

# Primary Navbar

## Menu Manager addon **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

## Overview

The Primary Navbar page is the main menu editor. It provides a visual drag-and-drop interface for building and managing the WHMCS client area navigation bar.

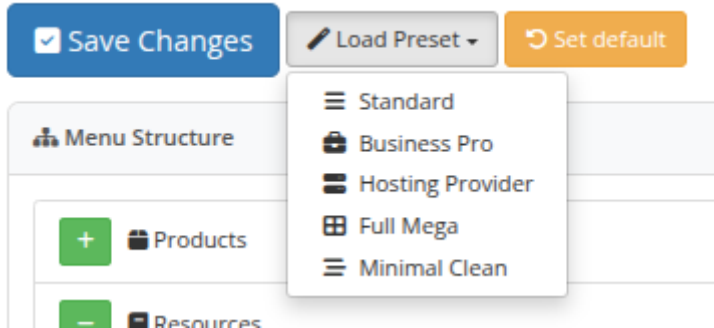

Primary Navbar editor — drag-and-drop menu structure on the left, item editor on the right

## Action Buttons

At the top of the page, three action buttons are available:

Button	Description
<b>Save Changes</b>	Saves the current menu structure to the database and applies it to the client area
<b>Load Preset</b>	Opens a dropdown with 5 ready-to-use menu presets
<b>Set Default</b>	Resets the menu to the original WHMCS default Primary Navbar

