Overview

The Settings page allows you to select the active navbar style for the WHMCS client area.

Settings — select the active navbar style from 10 available options

Navbar Style

The main section of the Settings page displays all available navbar styles as selectable cards. Each card shows:

- **Style icon** — a colored icon representing the style
- **Style name** — the name of the style
- **Description** — a brief description of the visual effect

Click on a style card to select it. The currently active style is highlighted with a border.

Available Styles

Style	Description
Default WHMCS	Standard WHMCS navbar appearance with no modifications
Modern Shadow	Clean design with subtle shadows, smooth hover transitions and refined typography
Dark Elegant	Dark background navbar with light text, elegant hover effects and premium feel
Gradient Wave	Vibrant gradient backgrounds on hover, colorful and eye-catching transitions
Minimal Underline	Ultra-clean design with animated underline effects on hover, no borders
Rounded Pill	Rounded pill-shaped items with soft shadows and friendly, approachable design
Glass Morphism	Frosted glass effect with blur, transparency and modern glassmorphism aesthetic
Neon Glow	Vibrant neon glow effects on hover with dark background and luminous accents
Flat Material	Google Material Design inspired with elevation shadows and ripple-like effects
Classic Bordered	Traditional bordered design with clean lines, separators and classic aesthetics

Saving

After selecting a style, click the **Save Settings** button at the bottom of the page. The selected style is immediately applied to the WHMCS client area.

Customize Styles

Click the **Customize Styles** link below the style cards to navigate to the Navbar Styles page, where you can edit colors, shadows, and other properties for each style.
