Configurable Option (CPU/RAM/DISK)

Docker NextCloud module **WHMCS**

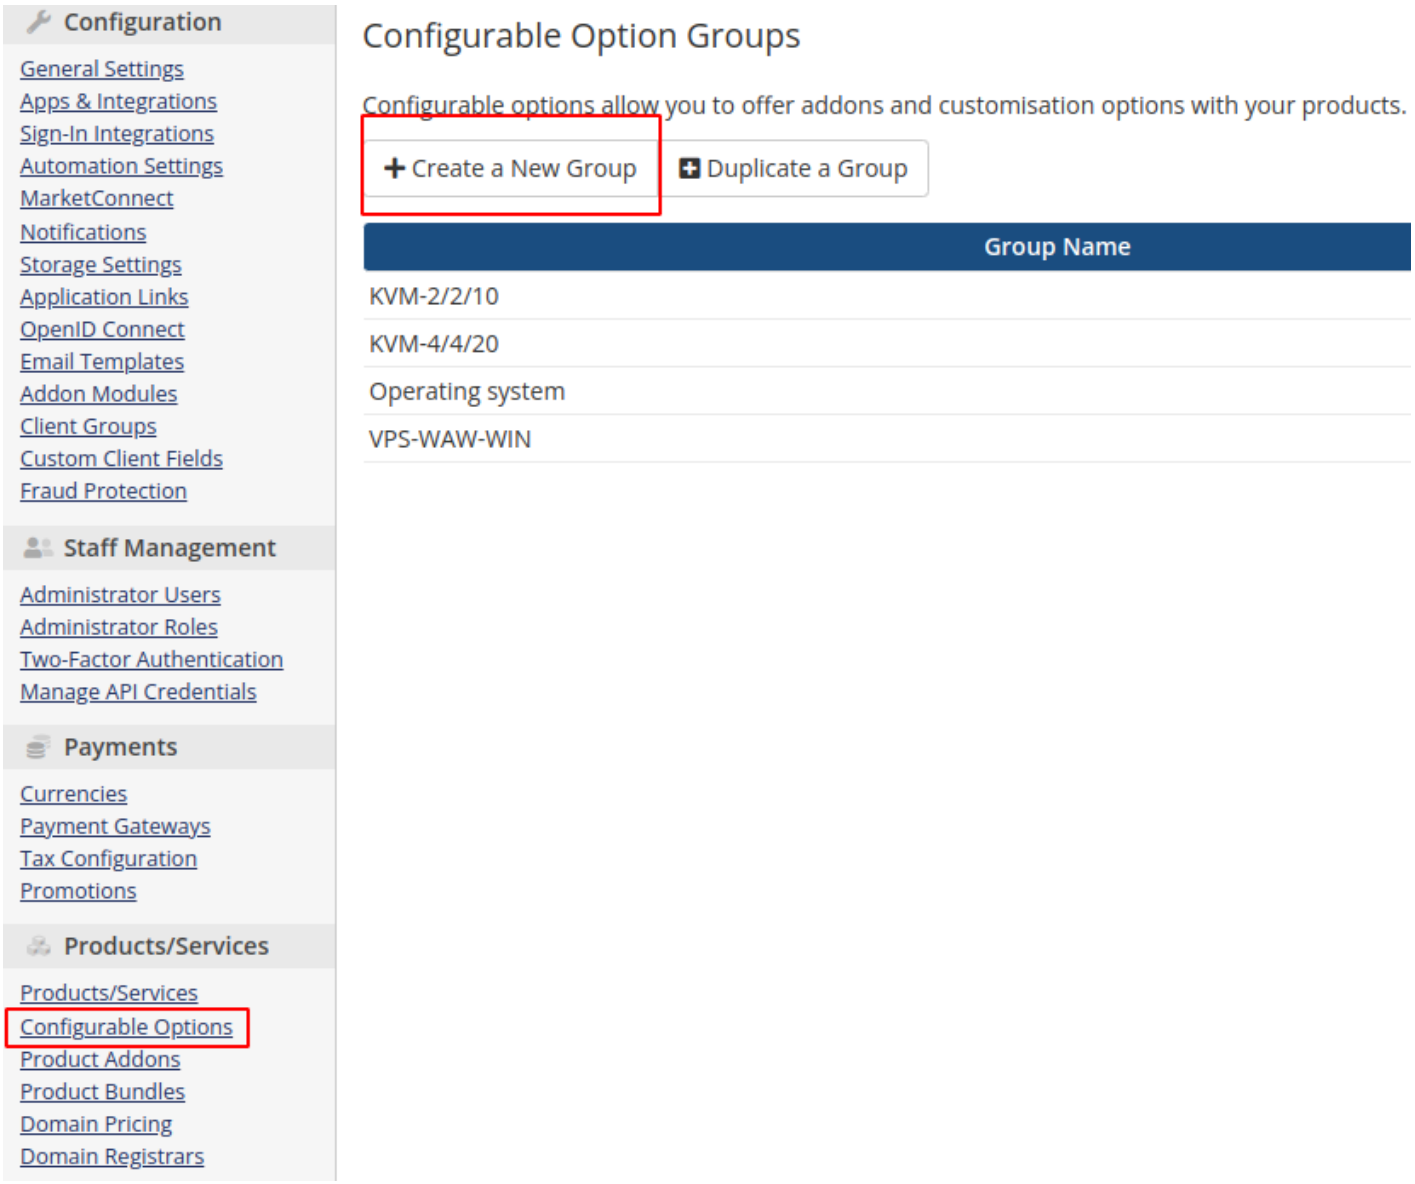

Order now | Download | FAQ | n8n

In order for the client to have a choice of operating system in the configuration of the virtual machine for NextCloud, you need to configure the Configurable Options and link them to the package.

