FTP user management section

HestiaCP module **WHMCS**

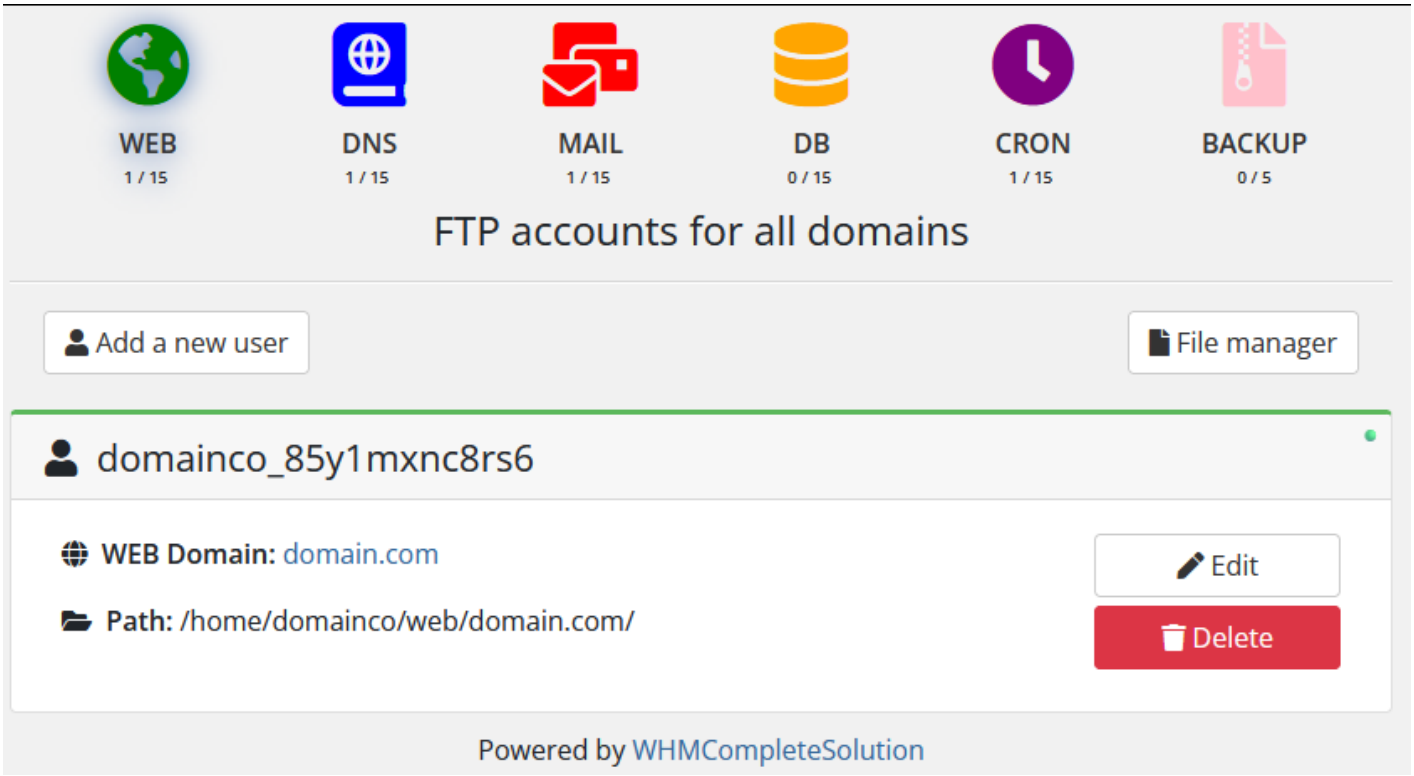

Order now | Download | FAQ

1. Simple configuration of FTP users

The end client, having entered the FTP user management section of the client panel, has access to the following information and parameters:

