# Product Information

ownCloud module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

## Admin area product information

The administrator can view detailed service information in the WHMCS admin panel on the product/service page. The module adds a custom panel in the **Module Data** section with the following information:

### License verification status

Displays the current license status with a colored indicator:

- **Green** — license is valid and active
- **Red** — license is invalid, expired, or missing

### API connection status

Shows the result of a real-time connection test to the ownCloud server, confirming that the API credentials are working correctly.

### User information

Field	Description
<b>Username</b>	The ownCloud username assigned to this service
<b>Enabled</b>	Whether the user account is currently enabled or disabled
<b>Group</b>	The ownCloud group(s) the user belongs to
<b>Email</b>	The email address associated with the ownCloud account

## Disk usage

- **Visual progress bar** — a colored bar showing the proportion of used vs. free disk space
- **Detailed table** with:
  - Disk limit (total allocated quota)
  - Disk used (current usage)
  - Disk free (remaining space)
  - Disk used percentage
  - Disk free percentage

## Available management actions

The standard WHMCS module command buttons are available:

- **Create** — provision a new ownCloud account
  - **Suspend** — disable the ownCloud user
  - **Unsuspend** — re-enable the ownCloud user
  - **Terminate** — permanently delete the ownCloud user
  - **Change Password** — reset the user's password
  - **Change Package** — update disk quota and group assignment (used during upgrades/downgrades)