Create Group

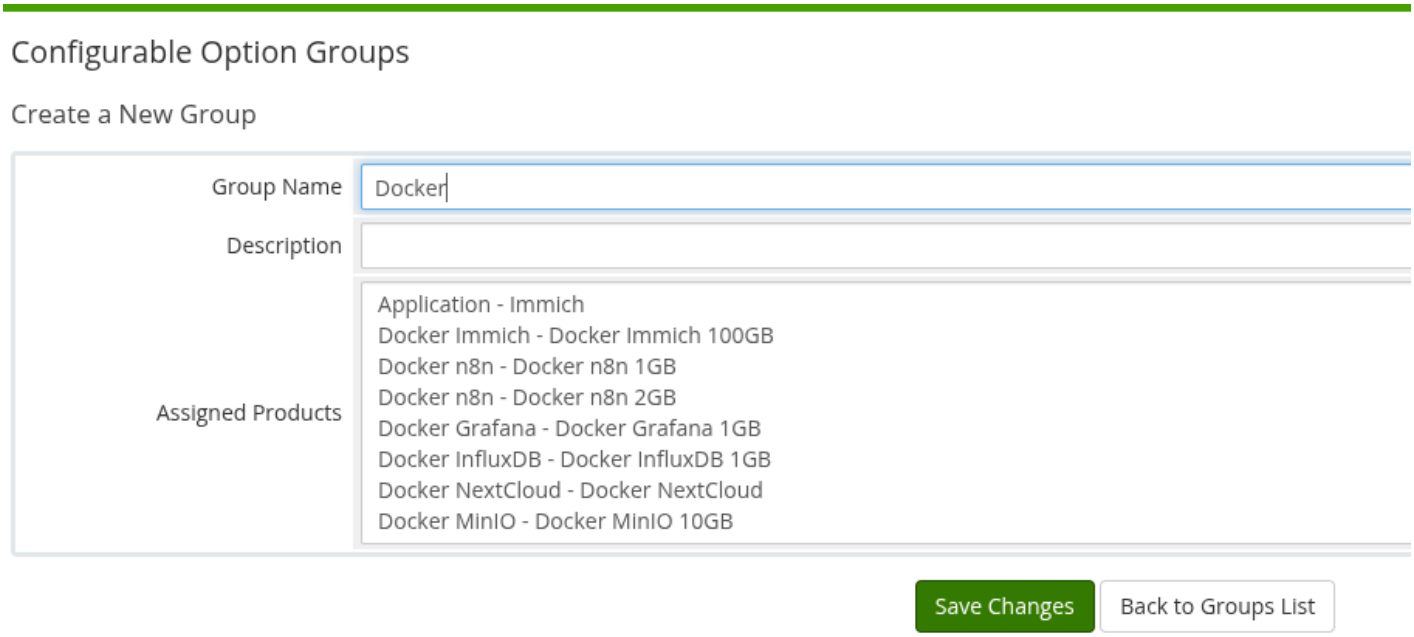

Add new Configurable Option to WHMCS

```
System Settings -> Configurable Option -> Create a New Group
```

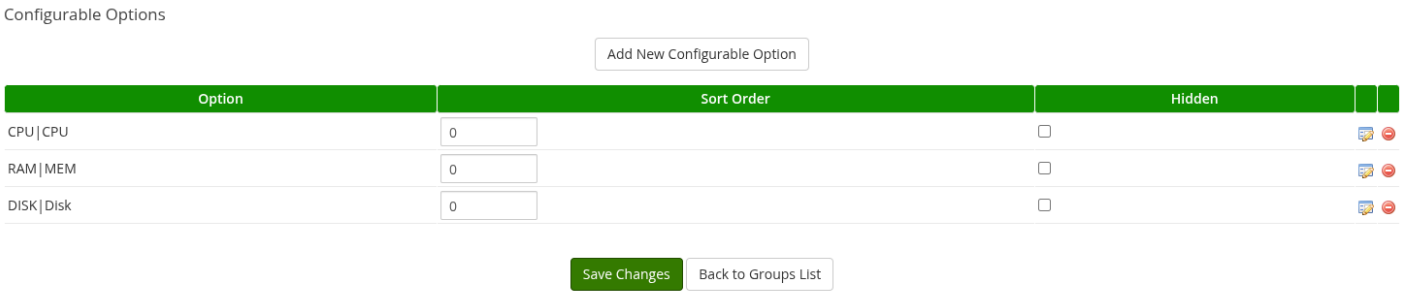

Enter the group name, description, and select the products you need.

