Setup guide: WHMCS setup

Jellyfin Family module **WHMCS**

Order now | Download | FAQ

1. Download the latest version of the module.

PHP 8.1

```
wget https://download.puqcloud.com/WHMCS/servers/PUQ_WHMCS-Jellyfin-Family/PUQ_WHMCS-Jellyfin-
Family-latest.zip
```

PHP 7.4

```
wget https://download.puqcloud.com/WHMCS/servers/PUQ_WHMCS-Jellyfin-Family/php74/PUQ_WHMCS-
Jellyfin-Family-latest.zip
```

All versions are available via link:

http://download.puqcloud.com/WHMCS/servers/PUQ_WHMCS-Jellyfin-Family/

2. Unzip the archive with the module.

```
unzip PUQ_WHMCS-Jellyfin-Family-latest.zip
```

3. Copy "puqJellyfinFamily" to "WHMCS_WEB_DIR/modules/servers/"

4. Create new server Jellyfin in WHMCS (System Settings->Products/Services->Servers)

```
System Settings->Servers->Add New Server
```

- Enter the correct **Name** and **Hostname**

Name	jellyfi̇█████████l
Hostname	jellyfi̇████████l
IP Address	
Assigned IP Addresses (One per line)	
Monthly Cost	
Datacenter/NOC	
Maximum No. of Accounts	200
Server Status Address	To display this server on the server status page, enter the full path to t folder (required to be uploaded to each server you want to monitor) - https://www.example.com/status/
Enable/Disable	☐ Check to disable this server

- In the **Server Details** section, select the "**PUQ Jellyfin Family**" module and enter the correct **username**, **password** and **access hash (API key)** for the **Jellyfin web interface**.
- To check, click the **"Test connection"** button

5. Create a new Products/Services

```
System Settings->Products/Services->Create a New Product
```

In the **Module settings** section, select the **"PUQ Jellyfin Family"** module

	Module Name	PUQ Jellyfin Family ⌄	
	Server Group	PUQ Jellyfin Family ⌄	

License key	2CLDQ2~~~~~~~~~~-RKSRB1	Media Accounts Configuration	Count of media accounts:
	success: 2024-05-11T16:04:28+02:00		20 — Available number of media accounts for creation by user
Libraries Configuration	**Use All Libraries:** ☑ select all libraries together		Streaming bitrate limit: ____ Mbps
			SyncPlay access: Allow user to create and join grou ⌄ — Sync playback with other devices
			Remote control: ☐ Remote control of shared devices (DLNA devices are considered shared until a user begins controlling them)
	Write down the libraries you want to make available to customers of this product. **(IMPORTANT! Start a new line for each new library)** Example: "Movies Beginner`s Programming Course Comedy"		Media downloads: ☐ Users can download media and store it on their devices. This is not the same as a sync feature. Book libraries require this enabled to function properly.
	IMPORTANT! If you have a folder named "-", please enter it not as the first one or rename it. If you don't want any folder to be accessible, type "-".	User Configuration	User sessions: 4 — A value of 0 will disable the feature.
	Libraries:		Failed login attempts: ____ before user is locked out. Setting this to -1 will disable the feature.
			Username prefix: ____ Will be attached to the beginning of username. Only small letters and numbers and symbol "-"
			Username suffix: ____ Will be appended to the end of username. Only small letters and numbers and symbol "-"
Allow playback	media: ☐	Feature access	Allow Live TV access: ☐
	audio that requires transcoding: ☐		Allow Live TV recording management: ☐
	video that requires transcoding: ☐		Force transcoding of remote media sources such as Live TV: ☐
	video that requires conversion without re-encoding: ☐		
Links	**Instruction:** ____ A link to the instruction will be reflected in the client area.	Client Area	Show Password: Show button ⌄ — Show service password in the client area

Switch to Advanced Mode

○ Automatically setup the product as soon as an order is placed
● Automatically setup the product as soon as the first payment is received
○ Automatically setup the product when you manually accept a pending order
○ Do not automatically setup this product

- **License key:** A pre-purchased license key for the **"PUQ Jellyfin Family"** module. For the module to work correctly, the key must be active

Media Accounts Configuration

- **Count of media accounts**: Available number of media accounts for creation by user.

Libraries:

- **Use All Libraries**: Choosing all of libraries from your Jellyfin server
- **Libraries**: The libraries you want to make available to customers of this product.
  (IMPORTANT! Start a new line for each new library)
  Example:
  "Movies
  Beginner`s Programming Course
  Comedy"
  IMPORTANT!
  If you have a folder named "-", please enter it not as the first one or rename it.
  If you don't want any folder to be accessible, type "-".

User Configuration:

- **Streaming bitrate limit:** An optional per-stream bitrate limit for all out of network devices. This is useful to prevent devices from requesting a higher bitrate than your internet connection can handle. This may result in increased CPU load on your server in order to transcode videos on the fly to a lower bitrate.
- **SyncPlay access:** The SyncPlay feature enables to sync playback with other devices. Select the level of access this user has to the SyncPlay
- **Remote control:** Remote control of shared devices (DLNA devices are considered shared until a user begins controlling them)
- **Media downloads:** Users can download media and store it on their devices. This is not the same as a sync feature. Book libraries require this enabled to function properly.
- **User sessions:** Set the maximum number of simultaneous user sessions. A value of 0 will disable the feature.
- **Failed login attempts:** Determine how many incorrect login tries can be made before lockout occurs. A value of zero means inheriting the default of three tries for normal users and five for administrators. Setting this to -1 will disable the feature.
- **Username prefix/Username suffix:** Necessary in order to generate a username for the service, in the format: **prefix<client_id>-<service_id>suffix**

Allow playback (Restricting access to transcoding may cause playback failures in clients due to unsupported media formats)

- **media**
- **audio that requires transcoding**
- **video that requires transcoding**
- **video that requires conversion without re-encoding**

Feature access:

- **Allow Live TV access**
- **Allow Live TV recording management**
- **Force transcoding of remote media sources such as Live TV**

Links

- **Link to instruction:** Link to the instruction, if filled out, it will be reflected in the client area