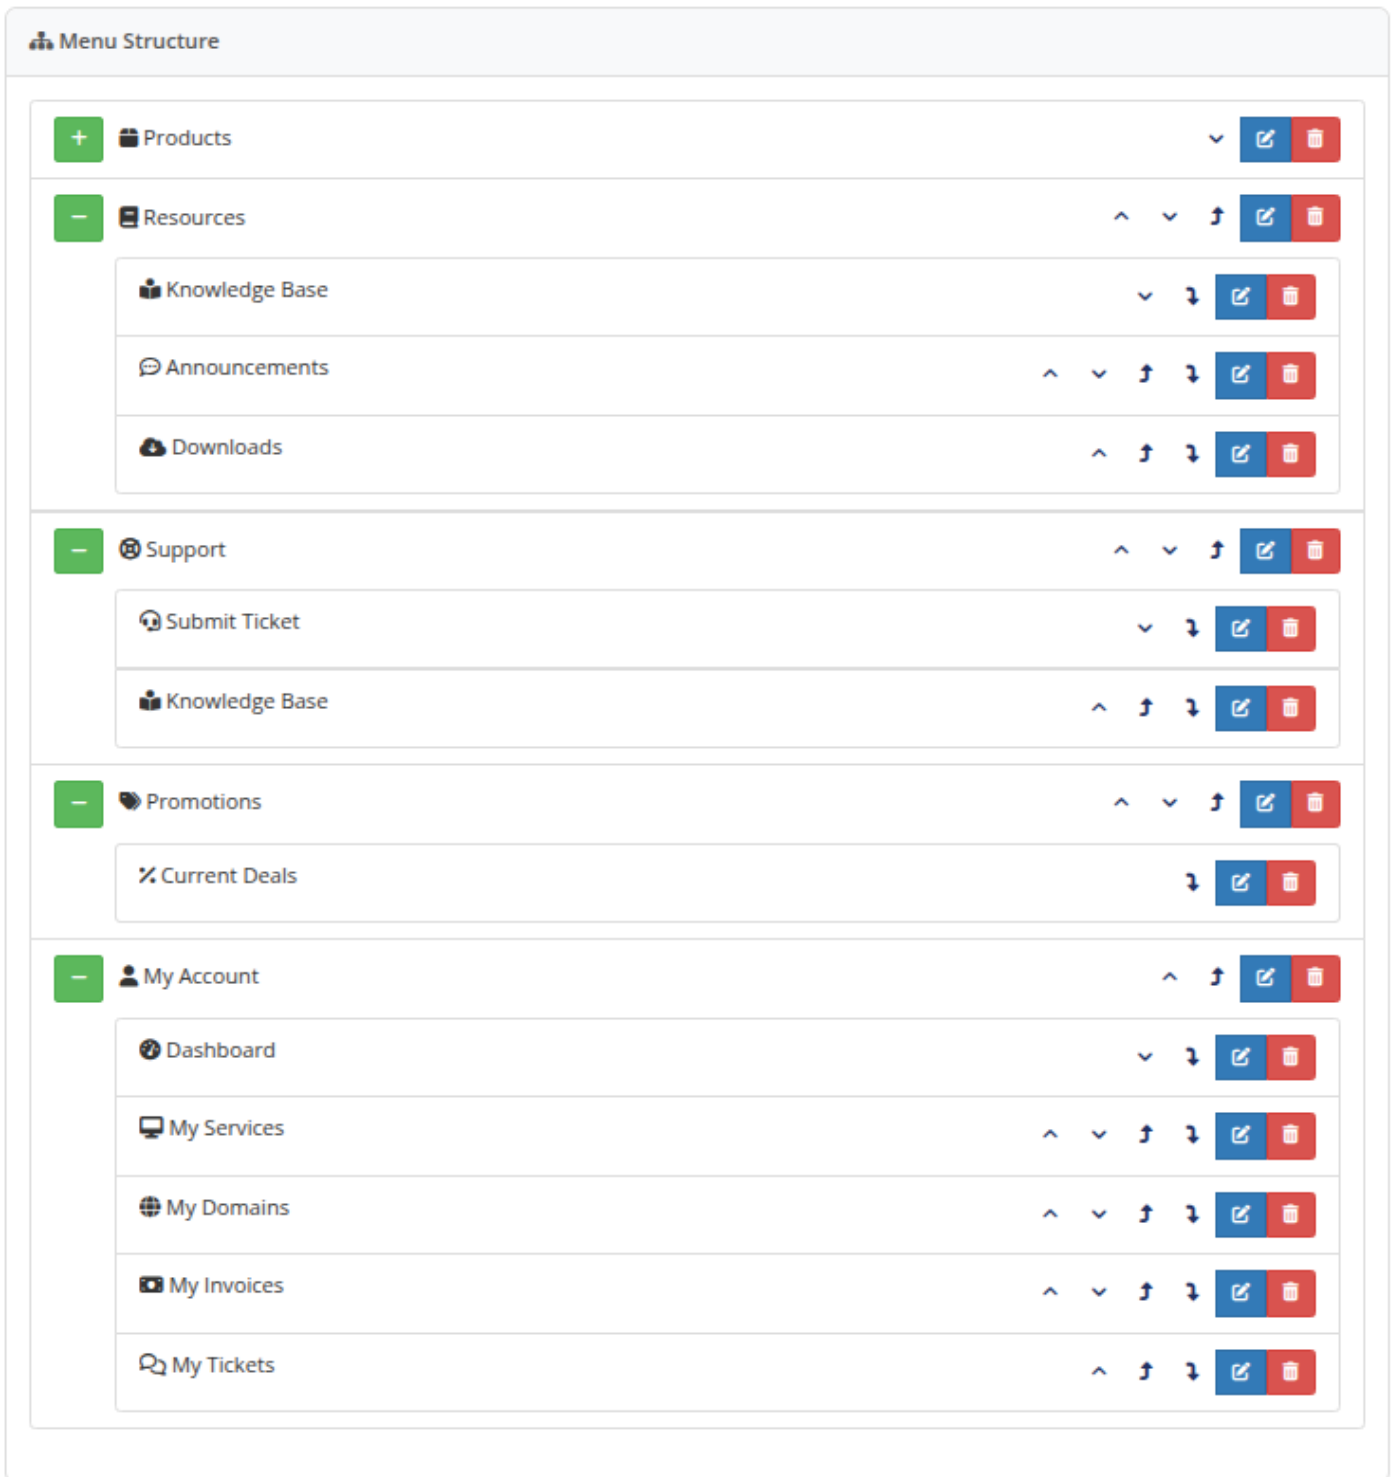

*Load Preset dropdown — choose from*

*Standard, Business Pro, Hosting Provider, Full Mega, or Minimal Clean*

# Menu Structure

The left panel shows the current menu tree. Items can be:

