

Add server (ownCloud server)

ownCloud module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

Add a new server to the system WHMCS.

System Settings->Servers->Add New Server

- Enter the correct **Name** and **Hostname**
- In the **Server Details** section, select the "**PUQ ownCloud**" module and enter the correct **username** and **password** for the **ownCloud web interface**.
- To check, click the "**Test connection**" button

Server Details
