

# Product Configuration

## Docker NextCloud module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#) | [n8n](#)

### Add new product to WHMCS

System Settings->Products/Services->Create a New Product

In the **Module settings** section, select the "**PUQ Docker NextCloud**" module.

- **License key** - A pre-purchased, active license key for the "**PUQ Docker NextCloud**" module is required for proper operation.
- **Disk space** - Specifies the disk space allocated to the NextCloud Docker container.
- **CPU** - Sets the CPU usage limit for the Docker container.
- **RAM** - Determines the amount of RAM allocated to the Docker container.
- **Link to instruction** - URL to documentation or instructions that will appear in the client's service management panel, if provided.
- **Main domain** - The primary domain for accessing NextCloud's web interface. If left empty, the domain specified in the server's **hostname** setting will be used.
- **Subdomain** - Assigns an individual subdomain for each service. If left blank or if the subdomain already exists, it will automatically generate using the format **{user\_id}-{service\_id}**.
- 

## Supported Macros for **App Subdomain**:

- **{user\_id}** - Client ID
- **{service\_id}** - Service ID
- **{random\_digit\_x}** - Generates random digits (x specifies length)
- **{random\_letter\_x}** - Generates random letters (x specifies length)
- **{unixtime}** - Current Unix timestamp
- **{year}, {month}, {day}, {hour}, {minute}, {second}** - Date and time values
- **Notification, used disk space X %** - Defines the percentage threshold of disk usage at which the client receives a notification alert.

- **Notification disk limit email template** - Select an email template that will be sent automatically when the disk usage threshold is reached.
