Description of basic concepts

The team of PUQ sp. z o.o. has extensive experience in the IT business. Because of this, all software that We provide has a price that modestly rewards us for our work.

By purchasing a software product produced by our specialists, you make a huge contribution to the development of new software products and the improvement of current software products.

We don't want you to regret the money you spend on products you don't know. Therefore, we provide a *7-day grace period* for each product. During these 7 days you can use the software completely and without any restrictions and decide for yourself how much you need this product.

All our products are publicly available for download and can be accessed by clicking on the link below.

http://download.puqcloud.com/

You can download any of our software products and use them without purchasing a license, but the software product will have restrictions that will not allow you to fully use the product without valid license.

We provide two licensing plans that differ in license duration.

1. The first 1 month from the date of order. Please note that there is a 7-day grace period for this month.
2. Second 1 year from date of order. Please note that there is a 7-day grace period for this month.

Take into account the fact that the price for a license for 1 month and 1 year differs in favor of 1 annual license for some software products, 1 annual license can be 2 times more profitable than 12 1-month licenses.

Please use the product links below to view all products.

If you wish, you can participate in the development of your projects in a variety of ways.

You can help with translations, Translation service is available for everyone and it is located at:

https://translate.puqcloud.com/

You can also report problems or help other users on the forum, or suggest new functionalities within existing modules or even entire modules

All this we are happy to discuss on our forum. We invite you there.