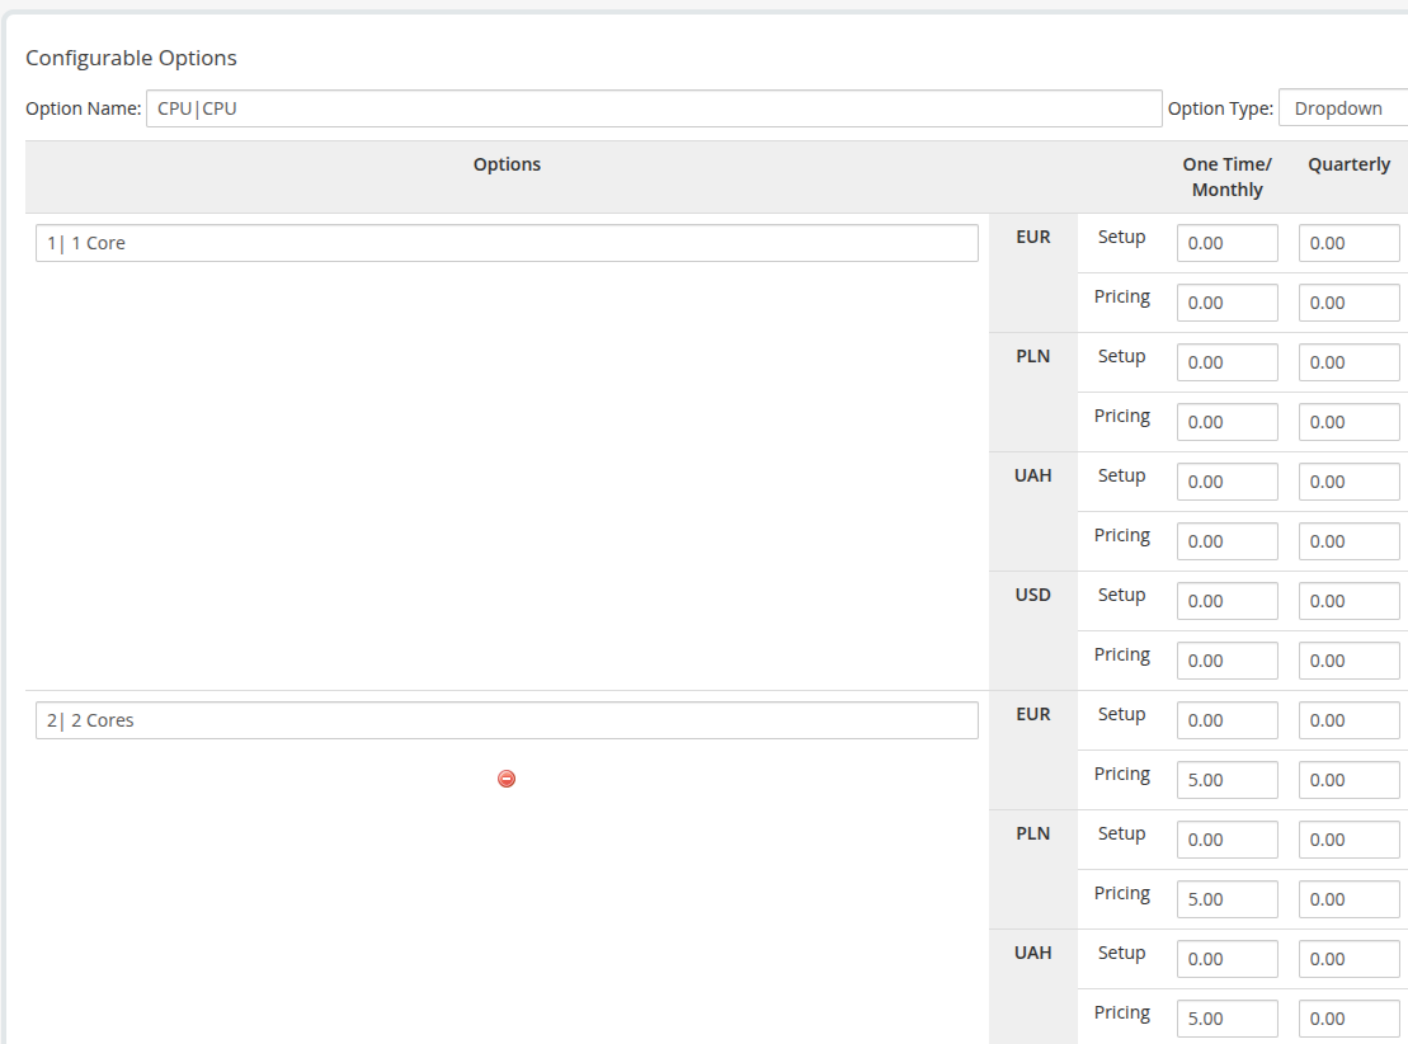

Group Name: NextCloud

Add Configurable