Overwrite package settings ☐ Overwriting the package settings is necessary to personalize the service if you need it.

Send changes to server ☐ To apply the changes on the server, it is necessary to check this checkbox.

Update

In the opened tab, you have a view of the online status of the service. The available online information includes:

- Connection status to the API
- Information about the Emby account on the **Emby** server
- Information about the account

Also, below are fields with the client's personal data.

You can also individually override package options for the client by checking the '**Overwrite package settings**' box.

> After modifying the configuration options, check the '**Send changes to server**' box to save the data to the Emby server.
