

# Changelog

## Mikrotik WireGuard VPN module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

### v3.2 — 2026-04-21

- **Improved stability across the WHMCS admin area.** Rare page-loading errors that could appear on some admin screens (for example when opening a support ticket on installations with non-standard file layouts, symlinks or custom hosting paths) have been eliminated. The admin panel now loads smoothly in every environment.
  - **Greater compatibility with complex hosting setups.** The module is now fully resilient to WHMCS installations using symlinked directories, multi-domain hosting and custom include paths.
  - **Smoother day-to-day operation for administrators.** Fewer interruptions, no unexpected "Oops!" pages, and a more predictable experience when working with tickets, clients and services — so your team can focus on customers, not on troubleshooting.
- 

### v3.1 — 2026-02-26

#### New Features

- Added option to disable traffic statistics collection per product
  - When statistics collection is disabled, traffic data is not collected and the statistics page is hidden from the client area
-

# v3.0 — 2026-02-02

## Changes

- Support for WHMCS 9+ with redesigned product module settings
- Updated client area interface design
- New admin settings UI with custom panels (Mikrotik & Bandwidth, WireGuard Configuration, History, Client Area)
- Configuration stored as JSON in configoption24 instead of individual config options

⚠ **Warning:** Product reconfiguration is required after update from v2.x.

---

# v2.0 — 2024-09-23

## Changes

- Module is coded with ionCube v13
- Supports PHP 7.4, 8.1, and 8.2 with WHMCS 8.11.0 and later versions

---

# v1.3 — 2024-07-29

## New Features

- Added metric pricing for incoming and outgoing traffic (Bandwidth Usage Download/Upload in GB)
-

# v1.2 — 2024-06-17

## New Features

- Implemented VPN interface reboot capability for connection resets

## Improvements

- Improved mobile client area adaptation
  - Minor translation adjustments
- 

# v1.1 — 2023-12-15

## New Features

- Package change functionality introduced

## Improvements

- Minor administrative and client interface modifications
- 

# v1.0 — 2023-10-09

First release.

## Features

- Automatic creation and deployment of WireGuard VPN accounts on Mikrotik routers
- Suspend, unsuspend, and terminate VPN accounts
- Integration with Mikrotik REST API only (RouterOS 7+)
- Configurable bandwidth speed limits (upload/download)

- Support for private and public IP addresses
  - IP address pool management per server
  - Text and QR code WireGuard configuration formats
  - VPN connection status monitoring (endpoint, handshake, RX/TX)
  - Traffic statistics with daily and monthly charts
  - Client area with configuration download and connection info
  - Admin area with peer management and API status
  - Multilingual support (25 languages)
  - License verification system
-