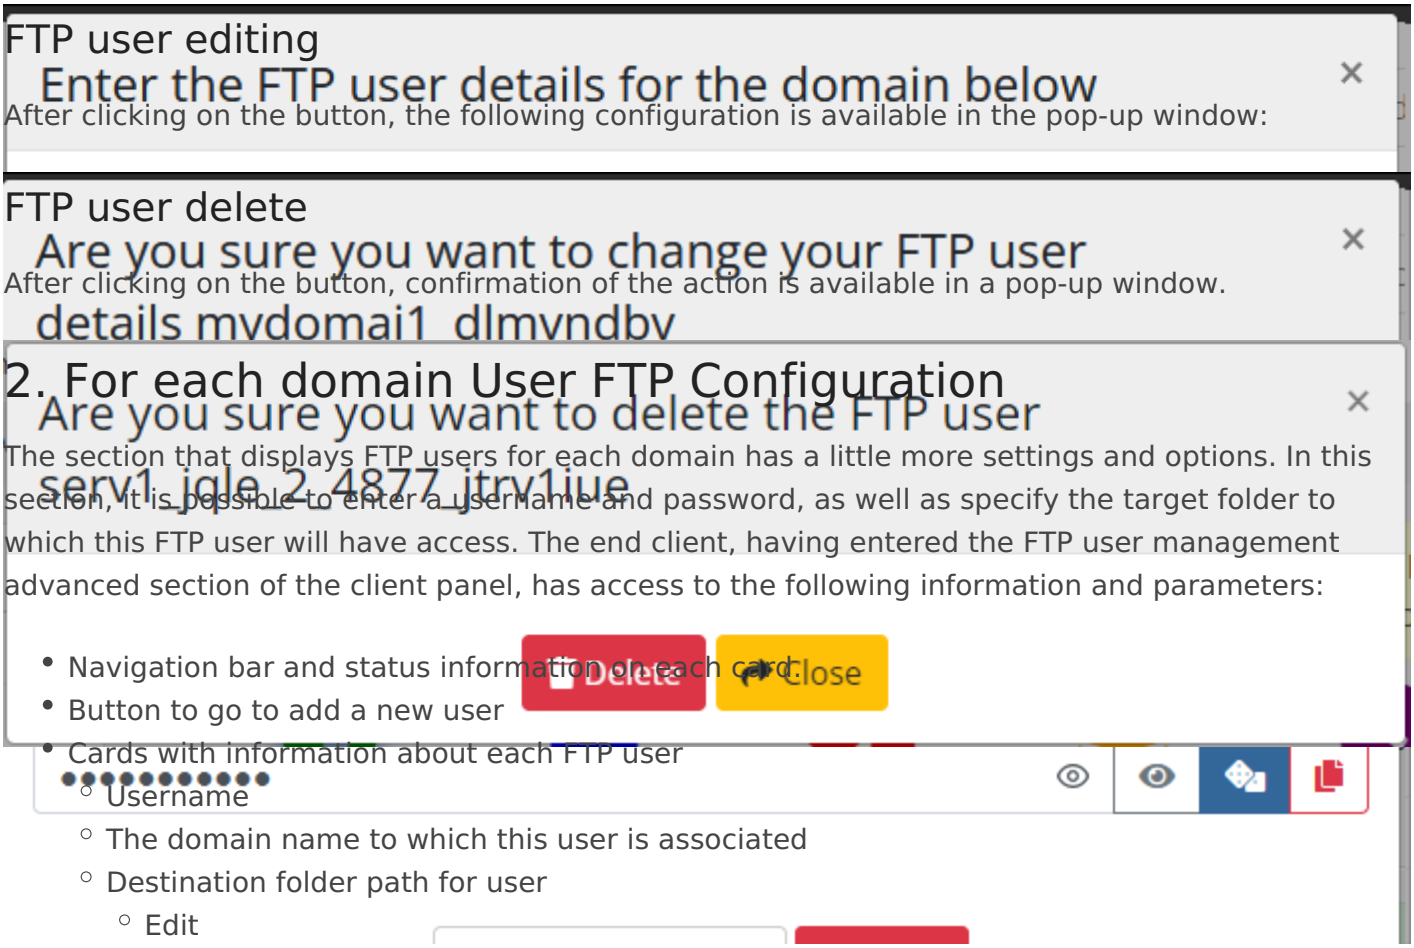

- Navigation bar and status information on each card.
- Button to go to add a new user
- Button to go to File manager
- Cards with information about each FTP user
  - Username
  - Domain name status to which this user is associated in the system HestiaCP is suspended or not suspended (Active)
  - The domain name to which this user is associated
  - Link to go to the site
  - Link to access users settings for a specific domain
  - IP Address
  - Buttons for managing FTP user
    - Edit
    - Delete

Attention! If the WEB domain is suspended, users of the domain name will also be suspended.

