Add server (MinIO S3)

Add a new server to the system WHMCS

Navigate to: **System Settings → Servers → Add New Server**

Step 1 — General settings

Enter the correct **Name** and **Hostname** for your MinIO S3 server.

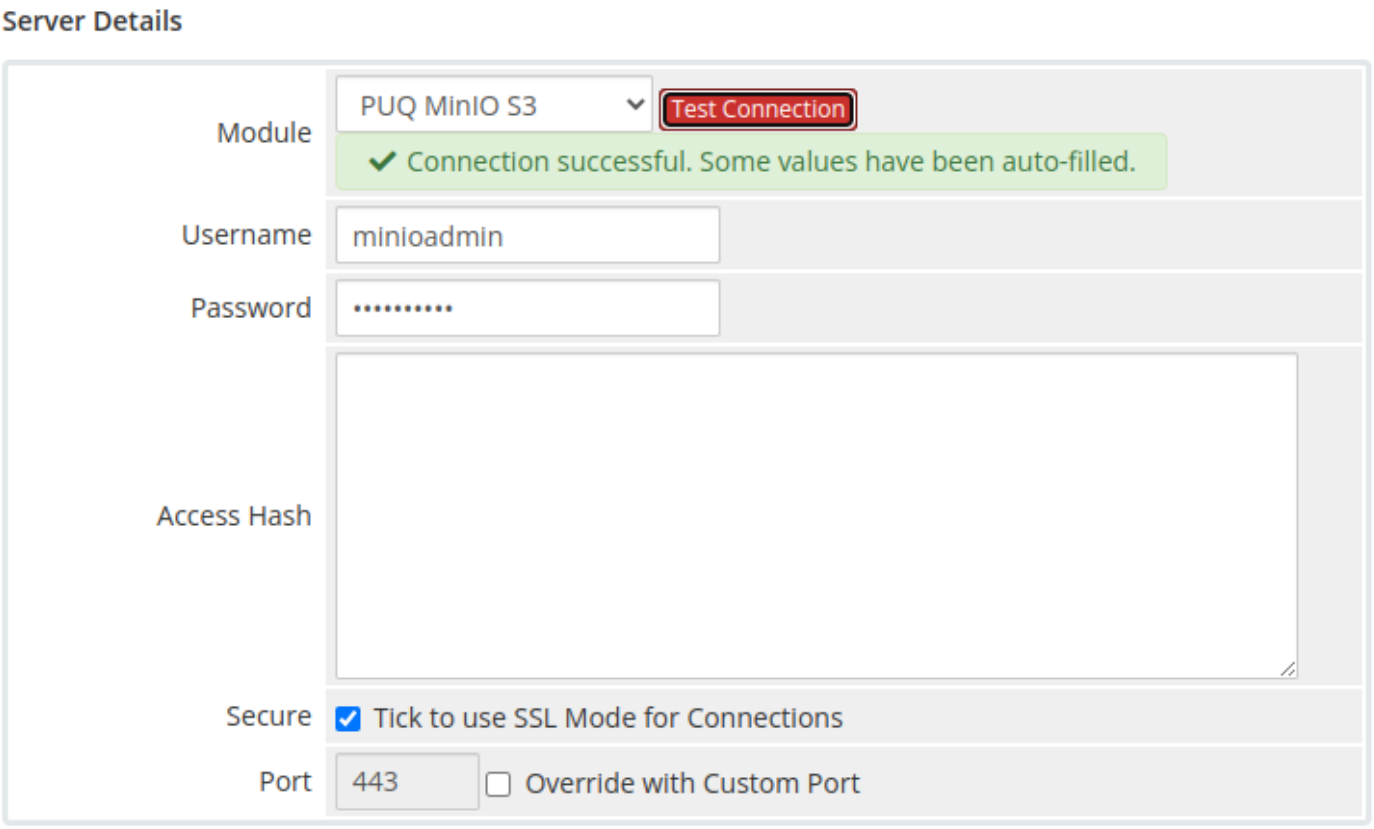

05-add-server-1.png

Step 2 — Module settings

In the **Server Details** section:

1. Select the **PUQ MinIO S3** module
2. Enter the correct **username** and **password** for the MinIO web interface
3. Click the **Test connection** button to verify the connection
