Server: vpn-test.uuq.pl Dedicated IP: 192.168.88.2

Overwrite package settings Overwriting the package settings is necessary to personalize the service if you need it.

Send changes to server To apply the changes on the server, it is necessary to check this checkbox.

[Update](#)

In the opened tab, you have a view of the online status of the service. The available online information includes:

- Connection status to the API
- Information about the VPN account on the **MikroTik** router
- Information about the account

Also, below are fields with the client's personal data.

You can also individually override package options for the client by checking the '**Overwrite package settings**

' box.

After modifying the configuration options, check the **'Send changes to server'** box to save the data to the **MikroTik** server.

```
[Peer] PersistentKeepalive = 25
Endpoint = vpn-test.uuq.pl:13232