Option

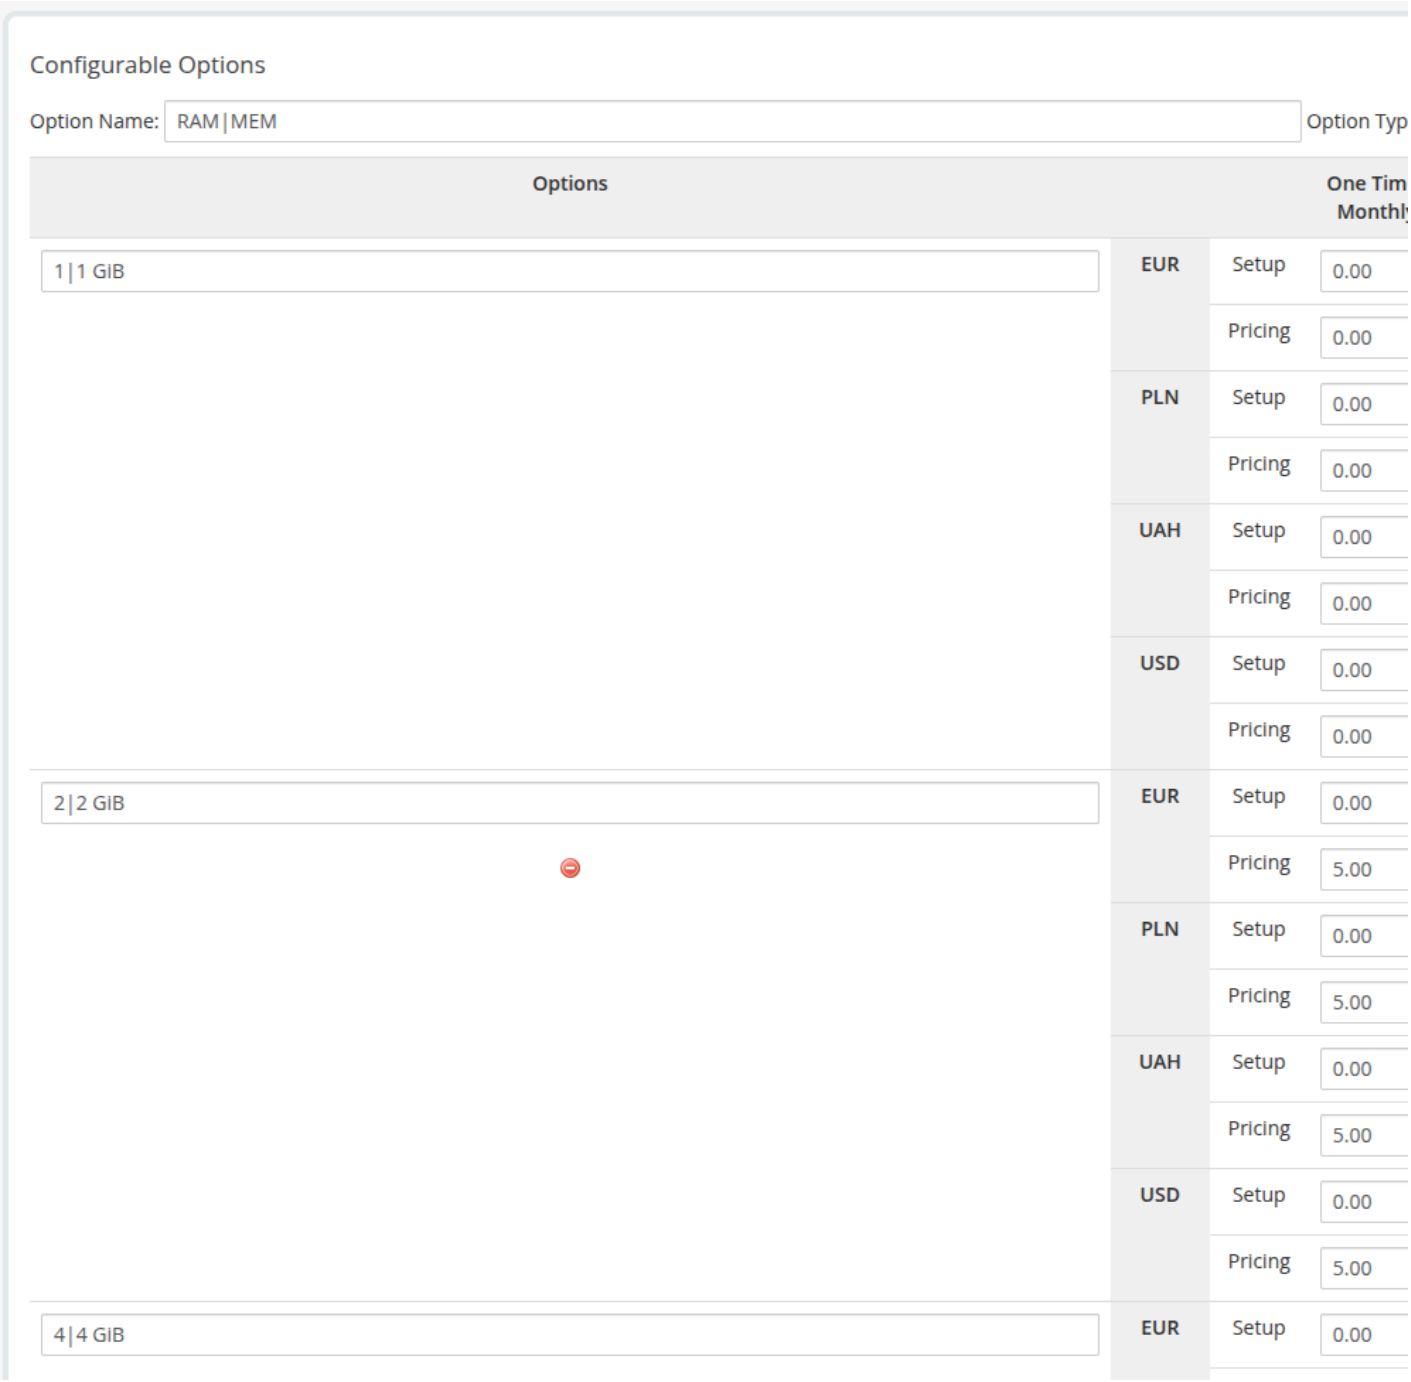

CPU|CPU – The first element before | must remain unchanged, the second is the label shown to clients

