Username  Password  Server

Overwrite package settings  Overwriting the package settings is necessary to personalize the service if you need it.

Send changes to server  To apply the changes on the server, it is necessary to check this checkbox.

[Update](#)

In the opened tab, you have a view of the online status of the service. The available online information includes:

- Connection status to the API
- Information about the Jellyfin account on the **Jellyfin** server
- Information about the account

Also, below are fields with the client's personal data.

You can also individually override package options for the client by checking the '**Overwrite package settings**' box.

After modifying the configuration options, check the '**Send changes to server**' box to save the data to the Jellyfinserver.

Username  Password  Server

Server Group  Use All Libraries  select all libraries together

Username prefix  Libraries   
Will be attached to the beginning of username. Only small letters and numbers and symbol "-"

Username suffix  Streaming bitrate limit   
Will be appended to the end of username. Only small letters and numbers and symbol "-" Mbps

SyncPlay access  User sessions   
Sync playback with other devices A value of 0 will disable the feature.

Failed login attempts  Remote control  Remote control of shared devices  
before user is locked out. Setting this to -1 will disable the feature

Media downloads  Users can download media and store it on their devices. This is not the same as a sync feature. Book libraries require this enabled to function properly. Allow Playback Media

Allow Playback Audio  audio that requires transcoding Allow Playback Video  video that requires transcoding

Allow Playback Video  video that requires conversion without re-encoding Allow Live TV access

Allow Live TV recording management  Force transcoding of remote media sources such as Live TV

Link to instruction  A link to the instruction will be reflected in the client area.

Overwrite package settings  Overwriting the package settings is necessary to personalize the service if you need it.

Send changes to server  To apply the changes on the server, it is necessary to check this checkbox.
