Activate Payment Gateway in WHMCS

1. Log in to your WHMCS Admin Area.
2. Navigate to **System Settings → Payment Gateways** (or **Setup → Payments → Payment Gateways** in older WHMCS versions).
3. Switch to the **All Payment Gateways** tab.
4. Locate **PUQ NOWPayments** in the list and click to activate.

Configure Payment Gateway

After activating, WHMCS redirects to the **Manage Existing Gateways** tab (or navigate there directly via **System Settings → Payment Gateways → Manage Existing Gateways**). Locate the **PUQ NOWPayments** section.

gateway-configuration.png

Configure the following parameters:

Parameter	Type	Description
Show on Order Form	Checkbox	Check this box to enable NOWPayments as an available payment option on customer checkouts and invoices.
Display Name	Text	The public title displayed to customers (default: `NOWPayments`).
License Key	Text	Your PUQ module license key. The validation status is displayed inline.
Mode of Operation	Dropdown	Choose between **Production – live payments** or **Sandbox – test environment**. Always test in sandbox mode before going live.
Payment Flow	Dropdown	Choose between **Embedded Currency Selector** (customer selects coin on WHMCS invoice) and **Direct Hosted Checkout** (customer redirects to NOWPayments checkout).
Minimum Invoice Amount	Text (Number)	Optional minimum invoice total in your WHMCS base currency. If set, invoices below this value display an advisory notice.

Parameter	Type	Description
Block Invoices Below Minimum	Checkbox	When enabled, completely blocks payment processing for invoices below the minimum amount and displays a red notice asking the client to select another payment method.
API Key (Production)	Password	Production API Key from your NOWPayments Production Store Settings.
IPN Secret Key (Production)	Password	Production IPN Secret Key from NOWPayments Notifications.
API Key (Sandbox)	Password	Sandbox API Key for development/testing from NOWPayments Sandbox Keys.
IPN Secret Key (Sandbox)	Password	Sandbox IPN Secret Key from NOWPayments Sandbox Notifications.
IPN Callback URL	Read-only	Automatically generated webhook endpoint URL. Copy this into your NOWPayments dashboard settings.
Module Version	Read-only	Displays the currently installed module version (e.g. `4.0.0`).
Sort Currencies	Dropdown	Sorting order for coins in the dropdown: `Ascending (A-Z)`, `Descending (Z-A)`, or `Do Not Sort (Merchant Default)`.
Show Currency Code	Dropdown	Choose `Yes` to display ticker symbols next to names (e.g. `Bitcoin (BTC)`).
Is Fee Paid by User	Dropdown	Choose `Yes` if the customer pays the gateway commission fee, or `No` if absorbed by merchant.
Convert To For Processing	Dropdown	Optional WHMCS setting to convert invoice amounts into a selected currency prior to processing.

Click **Save Changes** at the bottom of the page.

Webhook / IPN Setup in NOWPayments

To receive automated payment confirmations:

1. Copy the **IPN Callback URL** shown in your WHMCS gateway settings:
   `https://yourdomain.com/modules/gateways/callback/puq_nowpayments.php`
2. Open your NOWPayments account settings:
   - For Production: https://account.nowpayments.io/store-settings#notifications
   - For Sandbox: https://account-sandbox.nowpayments.io/store-settings#notifications
3. Paste the callback URL and ensure the generated **IPN Secret** matches the secret entered in WHMCS.
4. Click **Save Changes**.

> **Important:** The webhook callback URL must be publicly accessible over HTTPS so that NOWPayments servers can post real-time IPN notifications to your WHMCS.
