Client Area Overview - Logical Structure

The **main screen** of the client area is divided into **three logical sections**:

1. Navigation Block

- **"Go to n8n"**: Direct link to access the application.
- **"User Manual"**: Opens the official documentation or user guide.

2. Resource Usage Block

- Displays real-time statistics on container resource usage:
 - **CPU Usage**: Number of allocated CPUs and current load.
 - **Memory Usage**: RAM consumption, helping clients understand available capacity.
 - **Disk Usage**: Storage consumption within the container.
- This section is crucial for users to **monitor performance** and determine whether they need to **upgrade their package**.

3. Application Information & Controls

- **Application Version**: Displays the installed software version.
- **Owner Information**: Indicates the primary administrator of the application.
- **User List**: Shows active users associated with the instance.
- **Reset Password Button**: Allows the client to reset the administrator password for the application.

This **clear structure** ensures that users have **quick access** to their application, **real-time monitoring** of resource usage, and **essential management functions** in one place.

IP Access Control

Docker n8n module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#) | [n8n](#)

In the client area, the client can configure access to their resource by entering allowed IP addresses in the appropriate section on the **Restrict by IP** page.

If no IP addresses are specified, access is open to all IP addresses.

The screenshot displays the PUQcloud client interface. At the top, the PUQcloud logo is on the left, and a search bar and user profile (Hello, ruslan!) are on the right. A navigation menu includes Home, Services, Domains, Billing, Support, and Open Ticket. The breadcrumb trail reads: Portal Home / Client Area / My Products & Services / Product Details.

On the left sidebar, under the 'Information' section, the 'Restrict by IP' option is highlighted with a red rectangle. Other options include Overview, Reinstall, Actions, Upgrade/Downgrade, and Request Cancellation.

The main content area is titled 'IP Access Control' with the subtitle 'If IP is not specified, access is not limited'. Below this, the URL 'https://1-5336.app.d01-test.uuq.pl' is shown. Under the 'WEB:' section, a text box contains the IP addresses '77.87.125.1' and '77.87.125.3'. A 'Save' button is located at the bottom right of the configuration area. The footer indicates 'Powered by WHMCompleteSolution'.

Reinstall

Docker n8n module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#) | [n8n](#)

The client has the option to **fully reinstall the application**, which will result in **complete data loss**.

This action can be performed on the **Reinstall** page, which also includes **protection against accidental reinstallation**.
