

IP Access Control

Docker n8n module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#) | [n8n](#)

In the client area, the client can configure access to their resource by entering allowed IP addresses in the appropriate section on the **Restrict by IP** page.

If no IP addresses are specified, access is open to all IP addresses.

The screenshot displays the PUQcloud client interface. At the top, the PUQcloud logo is on the left, and a search bar and user profile (Hello, ruslan!) are on the right. Below the navigation bar (Home, Services, Domains, Billing, Support, Open Ticket), a breadcrumb trail reads: Portal Home / Client Area / My Products & Services / Product Details. The left sidebar contains a menu with 'Overview', 'Information', 'Restrict by IP' (highlighted with a red box), and 'Reinstall'. Under 'Actions', there are 'Upgrade/Downgrade' and 'Request Cancellation' options. The main content area is titled 'IP Access Control' with the subtitle 'If IP is not specified, access is not limited'. It shows a URL 'https://1-5336.app.d01-test.uuq.pl' and a 'WEB:' section with a text input field containing the IP addresses '77.87.125.1' and '77.87.125.3'. A 'Save' button is at the bottom right of the input field, and a footer note says 'Powered by WHMCompleteSolution'.
