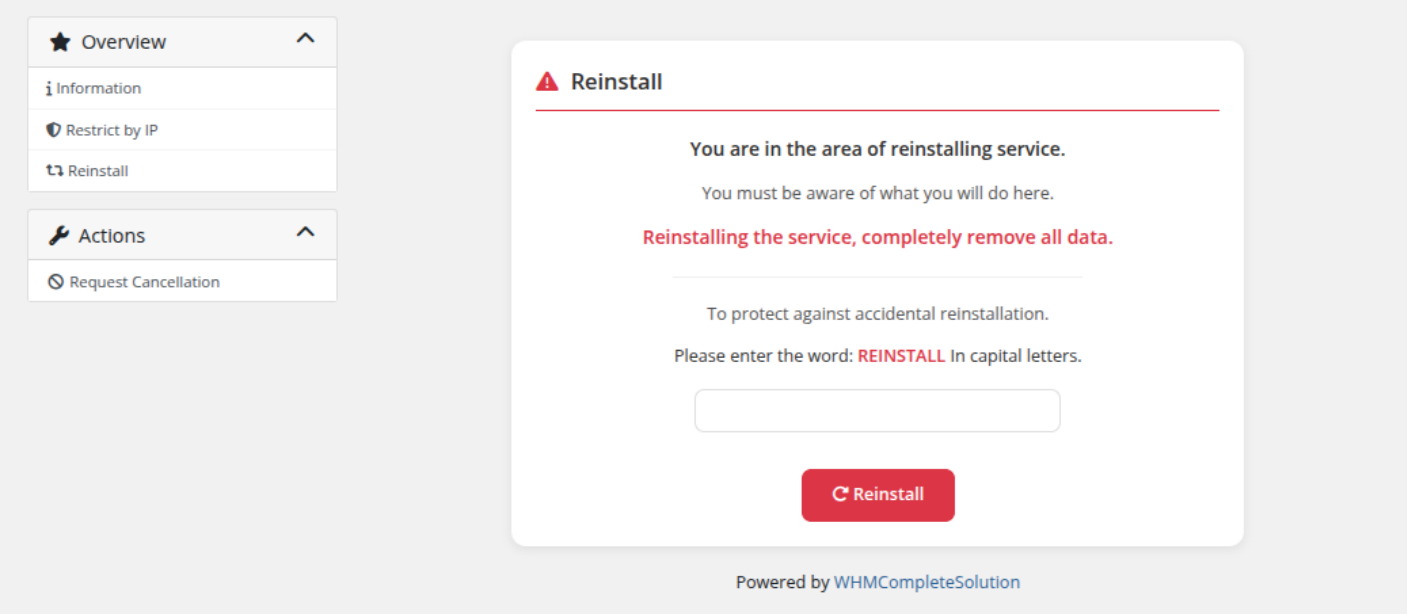

Docker MinIO module **WHMCS**

Order now | Download | FAQ | n8n

The client has the option to **fully reinstall the application**, which will result in **complete data loss**.

This action can be performed on the **Reinstall** page, which also includes **protection against accidental reinstallation**.

To proceed with the reinstall, the client must enter the word **REINSTALL** in capital letters and confirm the action.

Metrics

Docker MinIO module **WHMCS**

Order now | Download | FAQ | n8n

If you use metrics for application traffic billing, the **Metrics** tab will display the usage statistics for the metrics.

The following metrics are available:

Metric	Description
Traffic IN (GB)	Incoming network traffic in gigabytes
Traffic OUT (GB)	Outgoing network traffic in gigabytes

The Metrics tab is accessible from the client area navigation alongside the **Manage** tab.
