## Client Area Overview - Logical Structure

The **main screen** of the client area is divided into **three logical sections**:

### 1. Navigation Block

- **"Go to MinIO"**: Direct link to access the application.
- **"User Manual"**: Opens the official documentation or user guide.

### 2. Resource Usage Block

- Displays real-time statistics on container resource usage:
  - **CPU Usage**: Number of allocated CPUs and current load.
  - **Memory Usage**: RAM consumption, helping clients understand available capacity.
  - **Disk Usage**: Storage consumption within the container.
- This section is crucial for users to **monitor performance** and determine whether they need to **upgrade their package**.

### 3. Application Information & Controls

- **Application Version**: Displays the installed software version.
- **Owner Information**: Indicates the primary administrator of the application.
- **User List**: Shows active users associated with the instance.
- **Reset Password Button**: Allows the client to reset the administrator password for the application.

This **clear structure** ensures that users have **quick access** to their application, **real-time monitoring** of resource usage, and **essential management functions** in one place.

# IP Access Control

## Docker MinIO module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#) | [n8n](#)

In the client area, the client can configure access to their resource by entering allowed IP addresses in the appropriate section on the **Restrict by IP** page.

If no IP addresses are specified, access is open to all IP addresses.

The screenshot shows the 'IP Access Control' configuration page in WHMCS. On the left is a sidebar with a menu containing 'Overview', 'Information', 'Restrict by IP' (highlighted with a red box), and 'Reinstall'. The main content area has the title 'IP Access Control' and a subtitle 'If IP is not specified, access is not limited'. Below this, there are two sections: 'Web Console' and 'REST API'. Each section shows a URL and a text input field for allowed IP addresses. The 'Web Console' URL is 'https://console.1741969814.d01-test.uuq.pl' and the 'REST API' URL is 'https://1741969814.d01-test.uuq.pl'. Both input fields contain the placeholder text 'Enter allowed IPs, one per line'. At the bottom right is a 'Save' button, and at the bottom center is the text 'Powered by WHMCompleteSolution'.
