

How to Activate a Module

PUQcloud Panel

[Order Now](#) | [Download](#) | [FAQ](#)

Overview

This guide explains how to **activate** a module in PUQcloud Panel. Activation makes a module available in the system and automatically creates all required database tables and configuration entries.

Navigation:

[Dashboard](#) → [Modules](#)

Steps to Activate a Module

1. Open the **Modules** section in the admin panel.
 2. Find the desired module in the list.
 3. If its status shows **INACTIVE**, click the **green button ()**.
 4. The system will:
 - Run the `Activate` function.
 - Create or update the database tables required by the module.
 - Initialize default settings.
 - Change the module status to **ACTIVE**.
-

Result

The module is now active and can be configured or used immediately in other parts of the system (for example, as a payment gateway or product integration).

Example

- MENU
- Dashboard
- Clients
- Services
- Finance
- Products
- Monitoring
- SETTINGS
- Staff
- Automation
- Email & Notifications
- DNS Manager
- General
- Add-ons
- Marketplace
- Modules
- CUSTOMIZATION
- Admin Template
- Client Template
- PUQ Proxmox
- PUQ Nextcloud
