

Product Configuration

Emby module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

Create a new Products/Services

System Settings->Products/Services->Create a New Product

In the **Module settings** section, select the "**PUQ Emby**" module

Module Name:

Server Group:

License key:
success: 2026-04-15T11:58:03+02:00

Use All Libraries: select all libraries together

Libraries Configuration

Libraries:

Write down the libraries you want to make available to customers of this product.
(IMPORTANT! Start a new line for each new library)
 Example:
 "Movies
 Beginner's Programming Course
 Comedy"

IMPORTANT!
 If you have a folder named ":", please enter it not as the first one or rename it.
 If you don't want any folder to be accessible, type ":".

Allow playback

media:

audio that requires transcoding:

video that requires transcoding:

video that requires conversion without re-encoding:

Links

Instruction:
A link to the instruction will be reflected in the client area.

User Configuration

Streaming bitrate limit:
Mbps. Please provide number from 1 to 60

Remote control: Remote control of shared devices (DLNA devices are considered shared until a user begins controlling them)

Users can download media and store it on their devices. This is not the same as a sync feature. Book libraries require this enabled to function properly.

Media downloads: Allow subtitle downloading

Subtitle Downloading: If allowed, and if enabled in Emby mobile apps, users can automatically upload photos and videos taken from their camera to this Emby Server

Camera upload: Grant or deny access to the convert media feature.

Media conversion: Only web pages containing media information are shared. Media files are never shared publicly. Shares are time-limited and will expire after 30 days.

Social media sharing: Allow this user to change their password and profile image

User Preference Access:
Will be attached to the beginning of username. Only small letters and numbers and symbol "-"

Username prefix:
Will be appended to the end of username. Only small letters and numbers and symbol "-"

Feature access

Allow Live TV access:

Allow Live TV recording management:

Force transcoding of remote media sources such as Live TV:

Client Area

Show Password:
Show service password in the client area

Set the password length and the allowed letters/numbers/symbols for the password. Format: "8:234abcdABCD", where 8 is the password length, and everything after the colon represents the allowed characters.

Password Generation:

Username Format:
{user_id}-{random_digit_5}-{random_letter_{random_letter_x}}{user_id}, {service_id}, {random_digit_x}, {random_letter_x}

Custom Username: Unix time: {unixtime} Year: {year}, Month: {month}, Day: {day}, Hour: {hour}, Minute: {minute}, Second: {second}

[Switch to Advanced Mode](#)

Automatically setup the product as soon as an order is placed
 Automatically setup the product as soon as the first payment is received
 Automatically setup the product when you manually accept a pending order
 Do not automatically setup this product

- **License key:** A pre-purchased license key for the "PUQ Emby" module. For the module to work correctly, the key must be active

Libraries:

- **Use All Libraries:** Choosing all of libraries from your Jellyfin server
- **Libraries:** The libraries you want to make available to customers of this product.
(IMPORTANT! Start a new line for each new library)

Example:

"Movies

Beginner`s Programming Course

Comedy"

IMPORTANT!

If you have a folder named "-", please enter it not as the first one or rename it.

If you want to select all folders together, simply leave the field EMPTY.

If you don't want any folder to be accessible, type "-".

User Configuration:

- **Streaming bitrate limit:** An optional per-stream bitrate limit for all out of network devices. This is useful to prevent devices from requesting a higher bitrate than your internet connection can handle. This may result in increased CPU load on your server in order to transcode videos on the fly to a lower bitrate.
- **Remote control:** Remote control of shared devices (DLNA devices are considered shared until a user begins controlling them)
- **Media downloads:** Users can download media and store it on their devices. This is not the same as a sync feature. Book libraries require this enabled to function properly.
- **Subtitle Downloading:** Allow subtitle downloading
- **Camera upload:** If allowed, and if enabled in Emby mobile apps, users can automatically upload photos and videos taken from their camera to this Emby Server
- **Media conversion:** Grant or deny access to the convert media feature.
- **Social media sharing:** Only web pages containing media information are shared. Media files are never shared publicly. Shares are time-limited and will expire after 30 days.
- **User Preference Access:** Allow this user to change their password and profile image
- **Username prefix/Username suffix:** Necessary in order to generate a username for the service, in the format: **prefix<client_id>-<service_id>suffix**

Allow playback (Restricting access to transcoding may cause playback failures in clients due to unsupported media formats)

- **media**
- **audio that requires transcoding**
- **video that requires transcoding**
- **video that requires conversion without re-encoding**

Feature access:

- **Allow Live TV access**
- **Allow Live TV recording management**
- **Force transcoding of remote media sources such as Live TV**

Links

- **Link to instruction:** Link to the instruction, if filled out, it will be reflected in the client

area

Client Area

- **Show Password** - Show the service password in the client area.
 - **Password Generation** - Set the password length and the allowed letters/numbers/symbols for the password.
Format: `"8: 234abcdABCD"`, where `8` is the password length, and everything after the colon represents the allowed characters.
 - **Username Format** - Define the format for username generation:
 - **Standard** - prefix-client_id-service_id-suffix
 - **Custom** - username generated by a custom rule
 - **Custom Username** - Set a rule for generating a custom username.