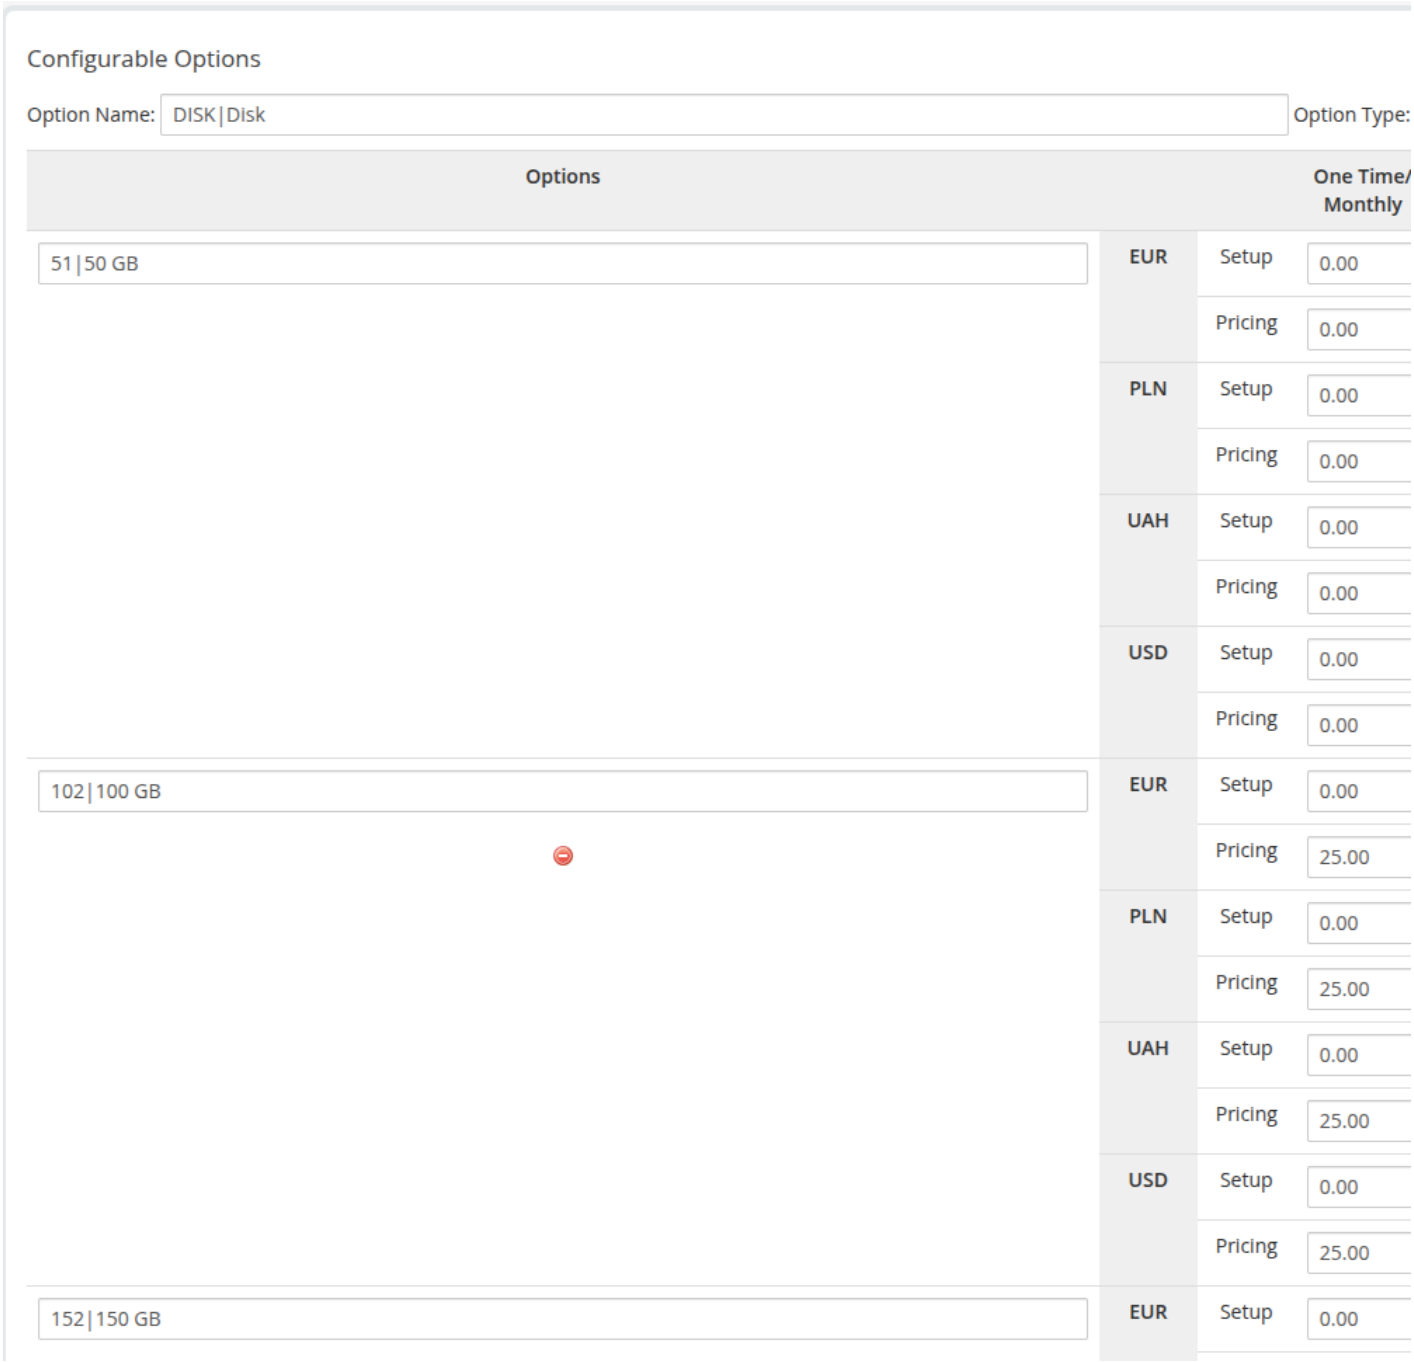

The first part in the option is responsible for the quantity, and the second is just a description.

RAM|MEM – The first element before | must remain unchanged, the second is the label shown to clients

The first part in the option is responsible for the quantity, and the second is just a description.

DISK|Disk – The first element before | must remain unchanged, the second is the label shown to clients

The first part in the option is responsible for the quantity, and the second is just a description.
