jelly-4-196-family

Password

123123123

Server

Jelly Fam

Overwrite package settings

☐

Overwriting the package settings is necessary to personalize the service if you need it.

Send changes to server

☐

To apply the changes on the server, it is necessary to check this checkbox.

Update

In the opened tab, you have a view of the online status of the service. The available online

information includes:

- Connection status to the API
- Information about the Jellyfin account on the **Jellyfin** server
- Information about the account

Also, below are fields with the client's personal data.

You can also individually override package options for the client by checking the '**Overwrite package settings**' box.

After modifying the configuration options, check the '**Send changes to server**' box to save the data to the Jellyfin server.

<b>Username</b>	jelly-4-196-family	<b>Password</b>	123123123	<b>Server</b>	Jelly Fam
<b>Server Group</b>	Default (Servers: 1)	<b>Use All Libraries</b>	<input type="checkbox"/> select all libraries together
