Description

Nextcloud module **WHMCS**

Order now | Download | FAQ

Preface

Thanks to the module, the company is able to offer public cloud services to its customers based on Nextcloud accounts.

The module is used to create customer accounts on the previously prepared Nextcloud server. The module enables You to define multiple public cloud packages and sell them at different prices. The module creates a customer account according to the selected package. The client can have many independent accounts in the cloud.

> For the correct operation of the module, a pre-prepared Nextcloud installation is required (the module does not assist in the installation of the Nextcloud server and assumes that such installation is ready for operation through API.) Module use Nextcloud API to manage clients account.

> We have prepared a detailed installation manual for the module, including all the steps needed to implement the module, including the preparation of the Nextcloud server, including all installation steps such as NGNIX, PHP, Nextcloud, SSL certificates etc.

Functions:

- Auto create and deploy client account
- The module uses only the API to manage the accounts
- Module supports multilingualism **(Arabic, Azerbaijani, Catalan, Chinese, Croatian, Czech, Danish, Dutch, English, Estonian, Farsi, French, German, Hebrew, Hungarian, Italian, Macedonian, Norwegian, Polish, Romanian, Russian, Spanish, Swedish, Turkish, Ukrainian)**

- The module shows the current and history of data usage by the user
- The module notifies the user about exceeding the data limit
- Link to instructions for setting up the service in the client area.

Available options in the admin panel:

- Create users
- Suspend users
- Terminate users
- Unsuspend users
- Change users password
- Change Package
- API connection status
- NextCloud Disk status

Available options in the client panel:

- Change the NextCloud user password
- NextCloud Disk status
- Using disk space statistics

WHMCS minimal version: 8 +

Nextcloud minimal version: 20+