- **Dragged and dropped** to reorder or change nesting level
- **Nested** up to 3 levels deep (parent > child > grandchild)
- **Expanded/collapsed** using the +/- buttons
- **Moved** up and down using the arrow buttons
- **Edited** by clicking the edit (pencil) button
- **Deleted** by clicking the delete (trash) button

Menu Structure — example with Products, Resources, Support, Promotions, and My Account items with nested children

## Item Editor

The right panel contains the form for adding and editing menu items.

Item Editor — configure menu name, link, target, display rule, divider, and mega menu settings

## Fields

Field	Description
<b>Menu Name</b>	The display text for the menu item. Must be unique. Includes an icon picker button for selecting a Font Awesome 5 icon.
<b>Menu Link</b>	The URL for the menu item. Use relative paths for internal pages (e.g., <code> cart.php </code> ) or full URLs with <code> https:// </code> for external links.
<b>Open in new tab?</b>	Whether the link opens in a new browser tab ( <code> _blank </code> ) or the same tab ( <code> _self </code> ).
<b>Display Rule</b>	Controls when the menu item is visible: <b>Always</b> (all visitors), <b>Existing Client</b> (logged-in clients only), or <b>Guest Client</b> (guests only).
<b>Nav divider</b>	Adds a horizontal dividing line before this item in dropdown menus.

Field	Description
<b>Mega menu</b>	Enables mega menu mode — displays a wide dropdown panel with custom HTML content instead of a standard dropdown.
<b>Mega menu text</b>	The HTML content for the mega menu panel. Supports any valid HTML including columns, images, links, and styled content.

## Buttons

Button	Description
<b>Update</b>	Updates the currently selected menu item with the form values (enabled only when an item is selected for editing)
<b>Add</b>	Adds a new menu item using the current form values

## Multi-Language Labels

Click the **Show all languages** button below the Menu Name field to expand the translations panel. You can enter a translated menu name for each of the 27 supported languages.

Menu Name

Show all languages

Arabic	<input type="text"/>
Azerbaijani	<input type="text"/>
Catalan	<input type="text"/>
Chinese	<input type="text"/>
Croatian	<input type="text"/>
Czech	<input type="text"/>
Danish	<input type="text"/>
Dutch	<input type="text"/>
Estonian	<input type="text"/>
Farsi	<input type="text"/>
French	<input type="text"/>
German	<input type="text"/>
Hebrew	<input type="text"/>
Hungarian	<input type="text"/>
Italian	<input type="text"/>
Macedonian	<input type="text"/>

# Mega Menu Templates

Below the Mega menu text field, 5 quick templates are available:

Template	Description
<b>Columns with Icons</b>	Multi-column layout with Font Awesome icons and grouped links
<b>Feature Cards</b>	Card-based layout for highlighting features or services
<b>Services Grid</b>	Grid layout for displaying service categories
<b>Contact &amp; Info</b>	Contact information panel with phone, email, and quick action buttons
<b>Promo Banner</b>	Promotional banner with call-to-action

Click any template button to insert its HTML into the Mega menu text field. You can then customize the content as needed.

---

# Menu Presets

The **Load Preset** dropdown provides 5 ready-to-use menu configurations:

Preset	Description
<b>Standard</b>	Default WHMCS menu structure with Products, Resources, Support, Promotions, and My Account
<b>Business Pro</b>	Professional business-oriented menu with enhanced navigation
<b>Hosting Provider</b>	Optimized for web hosting companies with hosting-specific menu items
<b>Full Mega</b>	Menu with mega menu panels enabled for rich dropdown content
<b>Minimal Clean</b>	Simplified, minimalist menu with essential items only

📌 **Note:** Loading a preset replaces the current menu structure. A confirmation dialog is shown before applying. After loading a preset, the page reloads to

reflect the changes.
