

Mikrotik VPN WHMCS module

The module is intended as an opportunity for IT companies to expand their offer for customers by offering paid VPN accounts. After installation, the module will fully manage the creation, edition, and suspension of VPN accounts and interact with the WHMCS billing system, exchanging data needed for settlements with customers, activations or service blocking. Initial assumptions: the company uses WHMCS and owns or is able to install Mikrotik routers. Mikrotik routers are necessary to provide VPN service (managing Mikrotik secrets users). WHMCS is necessary to manage the VPN service.

Description

Mikrotik VPN module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

The module, fully installed and correctly implemented in the system, offers the following functionalities.

Module Functions:

- Auto create and deploy VPN account/accounts
- Suspend/Unsuspend/Terminate/Change Package/Change Password/Reset connection
- Use only Mikrotik API
- Possibility to set Bandwidth speed limits
- Possibility to set Bandwidth traffic limits
- Ability to buy additional traffic
- Traffic usage statistics
- Auto-Limiting the use of the service when the traffic limit is exhausted.
- Module supports multilingualism
- Link to instructions for setting up the service in the client area.
- User email notification traffic limit
- Suspend exceeding traffic limit email notification
- In the WHMCS settings, a list of IPs is specified for use by clients.
- Ability to use both private and public IPs for clients

Available options in the admin panel:

- Create users
- Suspend users
- Terminate users
- Unsuspend users
- Change password
- Change Package
- VPN connection status
- Reset Connection
- Traffic added history

Available options in the client panel:

- Change the VPN password
- VPN connection status
- Traffic balance
- Traffic statistics
- Traffic added history

WHMCS minimal version: 8 +

Mikrotik minimal version: 7 +

The settings of the whmcs module when it comes to upload and download speeds register the opposite values in the mikrotik router (e.g. download speed in whmcs 1mb = upload speed in mikrotik 1mb). This is due to the fact that from the point of view of Mikrotik, the traffic is incoming, and from the point of view of the VPN client, this is outgoing traffic.

Please be aware that to ensure proper functionality of VPN connections, it is essential for you, as an administrator, to correctly configure the Mikrotik router. This entails configuring NAT, Firewall, routing, and all the required settings for VPN to operate correctly on your router.

Changelog

Mikrotik VPN module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

v2.2 Released 23-01-2025

1. The product configuration method has been redesigned.
2. Added a configuration option in the product settings to display custom HTML in the client panel based on the VPN protocol.

IMPORTANT: After the update, all products using this module must be completely reconfigured.

v2.0 Released 23-09-2024

Module is coded ionCube v13

Supported php version:

- php 7.4 WHMCS 8.11.0 -
- php 8.1 WHMCS 8.11.0 +
- php 8.2 WHMCS 8.11.0 +

1. Client area more adapted for mobile version
2. Buttons for copying login and password have been added to the client area

v1.3.5 Released 11-10-2023

1. Support WHMCS v8.8.0
2. Translations added/updated (**Arabic, Azerbaijani, Catalan, Chinese, Croatian, Czech, Danish, Dutch, English, Estonian, Farsi, French, German, Hebrew, Hungarian, Italian, Macedonian, Norwegian, Polish, Romanian, Russian, Spanish, Swedish, Turkish, Ukrainian**)

)

v1.3 Released 04-02-2023

1. Changed client side. Added intuitive icons.
 2. Better code adaptation for PHP 8.1
 3. Bug fixed (Attempt to assign property "bytes_upload" on string in...puqMikrotikVPN.php:632)
-

v1.2 Released 04-01-2023

1. Support WHMCS V8.6
 2. Support IonCube PHP Loader v12
 3. Support for PHP 8.1
 4. Changes made to templates
 5. Added the ability to select the frequency of collecting traffic statistics. Daily cron and per cron
 6. The method of collecting statistics has been changed. After each collection of statistics, the counters on Mikrotik are reset to zero.
 7. In the service settings, the choice of email template was changed to a drop-down menu.
-

v1.1 Released 28-10-2022

1. Changes in design in the client area.
 2. Added translations, Ukrainian, Persian
 3. Changed the selection of the ppp secrets profile from text to a drop-down menu with a choice of spend, in the product configuration
-

v1.0 Released 01-08-2022

Mikrotik VPN module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

Note: **Enter the following commands one by one and wait for the command to complete.**

I. Check RouterOS version

Make sure that the version of RouterOS is 7+

```
system/package/print
```

II. Enabling HTTPS Create your own root CA on your router

```
/certificate  
add name=LocalCA common-name=LocalCA key-usage=key-cert-sign,crl-sign
```

III. Sign the newly created CA certificate

```
/certificate
```

```
sign LocalCA
```

IV. Create a new certificate for Webfig (non-root certificate)

Note: as common-name=XXX.XXX.XXX.XXX You enter public IP address of the router.

```
/certificate  
add name=Webfig common-name=XXX.XXX.XXX.XXX
```

V. Sign the newly created certificate for Webfig

```
/certificate  
sign Webfig ca=LocalCA
```

VI. Enable SSL (*www-ssl*) and specify to use the newly created certificate for Webfig

```
/ip service  
set www-ssl certificate=Webfig disabled=no
```

VII. Enable api-ssl and specify to use the newly created certificate for Webfig

```
/ip service  
set api-ssl certificate=Webfig disabled=no
```

VIII. Enable VPN server

To enable the VPN server

- Quick Set
- CAPsMAN
- Interfaces
- Wireless
- WireGuard
- Bridge
- PPP
- Mesh
- IP
- MPLS
- IPv6
- Routing
- System
- Queues
- Files

Add server (router Mikrotik) in WHMCS

Mikrotik VPN module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

Add a new server to the system WHMCS.

System Settings->Servers->Add New Server

- Enter the correct **Name** and **Hostname**

Name is just for Your convenience and You can put there anything You like ie:
Mygreat mikrotik routr

You can choose whatever hostname You want. Valid entries look similar to:
vpn.mydomain.com, ourgreatvpn.mydomain.net. You can also dedicate whole domain ie: myVPNservices.com if You like. The important thing is to resolve the choosen IP address of the Mikrotik router in DNS server for Your domain.

- In the "**Assigned IP Addresses field**", enter a list of IP addresses that will be issued to users.

Name	vpn [REDACTED] pl
Hostname	vpn [REDACTED] pl
IP Address	
Assigned IP Addresses (One per line)	<div> 192.168.222.14 192.168.222.15 192.168.222.16 192.168.222.17 192.168.222.18 192.168.222.19 192.168.222.20 192.168.222.21 </div>
Monthly Cost	0.00
Datacenter/NOC	
Maximum No. of Accounts	200
Server Status Address	<div></div> <p>To display this server on the server status page, enter the full path to the server status folder (required to be uploaded to each server you want to monitor) - eg. https://www.example.com/status/</p>
Enable/Disable	<input type="checkbox"/> Tick to disable this server

- In the **Server Details** section, select the "**PUQ Mikrotik VPN**" module and enter the correct **username** and **password** for the **Mikrotik** router.
- To check, click the "**Test connection**" button
