Product Information

Mikrotik VPN module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

Admin area product information

The administrator can view detailed service information in the WHMCS admin panel on the product/service page. The module adds a custom panel in the **Module Data** section with the following information:

License verification status

Displays the current license status with a colored indicator:

- **Green** — license is valid and active
- **Red** — license is invalid, expired, or missing

API connection status

Shows the result of a real-time connection test to the Mikrotik router API-SSL, confirming that the credentials entered for the server are working correctly.

VPN account information

Field	Description
Username	The VPN account username (PPP secret name) on the Mikrotik router
Enabled	Whether the VPN account is currently enabled or disabled on the router
Profile	The PPP profile assigned to the account

Field	Description
Service	The VPN service / protocol (e.g. <code>[any]</code> , <code>[pptp]</code> , <code>[l2tp]</code> , <code>[pppoe]</code>)
IP address	The IP address assigned to the account from the server's IP pool
Comment	Includes the configured Comment PREFIX and WHMCS service identifier

Traffic information

- **Bandwidth limits** — configured download / upload speed limits
- **Traffic balance** — current remaining traffic balance for the customer
- **Traffic that will be added** on the next billing cycle
- **Connection status** — shows whether the client is currently online

Available management actions

The standard WHMCS module command buttons are available:

- **Create** — provision a new VPN account on the Mikrotik router
- **Suspend** — disable the VPN account
- **Unsuspend** — re-enable the VPN account
- **Terminate** — permanently delete the VPN account from the router
- **Change Password** — reset the account's password
- **Change Package** — update profile, service, bandwidth limits and traffic configuration (used during upgrades/downgrades)
- **Reset Connection** — force-disconnect the current VPN session (useful when the customer needs to re-establish the tunnel)
