

# Service configuration

## Emby Family module **WISECP**

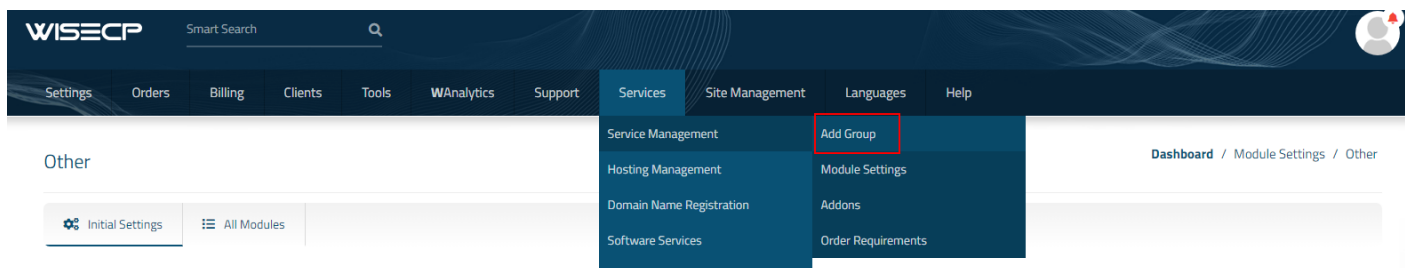

[Order now](#) | [Download](#) | [FAQ](#)

If you do not have a **Service Group** where you want to place the new service, you need to create a new **Service Group**

1. Log in to the admin area of your **WISECP**.
2. Create New Service Group

Go to

Services -> Service Management -> Add Group

Enter all the necessary data and click the **'Create Group'** button.

In the opened window, click the **'Create New Service'** button.

On the opened page, enter all the necessary details for your new service and navigate to the 'Core' tab.

Select the 'PUQ Emby Family' module from the drop-down list of modules.

4. Fill in the configuration options according to your preferences.

Libraries:

- **Use All Libraries:** Choosing all of libraries from your Jellyfin server
- **Libraries:** The libraries you want to make available to customers of this product.  
(IMPORTANT! Start a new line for each new library)

Example:

"Movies  
Beginner`s Programming Course  
Comedy"

**IMPORTANT!**

If you have a folder named "-", please enter it not as the first one or rename it.  
If you don't want any folder to be accessible, type "-".

## User Configuration:

- **Streaming bitrate limit:** An optional per-stream bitrate limit for all out of network devices. This is useful to prevent devices from requesting a higher bitrate than your internet connection can handle. This may result in increased CPU load on your server in order to transcode videos on the fly to a lower bitrate.
- **Remote control:** Remote control of shared devices (DLNA devices are considered shared until a user begins controlling them)
- **Media downloads:** Users can download media and store it on their devices. This is not the same as a sync feature. Book libraries require this enabled to function properly.
- **Username prefix/Username suffix:** Necessary in order to generate a username for the service, in the format: **prefix<client\_id>-<service\_id>suffix**

Allow playback (Restricting access to transcoding may cause playback failures in clients due to unsupported media formats)

- **media**
- **audio that requires transcoding**
- **video that requires transcoding**
- **video that requires conversion without re-encoding**

## Feature access:

- **Allow Live TV access**
- **Allow Live TV recording management**
- **Force transcoding of remote media sources such as Live TV**

## Media Accounts Configuration

- **Count of media accounts:** Available number of media accounts for creation by user.

## Links

- **Link to instruction:** Link to the instruction, if filled out, it will be reflected in the client

area
