WHMCS Installation and Update

NOWPayments Payment Gateway module

WHMCS

Order now | Download | Community

System requirements

Requirement	Minimum
WHMCS	8.x+, 9.x+.
PHP	7.4, 8.1, 8.2, 8.3, 8.4
ionCube Loader	v15+

> **Note:** The module uses ionCube encoding. Make sure ionCube Loader is installed and active on your server.

Installation

> **Note:** The module now uses **ionCube 15**, which provides universal out-of-the-box support for all encodings.

> All versions can be found at this link:
> `https://download.puqcloud.com/WHMCS/gateways/PUQ_WHMCS_PG-nowpayments/`
>
> Older module versions for WHMCS 8 are available in the archive directory:
> `https://download.puqcloud.com/WHMCS/gateways/PUQ_WHMCS_PG-nowpayments/archive/`

1. Download the latest version from the PUQ download page:

```
wget https://download.puqcloud.com/WHMCS/gateways/PUQ_WHMCS_PG-nowpayments/PUQ_WHMCS_PG-nowpayments-latest.zip
```

2. Unzip the archive:

```
unzip PUQ_WHMCS_PG-nowpayments-latest.zip
```

3. Upload the module files to your WHMCS installation: Copy the extracted gateway files from the `puq_nowpayments/` archive folder into your WHMCS `modules/gateways/` directory:

```
# Copy main gateway file, asset folder, and IPN webhook callback
cp -f puq_nowpayments/puq_nowpayments.php /path/to/whmcs/modules/gateways/
cp -rf puq_nowpayments/puq_nowpayments /path/to/whmcs/modules/gateways/
cp -rf puq_nowpayments/callback /path/to/whmcs/modules/gateways/
```

4. Ensure proper ownership and file permissions for your web server user (e.g. `www-data`):

```
chown -R www-data:www-data /path/to/whmcs/modules/gateways/puq_nowpayments*
chown -R www-data:www-data /path/to/whmcs/modules/gateways/callback/
```

5. The module files are now in place. Proceed to the gateway configuration chapter.

Update

The update procedure is the same as installation — replace the existing files with the new version:

1. Download the latest version as described in the Installation section.
2. Unzip the archive.
3. For gateway modules, simply overwrite the existing files. No deactivation is needed:

```
cp -f puq_nowpayments/puq_nowpayments.php /path/to/whmcs/modules/gateways/
cp -rf puq_nowpayments/puq_nowpayments /path/to/whmcs/modules/gateways/
cp -rf puq_nowpayments/callback /path/to/whmcs/modules/gateways/
```

4. Verify the version number in the module interface matches the new release.

Revision #8
