

# Service configuration

## Jellyfin module **WISECP**

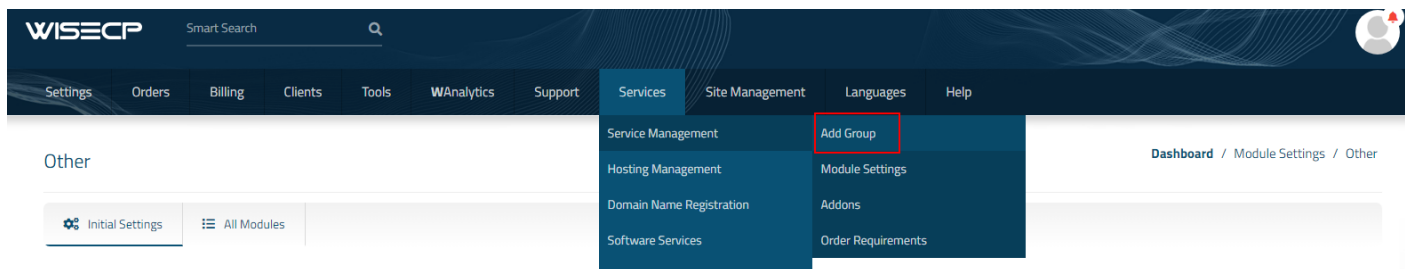

[Order now](#) | [Download](#) | [FAQ](#)

If you do not have a **Service Group** where you want to place the new service, you need to create a new **Service Group**

1. Log in to the administrative area of your **WISECP**.
2. Create New Service Group

Go to

Services -> Service Management -> Add Group

Enter all the necessary data and click the **'Create Group'** button.

Module

PUQ Jellyfin

Server Group

Default (Servers: 1)

Use All Libraries

☐ select all libraries together

Username prefix

jelly-

Will be attached to the beginning of username. Only small letters and numbers and symbol "-".

Libraries

Movies  
Cartoons

Username suffix

-fin

Will be appended to the end of username. Only small letters and numbers and symbol "-".

Streaming bitrate limit

50  
Mbps

SyncPlay access

Allow user to create and join groups

Sync playback with other devices

User sessions

3

A value of 0 will disable the feature.

Failed login attempts

3

before user is locked out. Setting this to -1 will disable the feature

Remote control

☐ Remote control of shared devices

Media downloads

☒ Users can download media and store it on their devices. This is not the same as a sync feature. Book libraries require this enabled to function properly.

Allow Playback Media

☒

Allow Playback Audio

☒ audio that requires transcoding

Allow Playback Video

☒ video that requires transcoding

Allow Playback Video

☐ video that requires conversion without re-encoding

Allow Live TV access

☐

Allow Live TV recording management

☐

Force transcoding of remote media sources such as Live TV

☐

A link to the instruction will be reflected in the client area.

Automatic Setup

☒ Please activate for automatic installation of the order. Otherwise, administrator approval is required.

Create Product

4. Fill in the configuration options according to your preferences.

Libraries:

- **Use All Libraries:** Choosing all of libraries from your Jellyfin server
- **Libraries:** The libraries you want to make available to customers of this product.

**(IMPORTANT! Start a new line for each new library)**

Example:

"Movies

Beginner`s Programming Course

Comedy"

**IMPORTANT!**

If you have a folder named "-", please enter it not as the first one or rename it.  
If you don't want any folder to be accessible, type "-".

## User Configuration:

- **Streaming bitrate limit:** An optional per-stream bitrate limit for all out of network devices. This is useful to prevent devices from requesting a higher bitrate than your internet connection can handle. This may result in increased CPU load on your server in order to transcode videos on the fly to a lower bitrate.
- **SyncPlay access:** The SyncPlay feature enables to sync playback with other devices. Select the level of access this user has to the SyncPlay
- **Remote control:** Remote control of shared devices (DLNA devices are considered shared until a user begins controlling them)
- **Media downloads:** Users can download media and store it on their devices. This is not the same as a sync feature. Book libraries require this enabled to function properly.
- **User sessions:** Set the maximum number of simultaneous user sessions.  
A value of 0 will disable the feature.
- **Failed login attempts:** Determine how many incorrect login tries can be made before lockout occurs.  
A value of zero means inheriting the default of three tries for normal users and five for administrators. Setting this to -1 will disable the feature.
- **Username prefix/Username suffix:** Necessary in order to generate a username for the service, in the format: **prefix<client\_id>-<service\_id>suffix**

Allow playback (Restricting access to transcoding may cause playback failures in clients due to unsupported media formats)

- **media**
- **audio that requires transcoding**
- **video that requires transcoding**
- **video that requires conversion without re-encoding**

Feature access:

- **Allow Live TV access**
- **Allow Live TV recording management**
- **Force transcoding of remote media sources such as Live TV**

## Links

- **Link to instruction:** Link to the instruction, if filled out, it will be reflected in the client area