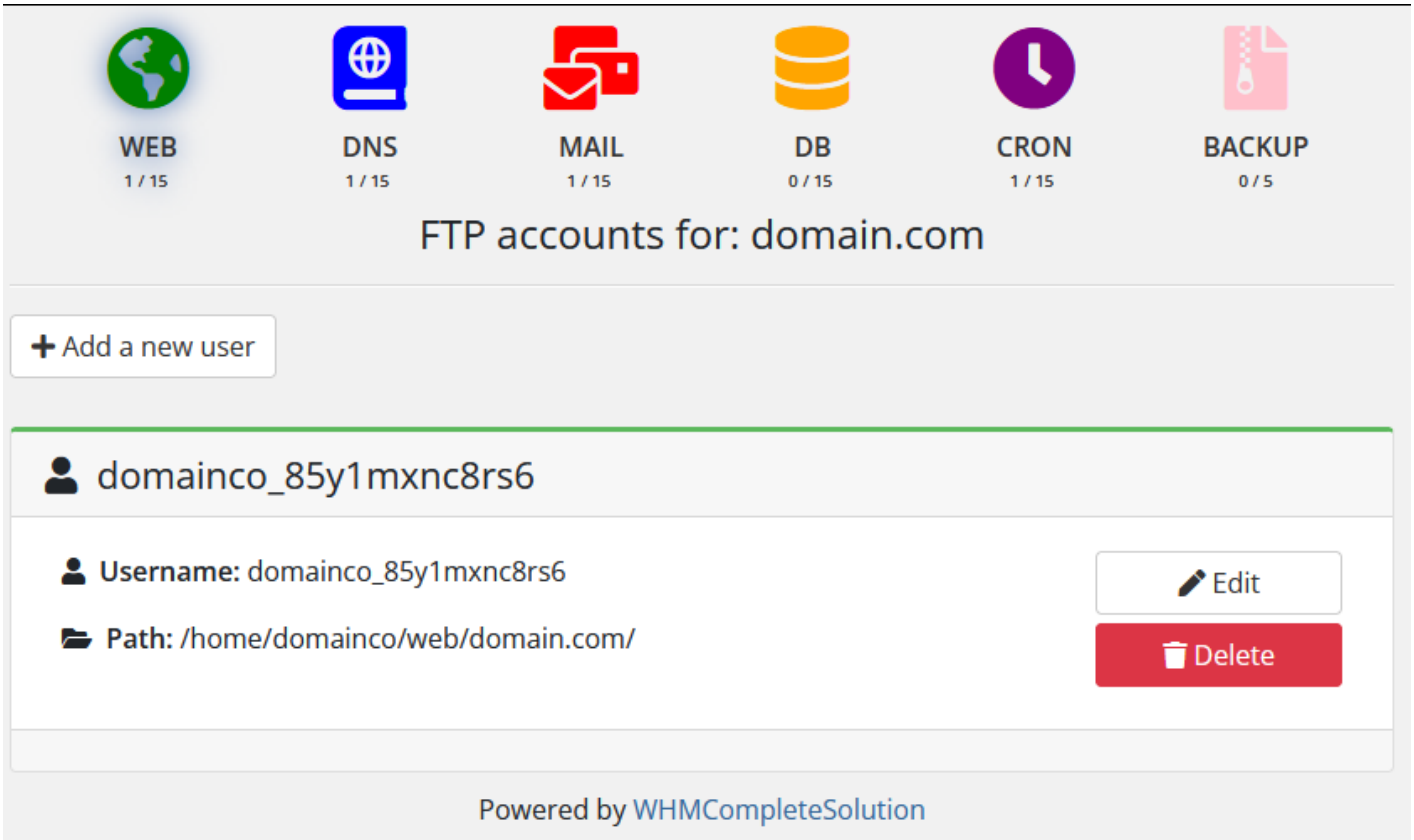

Adding a new FTP user

After clicking on the button in the pop-up window, you must select the domain name to which you want to add a new FTP user. The username and password will be randomly generated.

