Reinstall

Docker n8n module **WHMCS**

Order now | Download | FAQ | n8n

Overview

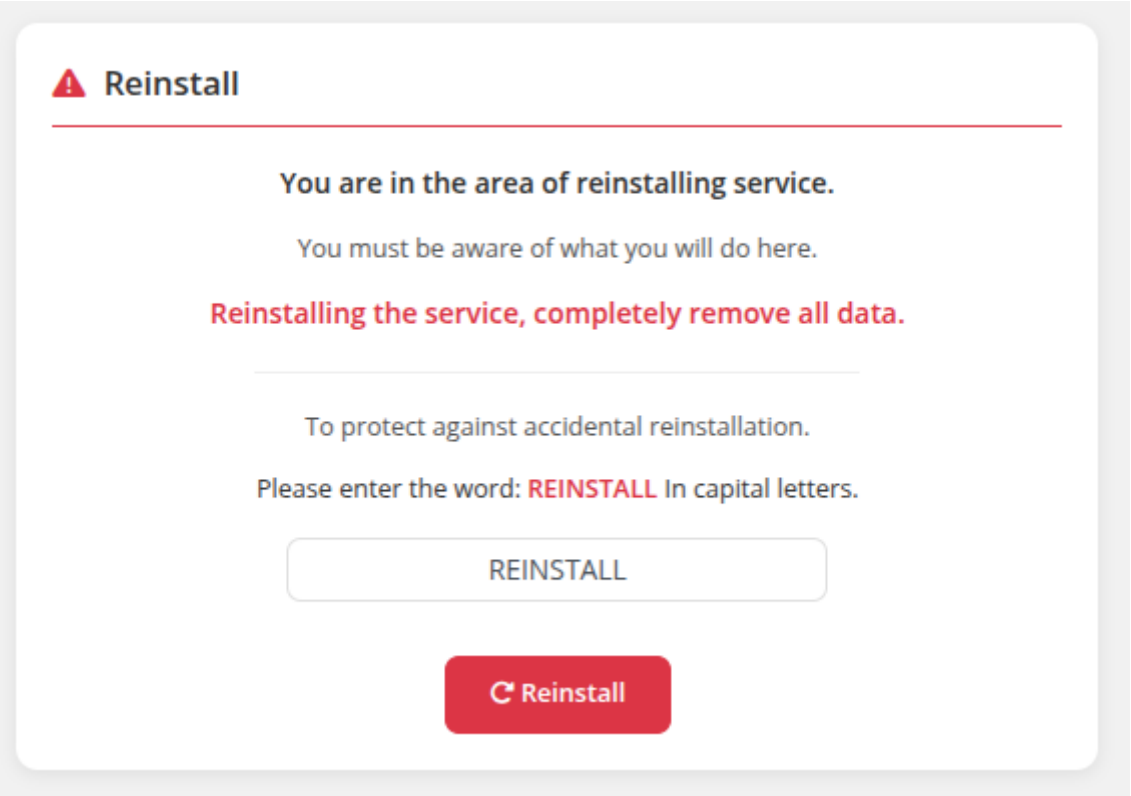

The reinstall feature allows clients to fully reinstall their n8n application. This operation causes **complete data loss**.

Protection Against Accidental Reinstallation

To prevent accidental reinstallation, the client must:

1. Navigate to **Reinstall** in the sidebar
2. Type the word **REINSTALL** (in capital letters) in the verification field
3. Click the **Reinstall** button
4. Confirm the action in the dialog prompt

> **Warning:** Reinstalling the service will completely remove all data. This action cannot be undone.
