Setup guide: WHMCS setup

Emby module **WHMCS**

Order now | Download | FAQ

1. Download the latest version of the module.

PHP 8.1

```
wget http: //download. puqcloud. com/WHMCS/servers/PUQ_WHMCS-Emby/PUQ_WHMCS-Emby-latest. zip
```

PHP 7.4

```
wget http: //download. puqcloud. com/WHMCS/servers/PUQ_WHMCS-Emby/php74/PUQ_WHMCS-Emby-latest. zip
```

> All versions are available via link:
>
> http://download.puqcloud.com/WHMCS/servers/PUQ_WHMCS-Emby/

2. Unzip the archive with the module.

```
unzip PUQ_WHMCS-Emby-latest. zip
```

3. Copy "puqEmby" to "WHMCS_WEB_DIR/modules/servers/"

4. Create new server Emby in WHMCS (System Settings->Products/Services->Servers)

```
System Settings->Servers->Add New Server
```

- Enter the correct **Name** and **Hostname**

- In the **Server Details** section, select the "**PUQ Emby**" module and enter the correct **username**, **password** and **access hash (API key)** for the **Emby web interface**.
- To check, click the **"Test connection"** button

5. Create a new Products/Services

```
System Settings->Products/Services->Create a New Product
```

In the **Module settings** section, select the **"PUQ Emby"** module

- **License key:** A pre-purchased license key for the **"PUQ Emby"** module. For the module to work correctly, the key must be active

Libraries:

- **Use All Libraries**: Choosing all of libraries from your Jellyfin server
- **Libraries**: The libraries you want to make available to customers of this product.
  (IMPORTANT! Start a new line for each new library)
  Example:
  "Movies
  Beginner`s Programming Course
  Comedy"
  IMPORTANT!

If you have a folder named "-", please enter it not as the first one or rename it.
If you don't want any folder to be accessible, type "-".

User Configuration:

- **Streaming bitrate limit:** An optional per-stream bitrate limit for all out of network devices. This is useful to prevent devices from requesting a higher bitrate than your internet connection can handle. This may result in increased CPU load on your server in order to transcode videos on the fly to a lower bitrate.
- **Remote control:** Remote control of shared devices (DLNA devices are considered shared until a user begins controlling them)
- **Media downloads:** Users can download media and store it on their devices. This is not the same as a sync feature. Book libraries require this enabled to function properly.
- **Username prefix/Username suffix:** Necessary in order to generate a username for the service, in the format: **prefix<client_id>-<service_id>suffix**

Allow playback (Restricting access to transcoding may cause playback failures in clients due to unsupported media formats)

- **media**
- **audio that requires transcoding**
- **video that requires transcoding**
- **video that requires conversion without re-encoding**

Feature access:

- **Allow Live TV access**
- **Allow Live TV recording management**
- **Force transcoding of remote media sources such as Live TV**

Links

- **Link to instruction:** Link to the instruction, if filled out, it will be reflected in the client area