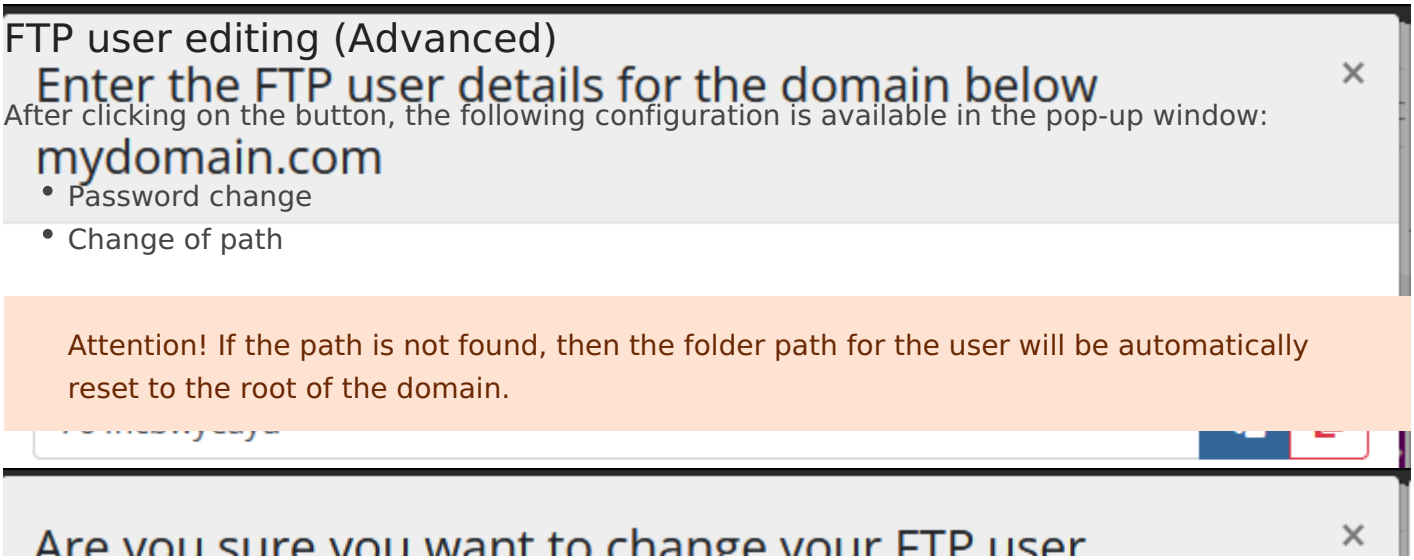

- Delete

Adding a new FTP user (Advanced)

After clicking on the button in the pop-up window, you must enter the username and password, as well as specify the final path (optional).

> Attention! If the folder does not exist, the user will not be able to connect to the system, so the entered path is checked for compliance, and if the path is not found, the user will be deleted immediately after the creation attempt.

FTP user editing (Advanced)

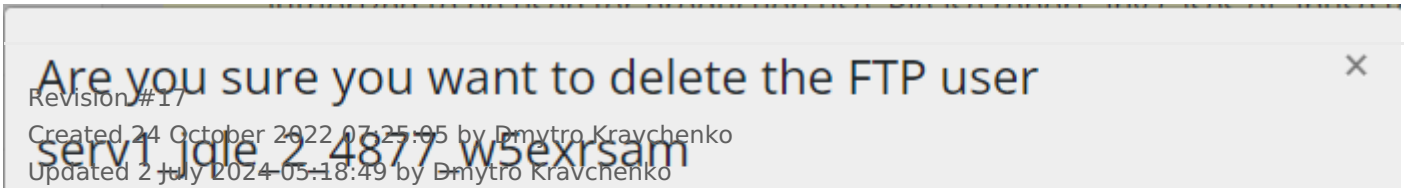

After clicking on the button, the following configuration is available in the pop-up window:

- Password change
- Change of path

> Attention! If the path is not found, then the folder path for the user will be automatically reset to the root of the domain.

FTP user delete (Advanced)

After clicking on the button, confirmation of the action is available in a pop-up window.
