

Changelog

Docker NextCloud module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#) | [n8n](#)

v2.0 Released 27-02-2026

- Module Settings:** Added a new integrated product settings UI in WHMCS admin with unified package option handling and backward compatibility with previous option formats.
- Product module settings have been redesigned
 - ⚠ **Product reconfiguration is required after update (open the product settings → module configuration, re-check all settings, and click Save)**
- Credentials Rules:** Added template-based username/password rules (macros, random patterns, custom charset) with automatic uniqueness handling.
- Client Area & Stability:** Refreshed client area templates (status/app/ACL/reinstall), improved loaders and usage formatting, and improved API error handling/logging.

Product reconfiguration is required after update

v1.2 Released 17-11-2025

- Security:** Enabled `__Host-` cookie prefix; added key security headers in NGINX.
- Docker Compose:** Removed deprecated version field; improved MariaDB/Redis healthchecks; switched dependencies to `service_started`.
- Container Management:** Updated Terminated script with full cleanup and explicit container removal.
- Result:** Faster deployments, stronger security, cleaner container lifecycle.

v1.1 Released 30-04-2025

- Support for multi-service docker backend
- Support custom domain names via PowerDNS
- Support configuration options, CPU, RAM, DISK

v1.0 Released 28-03-2025

First version

Revision #7
