

Client area overview

Jellyfin module **WHMCS**

[Order now](#) | [Download](#) | [Community](#)

The client opens their Jellyfin service from **clientarea.php** → **My Services** → **(service)** → **Information**. The page loads its data over AJAX and renders a set of cards.

DEVICE NAME	APP NAME	LAST ACTIVITY
 Firefox	Jellyfin Web	2026-06-06T00:24:53.973208Z

Actions

- **Web interface** — opens the Jellyfin web UI in a new tab.
- **User manual** — opens the instruction URL configured on the product (if set).
- **Drop All Devices** — signs the account out of every device (confirmation required).
- **Unblock** — re-enables the account when it has been locked/disabled (shown only when disabled).

Account

- **Username** with a copy button.
- **Password** — shown as a reveal button, plain text, or hidden, depending on the product's *Show password* setting; with a copy button.
- **Status** — Enabled / Disabled badge.

Info

- Streaming bitrate limit, active sessions (with the max), failed-login attempts (with the lockout threshold), and SyncPlay access.

Libraries & Devices

- **Libraries** — chips for each library the user can access (with a count badge).
- **Active Devices** — table of device name, app and last activity (with a count badge).

All actions use AJAX and report the result with a toast notification — the page never reloads.
