The screenshot shows the WHM interface with several service icons at the top: WEB (1/15), DNS (1/15), MAIL (1/15), DB (0/15), CRON (1/15), and BACKUP (0/5). Below these is a button labeled '+ Add new mail domain'. The main content area displays details for a mail domain named 'domain.com', including its size (0 MB), WebMail access, and various security and spam settings. At the bottom, it is noted as 'Powered by WHMCompleteSolution'.

Adding a new mail domain

After clicking on the button in the pop-up window, you must enter the name of the email domain you want to add, as well as set additional parameters.
