How to Activate a Module

PUQcloud Panel

Order Now | Download | FAQ

Overview

This guide explains how to **activate** a module in PUQcloud Panel.
Activation makes a module available in the system and automatically creates all required database tables and configuration entries.

Navigation:
`Dashboard → Modules`

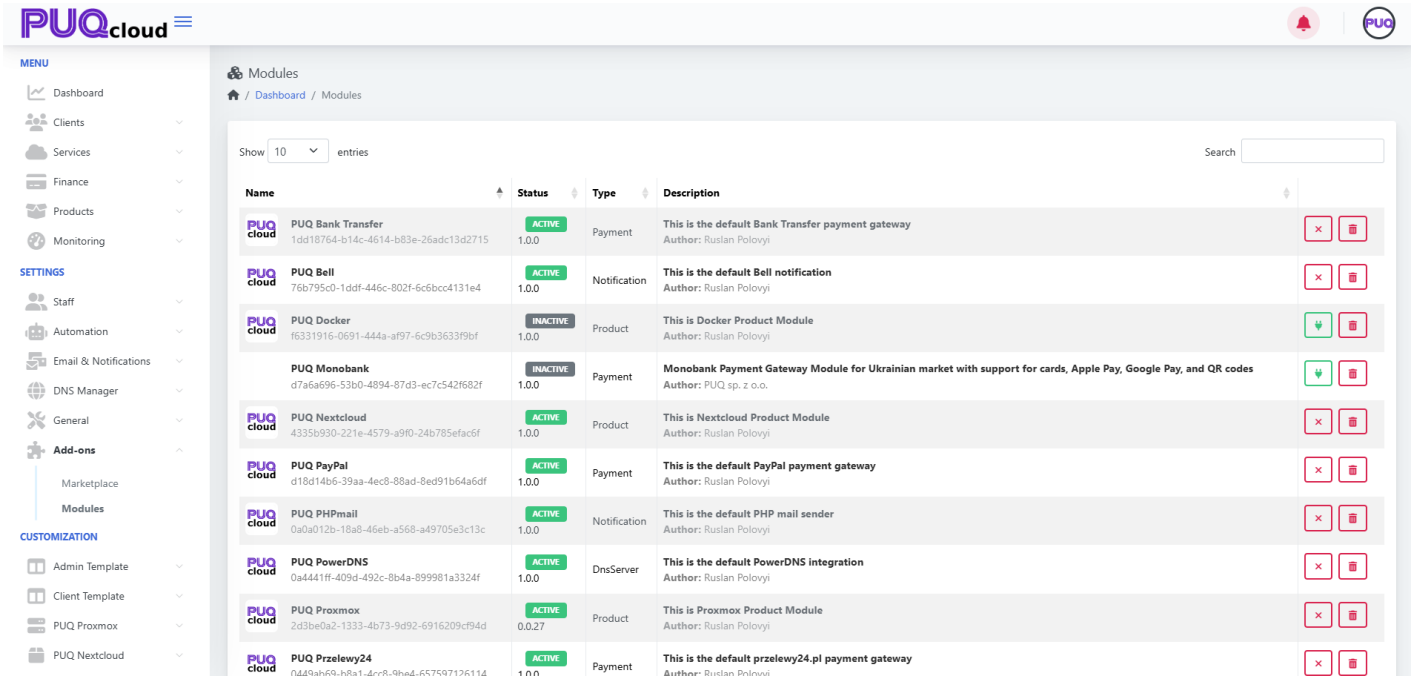

Steps to Activate a Module

1. Open the **Modules** section in the admin panel.
2. Find the desired module in the list.
3. If its status shows **INACTIVE**, click the **green button ()**.
4. The system will:
   - Run the `Activate` function.
   - Create or update the database tables required by the module.
   - Initialize default settings.
   - Change the module status to **ACTIVE**.

Result

The module is now active and can be configured or used immediately in other parts of the system (for example, as a payment gateway or product integration).
